**Personal Introduction “Toast’ p.190**

**AND THE INTRODUCTION: (short) introduction p.199 – p.213**

## Climate and Energy Chapter

### climate and energy

### WILD LIST

### 2015/2016 mainly

We can handle climate change in nice ways, sure. But there is one thing I learned of the challenges what I did not answer yet here what is we also have to take the toxic particles out of the sky. But I came across some existing solutions after preventing in theory from it all to get in the sky. These are not here, their sense should get recognized, not just for being sense but now also because 'Humanitarian' solutions might be financially peanut to become reality.

I personally wish also some things of here become products/companies/licenses for charity.

This chapter its pieces are not dated, I gradually made them over a couple years of thinking.

Let's see what I invented us in this chapter.

**QUEST & TECH LEADS FOR ELECTRICAL, 100% FUMES  
NEUTRALISING GEARS FOR VEHICLES.**

**TO NEUTRALIZE/DESTROY THE FUMES WITHIN THE OIL BASED  
VEHICLES.**

The technical part and much more nature.

Inventing.

It means cheap and quality and above all quiet easy to invent. This way we don't see the urgent challenge as something capitalistic neither something what needs decades, yet worthwhile doing profitably in the licensed free market.

Good thinking makes the path to Humanitarian common sense quite easy here on.

Tech leads I eventually made on my idea for 100% fumes neutralizing electrical filters:

Neutralizing/destroying the fumes seems easy.

It is good to propel the fumes and gasses to or thru hard-acid grid(s). This acid lead to destroy the fumes and gasses into destructed/neutralized form. The hard-acid carriers are blown the dirt away off and re-enters the cycles as it rotates. The neutralized dirty collected like a “mini vacuum cleaner”. But I'm totally not sure. 😊

The whole neutralizer gets its fumes from the end of the exhaustion and is mounted beneath or behind the vehicle, for existing vehicles. Thus best rather flat and somehow well mountable.

It is not acid what can be such a license problematic, especially if the rights are shared to good companies what respect best care practice and licensing wise moralizing into reliability by proven theory of greater good. The following tech leads are a way what should help constructors and inventors and the business world and the politics to think well packed with sparkles on the fumes :), on, my career is making the public truly happy.

😊

For any electricity based filter invention of this draft:

- The solutions must not decrease the engines their horsepower.

- Motorcycle solutions to look fancy.
- Governments must globally license quality efficient durable solutions with outmost care and excluding the installation of pseudo functional products.

Good enough is a serious standard of factors to minimalize maintenance and maximize durable functionality. And easy quality installation, such as attaching solutions etc. shock proof etc. material choices made and what not accepted. Compromising on factors is not the greater good.

People could get a solution product simply given logically or by choosing one of the licensed and associated one's as options.

- And solutions best have minimal or no maintenance requirements. As you noticed already some thinking work for here.

Now my idea for a new way of driving motor force. But I do not know if vacuum is powerful enough to drive a vehicle and machines.

'VACUME DINAMO BI WAY CYLINDERING PNEUMATICS'. It is for

one or several vacuumed container(s) to suck cylinders, clicking from one on to the next cylinder(s) what make the cylinders move out forth and back, by passing onto maximum Vacuum proportions inward. Who knows what this one means to pneumatics and as competitor amongst energies. The cylinders move both ways productively. Perhaps not for motor driving force but for electricity generating for electricity.

Inspired yet?

**AND WHAT IS THE EFFECT OF 1<sup>st</sup> and 4<sup>th</sup> WORLD UNPOLUTING OIL BASED CARS?**

**FORREST PROSPERITY:**

Now listen to this, the forests in possession of the deforesting companies, well they could get significantly more money paid for the forests than the wood is them worth. GHLFMM Fund and Bank\*(Chapter) could pay this. Well, it is in numbers able to buy the forests back for even double the wood is the deforestation companies' worth. You'll see.

The wood market to be replaced by a new abundant material I hope is a Fluid Fungus innovation. Fungus is already used for industrial packaging, it grows fast and when dried it becomes very hard and is very light. Well I hope fluid Fungus could provide us to fill forms fully. And so we could construct with it. It might be much cheaper than wood and provide a construction market boost and demand.

And fungi frontier could able us to grow large walls against expending deserts, cheap. And your thoughts.

Fan's Tech Lead

Industrial pollution is easy to resolve with this lead.

