Subject: KX-TDA100/200 Ver2.0 Upgrade Instructions

Document Number: KXTDA100007

Instructions for downloading and installing KX-TDA100 /200 version 2.0 upgrade files

***To successfully complete this procedure, you will need a blank SD Card and a SD Card Reader connected to your PC or Laptop ***

1- Double click the "KX-TDA100-200 SD files. Run the file to unzip" link.

2 - From the "WinZip Self-extractor" window click on the BROWSE button under the "UnZip to Folder" area

3 - Select the drive that contains your SD Card Reader as the destination and click OK

4 - Next click UnZip

5 - The next screen you see should read '26 files unzipped successfully '

6 - Click OK

7 - Click CLOSE

Installing the SD card in the TDA

8 - Remove the SD card from the SD Card Reader

9 - Install in TDA100 /200

10 - Initialize TDA system

Note;
The instructions above are the quickest, easiest method to download the file and upgrade the TDA system. If you would like to copy and store the file for later use, feel free to use any alternative method you may be familiar with.
