

Are you responsible for counter terrorist measures to secure military facilities or government buildings?

If so please be advised that a major effort is underway to protect US Troops at home and abroad from domestic and international terrorism. Design goals and security concepts have been implemented in order to alert personnel of the following emergency situations:

- Bomb Threat
- Terrorist Attack
- Security Breach
- Chemical Release
- Natural Disaster Warnings: Tornado, Flood Watch, Earthquake Alert, etc.

Counter measures have been developed as a solution to minimize these threats. The Wheelock Personnel Alert System as shown below is an integrated emergency voice alert system that automatically notifies military or federal personnel in the event of the above emergencies. *This System has been customized and is in use at federal facilities worldwide.*

Features include:

- Compatible with existing public address systems
- Up to five pre-recorded messages field programmable in any language.
- Pre-recorded messages or tones activated by five independent latching push buttons.
- All call and reset switch.
- Supervised circuitry for maximum reliability.
- Self-amplified speaker integration for high security applications to ward off the threat of eavesdropping.

For a full system demonstration contact: Wheelock at 800-631-2148
