A. Bolsey Case—Handsome, everready carrying case, made of durable, satin-glossy cowhide, saddlestitched for long wear; provides perfect protection. Measuring tape on back of carrying strap. \$7.25 Model C case \$9.50

B. Bolsey Filter Kit — Genuine leather Filter Kit snaps on carrying case strap. Handy filter factors printed inside flap. Kit contains four Series V optically and color-correct filters. Yellow, Red (for black and white), Haze, and Type A (for color film).

C. Bolsey Filter Adapter—Holds above filters and Bolsey Sunshade. Gleaming satin finish. Fits in kit. \$1.00

D. Bolsey Sunshade—Used with adapter. Does not vignette or interfere with viewfinder. Satin finish. Fits in kit. \$1.75

E. Bolsey Cable Release—Flexible, all-steel construction. Positive action assures uniform shutter and flash action. \$1.25

Ask your Bolsey dealer about Bolsey accessories, Bolsey B Special 35 mm Camera, Bolsey Cine-Fader and the new Bolsey Visual Education Unit (Portable Microfilmer).

Three Tips on Better Home Flash Photography

1. Shoot at 1/50 of a second for normal indoor flash photography.

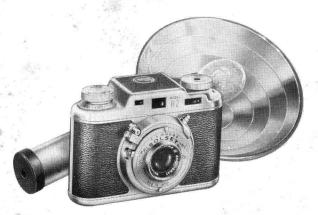

2. Use midget bulbs SF, SM, or #5 on subjects up to twenty feet away.

3. Use "Film Factor" to determine the stop by dividing the factor by number of feet from camera to subject. For example: For Kodachrome Type A (indoor), the factor is 50. The distance to the object is ten feet. Fifty divided by ten is five. Use stop closest to the answer. In this case, stop 5.6 is closest to five.

For factors on other film, check film speed table enclosed in the film package.

INSTRUCTIONS FOR

BOLSEY FLASHGUN # 3

Designed expressly for
BOLSEY MODELS B-2 AND C
35mm Cameras

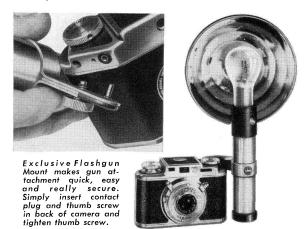

BOLSEY CORP. OF AMERICA . 118 EAST 25 STREET, NEW YORK 10, N. Y.

How to Use Your Bolsey Flashgun WARNING! Avoid premature flash!

Do not insert bulb until gun is securely attached to camera. MAKE CERTAIN THAT SHUTTER SPEED INDICATOR IS NOT ON "T" POSITION.

- Insert Batteries—Unscrew black cap at base of battery case and insert two fresh Type C dry cell batteries, with contact tips facing upwards. Replace cap. Screw tightly.
- Attach Flashgun to Camera—Place contact plug and screw of gun bracket into corresponding holes at back of camera. Tighten screw firmly and gun is securely attached.
- Adjust Reflector Height

 —After inserting bulb, loosen thumb screw at back of gun. Raise or lower reflector so that bulb is centered. Then tighten thumb screw.
- Insert Midget Bulb Adapter—This adapter is placed in bulb socket when midget bulbs are to be used.

It's Easy to Take Good Flash Pictures

 The synchro-shutter of your Bolsey B-2 is synchronized for accuracy at all speeds. Use any 5 or 20 millisecond delay flashbulb up to 1/50 second. For speeds higher than 1/50, use SM or SF midget bulbs only. See exposure instructions below and those supplied by flashbulb manufacturers.

Note: Exposure time is determined by flash rather than by shutter speed. For example, if midget SF bulb is used with 1/50 speed, the exposure will be of 1/200, which is the bulb's flash time. No need, therefore, of using higher shutter speed.

- 2. Make sure the shutter is NOT open, and not on T position, before inserting bulb. Otherwise, bulb will flash prematurely.
- After inserting bulb, re-check settings: 1—Focus; 2—Diaphragm; 3— Speed.
- If your camera has been lying idle for a long period, operate the shutter a few times before using.
- Have your Filter Kit with you. It comes in handy when indoor color film is to be used outdoors or when special-effect shots in black and white are wanted.

Features You've Always Wanted

Bolsey Flashgun #2 is designed for use with camera case on or off.

New Type Mount eliminates extra bracket. Attachment is quick and positive. No visible external or loose wiring.

Positive Flash from very careful wiring system and two standard C dry cell batteries.

Extension socket on top of gun is for extension cord for additional lighting.

Midget Adapter permits use of any midget base bulb.

Sturdy, all-metal construction. Attractive satin finish. Weighs only 5 oz.
