Plain Paper Fax and
Digital Answering Machine
in one space-saving unit

Plain paper fax and digital answering machine in one space-saving unit

Not only an outstanding plain paper fax with a fixed cost per copy, but also a superb digital answering machine with up to 30 minutes recording time and no messy tapes, the FAX-1030 Plus is the feature-rich, affordable fax for either home or office.

Plain Paper Fax

Output from the FAX-1030 Plus doesn't fade, is easy to file and can be re-faxed – saving you time and money.

High Speed Transmission

By using the FAX-1030 Plus's high speed 14,400 bps modem, fax pages can be transmitted in as little as 9 seconds.

Memory Secure Mode

Using a user-defined PIN number, the FAX-1030 Plus's security facility ensures confidentiality by allowing the fax machine to be locked, preventing unauthorised use or access to confidential documents whilst the machine is unattended.

Fixed cost per copy

All incoming faxes have the same cost per copy – making your running costs controllable.

Digital Answering Machine

No messy tapes, just instant access for up to 30 minutes of messages.

20 sheet Document Feeder

Saves time by allowing you to stack a multiple page document for transmission.

50 Page Memory[†]

Receives faxes when paper has run out so you don't miss important communications. Also allows you to send one document to multiple destinations.

Hands free Speakerphone

Allows you to conduct a phone conversation without having to lift the handset.

Transmission report on request

Now you can save paper and consumables by requesting transmission reports only when you really need them.

Optional PC Interface (MFL Unimessage PRO)

Links to a PC to give printing, scanning, PC faxing and OCR (Optical Character Recognition) which allows you to edit scanned text – greatly enhancing the capability of the FAX-1030 Plus.
