

# **BST Direct® Automatic Route Selection (ARS) System 75/G1**

## **PRODUCT OVERVIEW**

The biggest help you'll ever need!

It's time to implement the North American Numbering Plan. See the actual ARS screens as you work through the administration form. The extended help function details the default entries as well as all valid entries for each field.

Transform your basic MS-DOS personal computer into a multi-media training machine with this AudioDigital program. Attach the AudioDigital player to your personal computer and install the software. The sit back and watch the graphics and hear the instructor's voice - it's like having on-site instruction at your convenience.

## **WHAT YOU'LL LEARN**

*This AudioDigital system (audio cassette - PC software) training program includes:*

- Understanding the impact and implementing the changes necessary due to the new North American Numbering Plan
- Establishing unique dial plans - customized to the way you do business
- Administering ARS features
- Reviewing toll fraud and minimizing potential security violations

## **TARGET AUDIENCE**

- New and backup ARS administrators
- Existing system administrators who need information on the North American Numbering Plan

## **ADDITIONAL INFORMATION**

*Note: Prior knowledge of DEFINITY® G1/System 75 System Administration is required.*