It is a lead I also hold since years now, for a fan can blow fumes in a direction, so it is actually collectable in a very easy way. How difficult can it be to destroy/neutralize the fumes and gasses, so.? Furthermore a sort of fumes neutralizing "drying machine"...

## FORREST FIRES

I have a lead;: It is to stop fire with air. Fire loves air, well, to perhaps blow air on it what it sucks but what in the same time ends its fire. Modified air add to.

And consider the following in your wildest humanitarian day dreams;:

**QUEST:; CAN WE DEVELOP SANE SOLUTION TO ADD TO THE DIET OR SOMETHING TO IMPLANT FOR LIFE STOCKS TO MINIMALIZE OR NEUTRALISE THEIR GASSES?**

Gasses containment to carry it out neutralized. Well, now some year later a Dutch company has invented a supplement for life stock. They said it minimizes gasses with 30%, increases growth and increases milk production.

So I seem a bit connected.

Now to limit traffic jams by here needs trucks driving by night but it doesn't happen yet. Also, for development countries in need for railroad infrastructure to be increased, to build a business one next to a social one. I suggest to work with a logistic army in some tracks.

**IN 2014 I WROTE:**

**SEA STREAMS POSSIBLE ELECTRICITY SOURCE?**

I now a year later read on a news website about a way to use sea levels to generate 150 thousand families with electricity for 150 years. Way to go. They also say the system exists already many decades. And there are several other developed solutions by now. Imagine the force of the sea's., combined with anti-tsunami I explain myself about, later during this book.

**NUCLEAR WASTE NEUTRALIZEMENT I WISH FOR:**

Nuclear waste to be mingled with still hard as metal to stop it from being molecularly active? To still it.

I really hope this makes sense one day.

**THE PURPOSE OF LIFE IS PROTECTING EARTH FROM ANYTHING FROM SPACE, AND I THINK I KNOW WITH THE LEAD, WE CAN:**

I hope some proof I do belong to my righteous future where more than this surreal ordinary situation and environment I work from, especially the solo part is harsh. No assistant, not yet management, and only myself to talk to about what sometimes really needs a good talk :( I could do so much more.) Anyways, I bet Higgs parts innovations of the future could allow us to make anything go thru a Higgs shield, no matter what is approaching. Well, to surround the space at Earth with it and perhaps even to copy/have the weather as we know within. Sci-fi, I want us to focus on capturing and research the Higgs part. And a lead: Higgs to let thru by being visual anywhere visual but going –teleporting. I laid ones on my bed resting on peptides days series and suddenly saw or hallucinated a green Higgs part size light floating gently for about 50cm far and about 40cm above my bed next to me, well, it is since this experience I started gradually instinctively and gradually more aware of Higgs potential I came to Earth protection major lead quest, but I also sensed it had a coexistential realistic humanitarian consciousness about how rare and self-protected Higgs know they are, somehow.. **SO TO MINE AND SURELY YOURS TOO IS A TOP PRIORITY FOR US TO BY ALL EFFECTIVE MEANS TO FORCE CERN COLIDER AND CERN COLIDING AND ANY ACTIVITIES THEY**

**DO THEIR TO BECOME ILLEGAL AND IMIDIATLY STOP COMPLETELY WITH COLIDING AND FURTHER MORE ANY OPEN INNOVATION UNTOPSECRETESECURE COLLIDING OPEN INNOVATION FREE WORLD PURSUES AND LAYING THEIR HANDS ON A HIGGS AND ITS OBVIOUS INSTANTLY**

QUIETE SURE END OF LIFE AND HUMANITY AS WE KNOW IT  
 CAUSE IT DOES THINGS WE CANNOT TRUST ANY OUTSIDE OF  
 DREAMTEAM ALIKE CONCERN TO TYPICAL NOT TRUST  
 WORTHY AND NOT SAFE FOR JOHN DOE AND THE BITCH  
 HIGGS NEXT TO IT TO GET SUCH POWER REALITY BENDING  
 INCREDIBLE FORCEFUL

RAW QUALITIES/EFFECTS AFFECTS OF THE HIGGS PART.

IN NO WAY I TOLLERATE WE TAKE MORE THAN SEVERAL  
 MONTHS TO REACH SPECIAL OPS MILITARY INTERVENTION  
 AND DELETION OF WHAT THE CERNS WERE ONTO AND HAD  
 GOING ON AND PLANNED ETC..

