- Direct photo printing via camera using PictBridge or via media cards
- Four individual ink cartridges with fade resistant ink
- Easy to use control panel with 2.5" colour LCD display

DCP-750CW

Whether printing for business or for pleasure, the DCP-750CW is the ideal all-in-one solution.

With wireless and wired network connectivity built-in, you can share the DCP-750CW across your group of users. Using the wireless interface you can be connected in any room in the home or office.

Fast **print** speeds deliver mono text documents quickly and efficiently, while complex colour presentations and graphics are printed with a high quality, professional finish and with the option to print borderless.

All the necessary **scanning** software is included giving you access to a range of scanning features including scan to e-mail, OCR, image, file (including PDF) or media card. You can also translate a scanned document or a webpage into a number of

languages using the SYSTRAN® WebTranslator 5.0 software.

You can produce crisp colour **copies** without using a PC, giving you all the functionality and convenience of a standalone copier at your desk.

The flatbed design means that copying single sheets, or thick bound documents, is performed with absolute ease.

The DCP-750CW's PhotoCapture Centre™ is compatible with the most popular media

cards so you can print **glossy photos** directly from your media card or PC. You can save and retrieve documents via your media card to and from any connected PC. Or, if you prefer, you can print your photos directly from your camera by using the PictBridge interface, enabling easy direct photo printing without the need for a PC. The 2.5" colour LCD display lets you view your photos before you print and a built-in photo paper tray holds up to 20 sheets of 4 x 6" photo paper enabling you to switch

easily between paper formats with minimal disruption.

All Brother colour inkjet all-in-one products come complete with **four individual colour ink cartridges** so colours can be replaced separately and easily. Brother original LC1000 ink cartridges with fade resistant ink used with Brother BP61 glossy paper enables the DCP-750CW to print with a smaller droplet size (1.5 picolitre). The result is a higher quality photo with better definition.
