## Announcing the Digital 10-button Speakerphone

We are very pleased to announce an exciting new enhancement to the Toshiba 2000-series digital telephone product line. The Digital 10-button Speakerphone (DKT2010-S) replaces the Digital 10-button Handsfree Telephone (DKT2010-H), at the same price.

This new telephone provides more functionality and greater value. It makes the entire 2000-series digital telephone product line consist of speakerphones, except the single line model.

### Description

The DKT2010-S is the same as the DKT2010-H, except for the speakerphone operation. The DKT2010-S has full two-way operation on outside, as well as inside calls, as compared to the DKT2010-H which only has handsfree answerback operation on internal calls. All other aspects of appearance, color choice (charcoal gray and ash white), and functionality are the same.

**Note** The DKT2010-S speakerphone operation can be downgraded to handsfree operation equivalent to the DKT2010-H on individual telephones through Strata system programming.

### Product Line Strategy

The Toshiba 2000-series digital telephone product line now consists of the following models:

- |                   |                                                                                                                                                                                                                                             |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>DKT2001</b>    | Single line digital telephone with one-way voice announce speaker (no handsfree answerback).                                                                                                                                                |
| <b>DKT2010-S</b>  | 10-button digital telephone with full speakerphone for 2-way handsfree conversation on both internal and outside line calls.                                                                                                                |
| <b>DKT2020-S</b>  | 20-button digital telephone with full speakerphone for 2-way handsfree conversation on both internal and outside line calls.                                                                                                                |
| <b>DKT2010-SD</b> | 10-button digital telephone with full speakerphone for 2-way handsfree conversation on both internal and outside line calls, a 2-line x 16-character Liquid Crystal Display (LCD), and three soft keys for LCD feature prompting operation. |

- DKT2020-SD** 20-button digital telephone with full speakerphone for 2-way handsfree conversation on both internal and outside line calls, a 2-line x 16-character LCD, and 3 soft keys for LCD feature prompting operation.
- DADM2020** Add-on Module with 20 buttons that can be programmed for outside line access, System or Personal Speed Dial, or Direct Station Selection/BLF Indication.
- DDSS2060** Direct Station Selection (DSS) Console with 60 buttons that can be programmed for outside line access, System or Personal Speed Dial, Direct Station Selection/BLF Indication, and several other features.

And, don't forget the Toshiba Cordless Digital Telephone, PC Digital Telephone, PC Attendant Console, Door Phone Monitor Station, and the Strata AirLink™ Wireless Telephone System. This robust product line offers the most comprehensive telephone answering solutions available.

## Documentation

All existing Strata DK documentation will be updated to include the new DKT2010-S speakerphone.

- ♦ The current *Digital Telephone User Guide* is unaffected by this model change and continues to work for all models.
- ♦ The *Digital Telephones & Consoles* brochure is being updated and will include the DKT2010-S speakerphone in its next printing.
- ♦ The *Strata DK General Description* is being updated and will include the DKT2010-S speakerphone in its next printing.
- ♦ The *Strata DK Feature Manual* is also being updated to include the DKT2010-S speakerphone.

## Availability

The charcoal gray DKT2010-S replaces the DKT2010-H effective immediately. Some existing unfilled orders for DKT2010-H telephones may be filled with DKT2010-S telephones. Future charcoal gray orders should reflect this product change.

The ash white DKT2010-S(W) will replace the DKT2010-H(W) in March 1999. Until that time, future ash white orders should continue to be placed for the DKT2010-H(W).