I WANT IT STOPPED DISMANTLED UNBRIEFED AND HIGHEST  
 PROTOLS OF REVERSING ALL DANGEROUS KNOWLEDGE  
 ETCanyways I realized that bed moment Higgs are probably functionally  
 only significantly useful to life on Earth in large vast compact filling  
 proportions that seems only obtainable by attraction or creation, what I  
 now today 27/09/2016 think potentials of gasses conditions factors what  
 simply are perfectly, full of Higgs and so form a material physics  
 functional industrial teleportation mastering life and Earth wishes for  
 eternal universal survival rather than the absence of this mastering as in to  
 be wiped away by Nova stars explosions etc. some quite not and just not  
 eternal future with never an exploding sun and nova stars wipe out.  
 Attract, and also yes, to keep attempting the chances of materialized  
 captured/fixated that so close Higgs by the colliding method. Each's own

Higgs part theoretic knowledge and presumptions and experiences, I, I thus consider Higgs as friends and dear beloved Humanitarian creatures with no reason of declaring this non-sense, and I also think Higgs are life's/will what only socialize with real existentially serious co-existentially challenged humans experiencing life and death and suffering and good life and security as people whom understand how critically suffering and harming must stop and is incomprehensible culture shock for 'real' people whom need and want to stop harm and whom their careers are in the humanitarian purpose of good-ness life by and for all life and Earth.

### DO CERTAIN METALS HAVE THE ESSENCE TO BE USED TO CREATE ELECTRICITY? Short tech reflection

When holding certain metal to sensitive teeth it feels so vibrant and painful, as in powerful.

Well, I wondered yesterday if metal+fluid can be innovated with so metal actually is perhaps a great source of irritation by peanuts of it.

### FOR ELECTRIC CARS TO BE OBLIDGED TO RECHARCHE ON AN GREEN ENERGY (CONTRACT)

Simple, green energy. Here in Belgium I did a test online for what the cheapest was for my home energy, and guess what, green energy was the cheapest. ☺ You might as well.

## PREVENTION OF EARTHQUAKE DISASTERS –QUEST/LEAD

Earthquakes ground layer pressure lines to somehow be encircled precisely with a sort of large tunnel alike scale of dimming zone what stops Earthquakes to impact ground?

In any case, this Nobel quest with challenges yet rewarding aim to develop how to build/prevent Earthquakes to have wide shake result, rather how the Earthquakes are limited in effect by some sort of buffer solution?

Difficult and to theoretically attempt/engineer how this neutralisation aim can become reality on large International scale at material industrial cost as new expertise invention. Well, it makes it realistic and of efficient/effective fulfillment by knowing all and any best options and Humanitarian sense proportion and minimize financial costs is often also a good way to sensitize on cool.

Another thing I paste here on 04/09/2016: For all houses what under Earthquake brake lines to be reinforced somehow brilliantly possible as brilliantly cheap and brilliantly pike of exercise. To all be safe, 'then.

I ADD on 28/09/2017: For babies must be sitting and sleeping on Earthquake secure heights&anti wounding chairs and beds, innovate.

I add on 20/02/2018 We need to apply Human Radar Dotted gears and existing see thru systems in all earthquakes Crisis Management to find back any living and death and our way under the rumbles as fast as systems can now a days super fast thru thick and thin, about life and death and exact position'n'moving under any solid obstacle. It exists and is used, small apparatus what allow to fast see thru and spot life below Earthquake solid obstacles, it's just again the case most Earthquake disasters come with International press but not with the tools globally available for Earthquake crisis management. Atleast make the apparatus' what can help much more than human sensoring crisis Earthquake management can, to be gathered enough where there's need.

Most quake sit's don't apply See Thru solids & human radars-systems available.

I also have much doubt about the removing of rumble to get to relief whom spotted beneath.

I more or less always day dream heavy tools supposed to facilitate reach underneath, when I see one on the news, might as well call it almost total amateurism, Earthquake crisis techniques/field.

## FIRE FIGHTING BY MINGLING OXYGENE WITH SOME SOAP ALIKE

I double tell you my idea to stop fire with air, but mingled air what puts out just when fire fuses itself with air –not-with some soap alike efficient mingled –conditioned air.

Fire loves oxygen and air, well this is a chance to get in it to stop it.

