Subject: KX-TD1232/TA1232 Call Park Recall Clarification

Document Number: KXTD1232018

In the Call Park Features' condition section of the KX-TD1232 and KX-TA1232 User Manual, It reads "If a parked call is an outside call, it is possible to select whether "Call Park Recall" will go to the initiating extension or to Operator1 by System Programming."

This is incorrect!!

The option of "select whether Call Park Recall will go to the initiating extension or to Operator1 applies only to TRANSFER RECALL and NOT to CALL PARK. Call Park Recall ALWAYS goes back to the original extension.
