Subject: TVS300 Mailbox Unlimited Message Length

Document Number: KTVS3000001

Unlimited Message Length In mailbox class of service permits a mailbox to record two-way conversations of unlimited length into one's mailbox (Two-Way Record) or another person's mailbox (Two- Way Transfer). The maximum recording time for other messages is automatically set to six minutes. This feature is activated via class of service, by assigning "0:Unlimited" in the (Class of service) setting.

Note:

The Unlimited message length is limited to 2-Way Record and Two- Way Transfer. A regular Mailbox message length is still at maximum of 6 minutes.