## AND ABOUT NUCLEAR WEAPONS

I have thought a bit and after it seemed very complex I had no idea for how to actually undo all from their nuclear weapons and other mass destruction weapons, I suddenly realized an easy math sense. For a large objective nuclear representatives officials institution of the undo, all nations to for instance agree 100% weapons we can and together, per week, under serious watch and timed, all countries simultaneously to dismantle 100% as possible, the next week a(t)gain 100%, etc. The unexplosive nuclear substance After all are undone from them weapons special cross regional global detection innovations of any explosives materials known/inputted by the way.

For all our interests, let us expect the solution. And me, and my future team to pursue this quest relentlessly for our Global wellbeing relief everywhere, and there will be none. To close all nuclear stations and to just like my idea to perfect the Iran nuclear deal, to have just what needed for medical and scientific purposes but these operated by an objective Universal institution so the radioactive stuff are made on rational orders of specific applications and moralizingly Universally official provide each nation with what they need but impossibly more or too much nor the wrong stuff. And I add now few weeks later to finalize this piece by me to us here, I hereby launch the general scientific quests to find all required alternatives to radioactive applications to my sci-fi now sollutions of this document..

And there is some mag on hold how to license the warfare abilities of all hereby imaginable in danger reduced international armed balance and

status quo. In this book also the quest tip to try to make alternatives to any use of radioactive things, and that not needing it is sense talent.

## ANTI-TSUNAMI

I dream since some years about a grid-curtain alike structure what protect land from any Tsunami's. In longer extending structures can perhaps dim the largest waves fading into neutral.

12/09/2016

## PERHAPS A REVOLUTIONARY BIOGAS/ENERGY LEAD HARDROTTING

I thought proportionally very interested is that something rotting gives a lot of gas/smell but rots away quiet slowly just over days, right. Well, this piece is that I just thought what if a rotting chem.based material hard non-or almost non -decay composition what delivers a rotting alike gas as in smells and rots but what does not rots/smells away as to not decay but lasting effect of rotting but not rotting away but rotting in certain elements conditions.. If a hard chem based material can be invented what releases a rotting bio gas quite like wet clothing staying wet in the clothing starts to smell, well, if rotting on the outside on outdoor/4seazons/night day temperature and inner water factors I think if something can deliver bio gas closed circle durable release enough to use its imaginable bio gas to for instance non electricity source depending light bulbs quest in my book to actually use the existing technical system a gas for lighters is put in and it transforms the gas into electricity to recherché mobile phone on the go.... But then the light for the 3th world non grid areas can benefit light in the evenings nights and mornings without needing electricity source nor expensive situations really, what

can gas alike rotting smell cost to something what basically is in a conserved rotting state, where on lights and other electricity gear to be potentially provided by this.. Thus, the material has a rotting outline but instead of rotting away the quest material&condition is in a rotting state what but is simply always rotting without decay and without more or less rotting but like a non-transformative non evolving stable constant same rotting state.

I don't know but I got a good feeling about this.

## COMON SENSE GREEN ENERGY INFRASTRUCTURES FOR ALL COUNTRIES (AND ISLANDS)

The GHLFMM Chapter holds the potential new financial means what I apply few ideas at the end of the project Chapter. Well, it is potentially a very powerful exclusive financial 'Humanitarian' Bank what can make money and implemented if it does not create problems... Well, it seems perfectly harmless to me for the world for GHLFMM-Bank ones developed and working out to define best sense green energy decisions (it spends only as wise as possible) and finance it in its ultralicense/licensing and moralizing detail Bank culture. You'll understand when you have read the GHLFMM Chapter a bit below from here.

If you ask me, green energy for all countries, is a practical detail and I presume we can consider it done?

Enjoy!

Oh and Quest to just invent a cable what self-electric state. But safe as in if cut or so it cannot harm but yes indeed will give enough?

06/10/2016

QUEST: For science to start Researching and even developing a way what layer over the ice caps what guarantees all ice underneath stays frozen. It is far out but I am hopeful some sort of broadcast thru it or some sort of fluid what downward a strong Freezing Trans Ice someway what at least gets to the bottom as in thru the caps... we need some transthru-ice medium with effect for ice to stay on well frozen temperature.

Far out but not too dumb to relentlessly pursue this sort of freezing into its deepest, as the sooner better than expectations of too late. Good luck on all.

