PhotoCapture Centre™

With the DCP-330C at your side, printing professional quality photos couldn't be easier. The combination of print, scan and copy functions make this machine the flexible and durable printing solution for your home or home office.

You can **print glossy photos** quickly and easily and a 2.0" colour LCD screen lets you view your photos before you print. Whether you're printing A4 documents or 4 x 6" photos, you don't have the inconvenience of changing paper, as the built-in photo paper tray stores up to 20 sheets of photo paper.

The **PhotoCapture Centre™** allows you to print directly from your camera's memory card or transfer files and images to your PC, without the need for a plug-in card

reader or specialist software. Alternatively, you can easily print your photos directly from your digital camera using the PictBridge interface.

The DCP-330C delivers crisp, clear **prints** every time - whether your printing professional black and white documents or vibrant colour images.

All the necessary **scanning** software is included, giving you access to a range of scanning features including scan to e-mail, OCR, image, file (including PDF) and card. You can also translate a scanned document or a webpage into a number of languages using the SYSTRAN® WebTranslator 5.0 software.

The flatbed design of the DCP-330C enables bound documents to be **copied** quickly without the need of a PC, just like a stand alone copier.

All Brother colour inkjet all-in-one products come complete with **individual colour ink cartridges** so colours can be replaced separately. Brother original LC1000 ink cartridges with fade resistant ink used with Brother BP61 glossy photo paper enables the DCP-330C to print with a smaller droplet size (1.5 picolitre). The result is a higher quality photo with better definition.
