

WORKGROUP SERVER

Solutions

The *Workgroup Server Solutions* CD-ROM version 3.0 disc in this package contains exciting software that lets you explore the advantages of your Workgroup Server. The CD-ROM includes the following documents and applications:

- Fully functional applications from companies that provide innovative software for server administrators and network users. These applications enhance workgroup productivity and management.
- Information on Apple server, networking, and connectivity products.
- Information and demonstration software from other companies that can increase the effectiveness, performance, and versatility of your network and your Workgroup Server.

As you explore and use the contents of this CD-ROM, please remember these guidelines:

- The software was created by companies other than Apple. By installing an application, you are agreeing to adhere to any applicable software agreements.
- Be sure to read the information about each product before installing and using the software; follow the instructions carefully to ensure that you correctly install all necessary server and client software. Detailed documentation for each product is provided in electronic form, along with Adobe™ Acrobat Reader, which you need to install to view the documentation on-screen or to print it.
- Not all of the software included is intended for use on the server. Check the product documentation to determine which applications should be installed on a separate computer to avoid reducing the performance of your Workgroup Server.
- If you require the software to support additional clients, you can purchase additional client packages from the software manufacturer or distributor.

Important For assistance with specific application programs, please contact the software company directly. The phone number for each company is listed in the printed or on-screen information provided for each application. If you are outside the United States, local technical support may not be available. However you can still contact the company at its United States office by fax, E-mail, or telephone. Please contact the software manufacturer or distributor directly to inquire about supporting or acquiring additional products in your country.

You'll find the following products on the *Workgroup Server Solutions* CD-ROM version 3.0 disc:

- **4-Sight Fax** A LAN-based client/server system for sending and receiving faxes anywhere in the world and for forwarding or replying to faxes without having to print them.
- **Now Contact** A complete contact manager for individuals or workgroups that allows users to create, use, maintain, and share contact information quickly and easily.
- **Now Up-to-Date** A schedule-management solution that provides automatic group meeting scheduling, appointment reminders, automatic schedule synchronization, and professional printouts for popular paper sizes and organizer formats.
- **Skyline/Satellite** A set of applications that server administrators can use together to create a centralized system for analyzing network usage in real time or based on historical data.
- **Viper Instant-Access** A client/server tool that allows users on the network to search and review large volumes of information such as company directories, price lists, and so forth very quickly.
- **Virex** Mac OS virus-protection software that finds and eliminates viruses and Trojan horses and repairs infected files rapidly on your Workgroup Server.