06/10/2016

QUEST: HOW TO PERUSE AND SAVE ALL ANIMALS FROM AGRECULTURE FORREST PLANNED TO BE CUT

Agriculture/farming companies whom need to expend or start where there is forest with wildlife, for volunteer organizations to offer/be available to undo the forest of its animals by expert volunteer large groups if just given time days/km<sup>2</sup>... To figure out how to get high trees animal staying high how to get them down self safely etc. how to get wild large apes out of the middle of the land, and smaller residents etc. But if the field gets confident to be able to provide such service at best for free and thus self-financed, and to convince companies planning on cutting forest to become responsible farmers in nature so it becomes a common practice to order first perusement and animals savings.

Nice give us a call a month before cutting the planned forest, best natural farmers...

Good luck.

09/10/2016 QUEST

ENERGY DISTORTION/NEUTRALIZATION OF GRAVITY PRESENCE,  
COATING WISE

Thus, if an energy field can keep gravity out and you can surround something with it safely and sanely, well, floating still and movable. 😊?

18/01/2018

I have been thinking about the insane situation allot most people live in homes what have no lightning conductors, lightning rods. Well, here by, each home will be secured by one. When is the question but sure, yes, quite sure in no time.

20/02/2018 HEAT LEAD FOR HEAT TO NOT BEST HEAT OUR GENERAL NEEDS BUT FOR HEAT ITS ENERGIZING POTENTIAL

something new on my mind; Fire directly heats our water etc ey, well, what if fire is much more intensively energetic than directly heat, I mean rather energizing to the fullest.??

19-08-2018 GRAPHENE OF HIGHEST QUALITY AND PURITY CRACKED HOW TO GET:!

I Have thought some months ago and now enter it here: This Graphene mining technique is to make the Graphene fluid first. Yes thus what is in our crayons pencils to make it fluid to o put it fluid in some sort of Graphene 3D printers sort and directly print with it...??? Fluid Graphene allows I think all our Graphene to become possible ey, if applying with some sort of printer?

Blessed!

## GHLFMM Chapter

### **'The reasonable 750Bn/year GHLFMM Fund and the super GHLFMM Bank (MAKING MONEY FOR FREE FOR Global 4<sup>th</sup>/1<sup>st</sup> world perspective' Study 1/2 WE WILL - (NOTES FOR):**

#### **'GHLFMM'**

#### **- Global Humanitarian Licensing Funding Moralizing Management -**

SOLO ULTIMATELY, THE MOST CRITICAL INFLUENCES I MADE US DURING 6 YEARS 2009-2016

This ultimate project GHLFMM basic will give humanity a new value to esteem and support. Well, this GHLFMM project fundamentals will tell you very good news about its financial miracle and a glimpse of how seriously deeply it will be spend on by me solo in theory here.

There are two GHLFMM financial miracles I release here:

The financial miracle is that if all modern citizens with revenue of 700Euro/month and more and successful businesses, are asked a spare coin or a spare small bill each month, it amounts ruff estimation of 1000Billion Euro/year. If this gets doubled by the great and wealthiest capital entities, it is 2000Billion/year, spend for efficient effective and deeply 'normal' fieldwork you'll read some of in this project aim. The second miracle

potential financial miracle is that this piece is also the fundamentals of a new unique exclusive GHLFMM-bank what can R&D & create and implement money and spend it but no one has to pay what spend.

It is extra Global total rational wealth, you'll read here into.

To: spend it = if it's plan an making and spending is good and does not create any general and specific problems, the good thing is it is potentially very large amount of free money what I hope will allow humanity to see our wise 'humanitarian' needs to be financed and made possible, as long as all factors investigated and sure of no problems resulting of its yet to define first list of what it knows as critical best practice causes and to have good luck on not creating problems but only upgrading North South East West 'humanitarian' basics with its presumable very large non problematic financial ability to for see the world with essential reliefs and to actually perhaps even in controlled 'humanitarian' concept to relief all Countries from their National debts by paying the seemingly unproblematic Beneficial's whom borrowed the money's thus the no problem must to restrict countries to borrow any more regarding probable regulations oh yes and to actually try to also license and moralize to give the countries a significant amount to start on the comfortable foot themselves.

Now, I release you intellectuals into the factors what make the GHLFMMFund and the GHLFMM-Bank here already very wise on the main concerns and few other problematics of the present relief aid in the South, I promise you I master/handle the South here with glance as in quite completely enough here but I hold numerous other specific field work approaches but what I do not want to be public yet.

