# Drill Template **For wall-mounting TalkSwitch**

To hang TalkSwitch on a wall, drill these two holes.

Mounting multiple units? It is recommended that you arrange them in a horizontal row to provide better ventilation

Required Materials

Drill Bit: Size is determined by the anchors or screws. See the directions that came with your fasteners.

x2 **Anchors:** Needed for mounting on drywall, plasterboard or gyprock.

x2 **Screws:** Wood screws or screws appropriate for anchors.

4 Insert anchor (drywall, plasterboard or gyprock).

5 Insert screws. Leave the screws sticking out by about $\frac{1}{8}$".

6 Place TalkSwitch key holes over the protruding screws and slide down into position (TalkSwitch can be placed in either position shown).

Instructions

1 Tape template to wall in the desired orientation.

2 Mark position of drill holes on wall.

3 Drill pilot holes.
