As all genuine Brother consumables are designed as part of an entire printing system and tested to ensure optimum performance and component protection

Brother Plain Paper - BP-60PA

Black ink cartridge - LC-57BK

For quick, easy-to-use faxing and copying, the FAX-1360 is the perfect machine to have at your side. It is designed to save you time by making small office tasks easier, quicker and more convenient.

Its **mono fax** capability guarantees cost effective communication with low running costs due to the single black ink cartridge.

Faxing is quick and simple with **100 speed dials** for instant access to your most regularly dialled contacts and a 250 page memory that stores incoming faxes should you run out of paper, reducing the risk of losing important information.

The **integrated handset** allows you to make calls as you would with any standard telephone, saving you precious desk space.

Using the **fax forwarding** feature allows you to forward any faxes you receive to another machine, great for when you are away from the office for a length of time. The dual access feature lets you scan a document ready for sending whilst you're receiving an incoming fax, another time saving feature from Brother.

The FAX-1360 is also a convenient **mono copier**, which means you won't need a separate machine - another space saver from Brother. It's got all the enlarge and reduce functions that you'd expect from a standalone copier, can make up to 99 multi-copies and is fast and efficient, thanks to a 18 page per minute copy speed.

For crisp, clear fax outputs and copies, always use Brother original LC-57Bk black ink cartridge. This ink has been specially formulated to work in harmony with your machine.

^ at 75 gsm paper, ** ITU-T Test Chart No 1
