

Series CLR Voice Alarm

Description:

The Series CLR Voice Alarm sets the standard for speech quality audibles. The Series CLR can be used in many applications where normal tone alarms are simply unable to convey sufficient information. The simplicity of these single message units allows them to operate in multiples on regular alarm circuits without the need for separate synchronizing units.

Standard Message: Attention. Attention. This signal has been activated. Take appropriate action.

Nominal Voltage:	24VDC
Current Consumption (tone dependant):	20mA
Sound Output (tone dependant):	102dB
Alarm Tones:	1
IP Rating:	IP65
Color:	Off White
Messages per sounder:	1

Features:

- Alarm tone and voice message
- 102dB(A) Output
- 20mA @ 24VDC
- Synchronized voice messages
- Volume control
- Standard message library (other messages available on request)
