DIP Switch Settings for V.4 DKT2000-series Telephones

This bulletin provides documentation of country of use DIP switch settings for the DKT2000 V.4 series telephones. The version V.4 Strata DK digital telephones have DIP switches that enable use for the international market.

The DIP switches are located underneath the flexible button key strip on the DKT2000 V.4 series 10- and 20-button telephones (see figure below).

Toshiba America Information Systems, Inc.

Telecommunication Systems Division
9740 Irvine Blvd., Irvine, CA 92618-1697 (949) 583-3700
<http://telecom.toshiba.com>

On the DKT2001, the DIP switch is located in the underside of the base (see figure below).

The following table shows the correct country settings for the DKT2010-S, DKT2020-S, DKT2010-SD, DKT2020-SD, DKT2001 V.4 telephones.

Note The default DIP switch settings are preset for the USA and Canada. Before installing, verify that the DIP switches are set for the proper country. **Possible problems from improper settings include low volume, extremely high volume, and static sounding audio.**

Country	Position of each Dip Switch				DIP Switch Position
	1	2	3	4	
USA Canada (Default Setting)	ON	ON	ON	ON	
Mexico	ON	ON	ON	OFF	
Taiwan	OFF	ON	ON	ON	
Hong Kong Thailand*	ON	OFF	ON	ON	
Singapore Malaysia Indonesia Sri Lanka India China	OFF	OFF	ON	OFF	

* The DKT2000 V.4 is not applicable for Hong Kong and Thailand. Use the V.4A or later versions in these two countries.
