

# System Software 6.5 Conference Center Call Assistant 2.0

Allworx hits a **Triple-Play** with three new releases!

## Allworx System Software 6.5

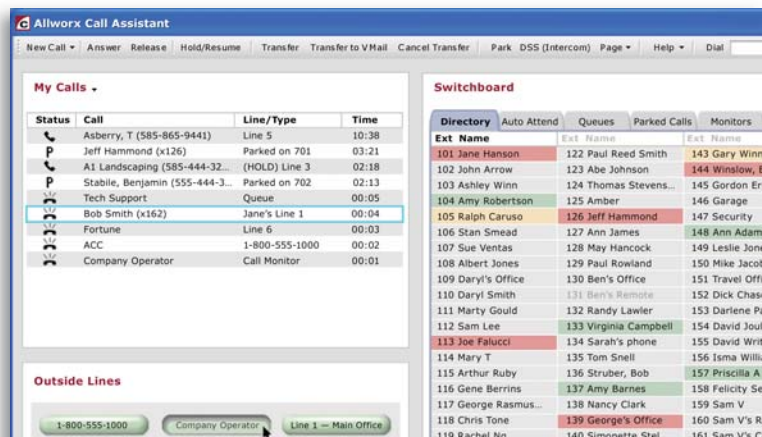

**You asked for it and Allworx delivers!** The new Allworx system software 6.5 enhances the entire Allworx family of award-winning communications systems. This major new release brings the following capabilities to the Allworx 6x, 10x, and 24x platforms:

- **New multi-site extensions** — Setting up and using a convenient 3-digit dialing plan across Allworx systems in multiple sites (up to 99 sites) has never been easier! With release 6.5, Allworx systems automatically discover and route extension plans.
- **Enhanced T1 provisioning capabilities** — T1 voice services have been expanded with support for Robbed Bit Signaling (RBS)/CAS lines. Now you can have maximum flexibility in building SMB voice solutions with support for virtually all forms of T1 voice and fractional voice (PRI and CAS) trunks in addition to VoIP SIP trunks and traditional CO lines.
- **IMAP4 support** — with Internet Message Access Protocol 4 (IMAP4) added to our existing POP3 support, users can more easily access and synchronize their voicemails and emails across multiple inboxes on PCs, laptops and handheld email clients using popular email clients such as Microsoft Outlook, Outlook Express, Mozilla/Thunderbird, Opera, and Eudora.
- Release 6.5 brings many other great SMB features, such as voicemail greetings tied to a user's presence/status, enhanced SMTP email routing, DID information tied to user's handsets, and much more!

## Call Assistant 2.0

This Windows PC-based tool, fully integrated with Allworx VoIP phones and designed to bring ease and efficiency to the operator/receptionist task, has been strongly enhanced with new views of the company directory, auto attendant status, parked calls, and call monitors.

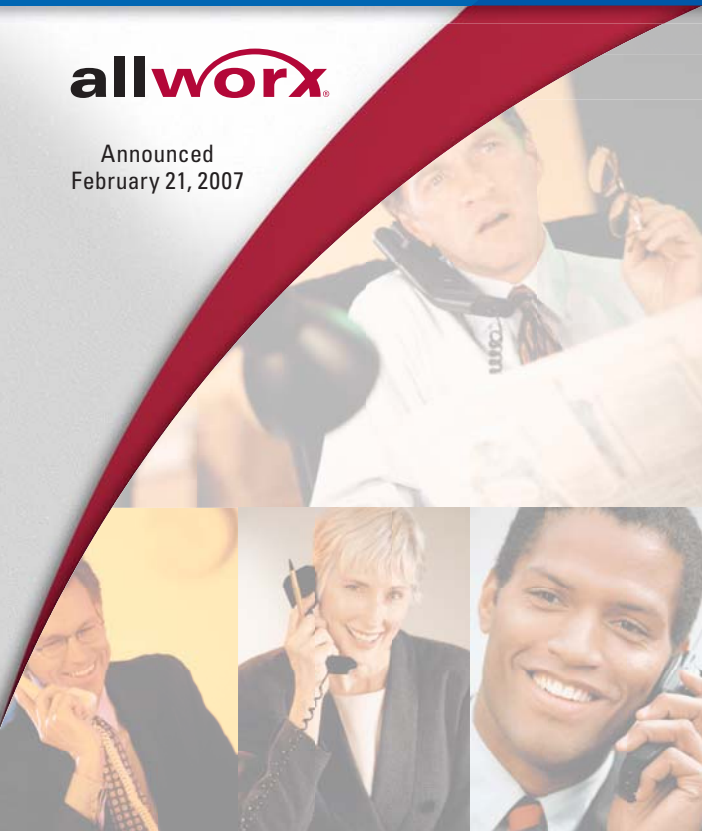

- Dial direct from your desktop **NEW!**
- Additional transfer capabilities **NEW!**
- Expanded Views **NEW!**
- Easy-to-use graphical user interface
- Centralized call management
- "Drag & drop" capability for transferring calls
- Easy access to standard call functions
- Seamless integration with any Allworx phone
- Support for both VoIP and traditional CO phone lines
- Sold as an option.
