Gigaset 8800 Quick Start Guide

This guide will help you get started using your Gigaset handset. For additional information related to your Gigaset 8825 system, please refer to the User Manual.

Connecting the Charger

A charger is included with handsets. This charger does not require connection to a telephone line for operation. Use only the power supply (110 VAC/60 Hz with cord) included with the charger. (Do not use other power supplies.)

Before using your charger, follow these steps:

- 1 Insert small plug on cord into back of charger.

- 2 Turn small plug to the left and place cord in cable channel on bottom of charger.

May be wall mounted using two small screws (not provided)

- 3 Insert power supply into wall outlet.

Bottom of Charger

IMPORTANT: Do not use a wall outlet controlled by a wall switch.

Gigaset 8800 Handset

The Gigaset 8800 handset is used exclusively on the Gigaset 8825 system. Up to a total of eight handsets may be added.

Handset Setup

Before using your handset, follow these steps:

- 2** Insert batteries as shown.

- 3** Place cover on back of handset and push gently upward until it clicks into place.

- 1** Remove protective plastic film from display.

- 4** Place handset in charger with display facing out.

IMPORTANT: Charge batteries 12 to 14 hours before using the handset for the first time. WARNING: Use only NiCd or NiMh "AA" rechargeable batteries. DO NOT USE ALKALINE, LITHIUM, OR NON-RECHARGEABLE BATTERIES.

Cordless Handset Registration

The cordless handset that comes with the system is preregistered to the base station. Additional cordless handsets need to be registered to the base station.

- 1** If the handset is not already on, press PWR key in the lower right corner of handset.
- 2** When "**Please Register**" is displayed, press OK.
- 3** Enter System PIN and press OK (default is 0000).
- 4** At base station, press MENU.
- 5** Scroll to "**System Settings**" by pressing >FWD key and then press SELECT.
- 6** Enter System PIN and press SELECT (default is 0000).
- 7** Scroll to "**Mobile Registration**" by pressing >FWD key and then press SELECT.
- 8** When "**Select Intercom Number**" is displayed on handset, scroll to number you want to assign, and press OK.
- 9** When completed, you will hear a confirmation beep.

 - 3 Scroll to "LOCAL SETTINGS" and press OK.
 - 4 Scroll to "LANGUAGE" and press OK.
 - 5 Select the desired language and press OK. A check mark appears next to the selected language.

FCC Information

This telephone system equipment has been tested and found to comply with the limits for Class B digital device, pursuant to Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. Some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the system base should NOT be placed near or on top of a TV or VCR; and, if interference is experienced, moving the base farther away from the TV or VCR will often reduce or eliminate the interference.

However, there is no guarantee that interference will not occur in a particular installation. If this telephone system does cause harmful interference to radio or television reception, which can be determined by turning the system off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Increase the separation between the base station and receiver;
- (2) Connect the base station to an outlet on a circuit different from that to which the receiver is connected;
- (3) Consult the dealer or an experienced radio TV technician for help.

Notice to Hearing Aid Wearers: This phone system is compatible with inductively coupled hearing aids.

Power Outage: In the event of a power outage, your cordless telephone will not operate. The cordless telephone requires electricity for operation. You should have a telephone that does not require electricity available for use during power outages.

Safety Precautions: Before using your telephone equipment, basic safety instructions should always be followed to reduce the risk of fire, electric shock, and injury to persons. Contains Nickel-Metal Hydride Batteries. Battery must be recycled or disposed of properly. Do not dispose in municipal waste. Only use type AA Nickel-Cadmium (NiCd) or type AA Nickel-Metal Hydride (NiMH) rechargeable batteries in the cordless handset. Do not use Alkaline or lithium batteries in the cordless handset or charger. Do not mix old and new batteries. Use the same rechargeable battery type. Do not combine rechargeable battery types. Exercise care in handling batteries in order not to short the batteries with conducting materials such as rings, bracelets, and keys. The batteries or conduction materials may overheat and cause burns or fire. Do not dispose batteries in fire. For additional instructions, see the user's manual included with your Gigaset 8825 system.

The installation of the base unit should allow at least 8-inches between the base and persons to be in compliance with FCC RF exposure guidelines.

Warranty: The product warranty is contained in the user's manual. Please refer to the manual for complete product warranty details.
