PB4210QSG

STEP 1 Base Station Setup

At the Base Station:

- 1 Insert small plug on cord into phone jack. Place cord in base cable channel. Insert power supply unit into wall outlet.
- 2 Insert plug on telephone cord into telephone jack on base unit (clicks into place). Place cord in cable channel on bottom of base. Insert other end of plug into telephone jack on wall.

Bottom view of base

IMPORTANT: For best reception, place the base in a high central location, away from other electrical devices. The installation of the base unit should allow at least 8-inches between the base and persons to be in compliance with FCC RF exposure guidelines.

STEP 2 Handset Setup / Registration

At the Handset:

- **1** Remove protective plastic film from display.
- **2** Insert batteries as shown.

3 Place battery cover on back of handset and push gently upward until it clicks into place.

For auto registration to base, press and hold the END key to turn handset off and place in base station with display facing out for 1 minute.

IMPORTANT: Charge batteries 12 to 14 hours before using the handset for the first time.

STEP 3 Area Codes

If you subscribe to Caller ID from your local telphone company, complete the steps below. If you do not subscribe to Caller ID, skip this section.

To call back from the Call Log, you must enter and store the Local Area Code for the area where your phone is installed. If your phone is installed in an area with multiple area codes, you will also have to enter and store the Extra Codes for that area.

STORING LOCAL AREA CODE

- 1 Open the Menu.
- 2 Scroll to "Base Settings" and press OK.
- 3 Scroll to "Area Codes" and press OK.
- 4 Scroll to "Local Area Code" and press OK.
- **5** Enter your area code and press OK.

STORING EXTRA AREA CODES

- 1 Open the Menu.
- **2** Scroll to "Base Sett" and press OK.
- 3 Scroll to "Area Codes" and press OK.
- 4 Scroll to "Extra Codes" and press OK.
- **5** To enter an extra area code, press Menu.
- **6** Enter an extra area code and press OK.

Repeat steps 5 and 6 above to enter additional area codes.

BASIC PHONE OPERATION

Making a Call

- 1 Dial desired number.
- **2** Press (a) or (4) speakerphone key.
- 3 Press or place handset in base (or charger) to hang up.

See Gigaset 4210 or 4215 User Manual for voice dialing instructions.

Answering Call Press (TALK) or (14) speakerphone key.

Intercom Call

- 1 Lift handset and select the handset's intercom number and press (ALK).

 2 Or, press the handset number, such as (ALK).

 3 Or, select "Intercom Call" and press (ALK).

 4 Or, select (ALK), (X) to call all handsets.

Setting Volume

- 1 Open the Menu ().
 2 Scroll to "Sound Settings" () and press OK.
- **3** Select "Handset Volume" and press OK. You will hear the current volume of the speakerphone and its level is displayed. Scroll to the desired volume and press "Save." You will hear and see in the display the confirmation of the change.
- 4 To set earpiece volume, scroll down (A), select desired earpiece volume (A), and press "Save".

- Language Setting 1 Open the Menu ().
 2 Scroll to "H/Set Settings" () and press OK.
 - **3** Scroll to "Language" and press OK.
 - **4** Select the desired language and press OK. A check mark appears next to the selected language.

Paging Handset

Press the page button on the base bottom.

DIRECTORY AND MEMORY DIALING

The handset Directory will store up to 200 telephone numbers.

STORING DIRECTORY ENTRIES

- 1 Open the Directory by pressing the Navi key on bottom (2).
- 2 Scroll to "New Entry" and press OK.
- **3** Enter the telephone number and press OK.
- 4 Scroll and enter the name and press OK.
- **5** Press Menu
- **6** Save entry by pressing OK.

DIALING FROM DIRECTORY

- 1 Open the Directory by pressing the Navi key on bottom
- 2 Enter the first letter of the name as entered (for example, press 3 or 2 x for E, Eric).
- **3** Press the Talk valve or Speakerphone valve key and the number is dialed.

The Memory dial list will store up to 9 telephone numbers. It is recommended that the "1" key be used for the answering machine or telephone company voice mail access.

STORING MEMORY ENTRIES

- 1 Press the Memory key.
- **2** Scroll to "New Entry" and press OK.
- **3** Enter the telephone number and press OK.

- 4 Using handset keypad, select a quick access key. Press the desired key (2-9) and then enter the name (for example, to use quick access key "3" for "Eric" press 3 × for "3", press 2 × for "E," press 3 × for "R," press 4 × for "I," press 2 × for "C").
- **5** Press OK.
- 6 Press Menu
- **7** Save entry by pressing OK.

DIALING FROM MEMORY

- Press and hold the quick access key.
- **2** Press the Talk var or Speakerphone 🖼 key and the number is dialed.

Customer Care: 1-888-777-0211 or visit our Website: www.icm.siemens.com Visite nuestro sitio Web para obtener instrucciones en español.

VOICE-OPERATED CONTROLS

Siemen's GigaVoice™ voice-operated controls for the 4200 series allow users to place calls or hear who's calling. The system recognizes up to 20 names and numbers from the directory and up to four users may record the same name or number. Subscription to Caller ID from your local telephone company is required.

RECORDING A VOICE-DIAL ENTRY

- 1 Open the Directory by pressing the Navi key on bottom.
- **2** Press **Speech**.
- **3** Select user 1-4 and press OK.
- 4 Scroll to "New Entry" and press OK.
- **5** Enter the telephone number.
- **6** Scroll to the name field and enter the name.
- 7 Press Record.
- **8** Press **Begin** to start recording and speak the name of the desired entry (for example "Anne") to record a voice pattern.
- **9** Repeat the name (for example "Anne").
- **10** Press Save.

DIALING WITH YOUR VOICE

3 When the voice pattern is recognized, the name is played back from the handset and the number is dialed.

VOICE-ANNOUNCED CALLER ID

If the Caller ID telephone number transmitted for an incoming call corresponds to a voice-dial entry, the voice pattern is played back on the loudspeakers of the handset or base station.

- **1** To turn on the Voice-Announced Caller ID feature, press Menu.
- **2** Scroll to "Base Settings" and press OK.
- **3** Scroll to "Spec. Functions" and press OK.
- **4** Scroll to "Caller ID" and press OK (checkmark indicates feature is on).