I want to add there should be a special Muslim GHLFMM. No less no more.

18/10/2016 THE GHLFMM R&D&STARTUP DEBLOCKED

I just reworded how GHLFMM-Fund will be started, well, good news, I was fluent in telling me HR expertise firm(s) but the best who know to find the best of the best suitable expert managers and managements etc. R&D of course, to actually recruit for the task(s) ahead from scratch to good, started/build and operational. Who are these recruiters of highest possible masters required, be? Noone was assigned to select its starting R&D HR also I tried to find a way to solve the individualized official entities and unexperienced world, until this session of attention on this startup worry of me for GHLFMM. Here it comes;: Why not put a webpage up where the dynamic expert HR providing world can be voted and suggested on by independent opinions and for insiders known quite short list of excellency firms, this sort of public'n'well known top of HR art, to lead to a shortlist of most excellent HR firms out there whom are expected of able of delivering for GHLFMM basic excellent management&R&D&startup workers. May the best most suitable HR expert firm win obviously and may the official international government authorities engage and offer to invest/finance basic startup HR and operations before GHLFMM-Fund and Bank self-&provide, and may all involved be humanitarians. The winner by excellent voting amongst the best dynamic HR large size start up and R&D and other required R&D first GHLFMM makers, to get these managers in R&D like GHLFMM to be talented to pursue and structure onto gifted GHLFMM functionality factors.

GHLFMM started in January 2009 in my career and then still very ill personal life. It started off illusionary in practical sense of the word. But gradually by shame and pieces and chunks of solo advancement and no influence, it is the givens what I now consider more than a perfect rare practical ‘humanitarian’ solution where on I am sure we can rely to start off at best. For the 3<sup>th</sup> and 4<sup>th</sup> world and 1<sup>st</sup> world.

It has been a hell and it has survived serious existential evilness threatening my life and the fields their sakes I held for very exclusive rare reasons for optimism and urge.

It might pass your reading in ways you do not understand much of the seriousness behind every given (factors) here, but rest assured the GHLFMM factors I defined is all “humanitarian rocket science common sense simple math’s” where for I see no other basic way to achieve what we will on it. 1000Bn/year working out at best, for the 3<sup>th</sup> and 4<sup>th</sup> world, 300K+? 1M BN? All our universal/humanitarian good causes in general on extra national factors.

## GHLFMM

Global Humanitarian Licensing Funding Moralizing Management

## INTRODUCTION

What to do with enough money in mind is so much more effective than bagging for less than needed, and to apply enough money as wise as necessary', I learned it takes the creation of ‘a collection’ of best of the best approaches to start with.

In order for GHLFMM to work I got close with. Because it is to moralize and license.

Allow me to let me continue reading this GHLFMM chapter about some practicalities I eventually made for the fund and bank, it allows it to start very wise, not mediocre as in not bad but nice. I would fight for, if not all sense here do not inspire profoundly.

It is based on (re)solving 'humanitarian' challenges by the best proportions of humanitarian wisdom. To understand it as one obstacle and chance(s) to fulfill and to thus be able to spend on created/collected best solutions made comprehensive in the daylight of here I opt to centralize by all means this GHLFMM future I made us here 2009/2016.

GHLFMM-Fund, on the other hand, being outmost wise at (re)solving, it is suitable to think within irrelevant global coin-bill/month amounts to be spend well. I counted 750-1000Billion (Euro alike value) /year (un)noticed. ☺

The GHLFMM-Bank what should implement much more than the 1000/2000 of the fund.

But, if the governments do not want to tax it, we should ask the peoples to sign a bank contract or so, and if not one of these two then the fund must turn the money itself each year the fund her 1000bn/year. Also fun and bad name for the Nations/peoples. The whole field. I am good to help for this situation as I started my invention/resolving career by making up 100ds of new industrial/business/market ideas (what got stolen by vigilant burglary, thanks psychopath.), so that does not intimidate me. But it will be taxed and contracted, I am sure, and we accept not no for answers to double the 1000 ☺/year. Cool!

Here we are to read what the fund and Bank, the GHLFMM senses, is by my eventual solo sense as product of unrealistic to shame of non-sense to this ready level I can stand up for as perfect and not no for answer but yes win win solo project. And remember, we are going to spend 1000BN a year, no matter how “cool”, A.S.A.P. at best. Do this as money makers. Because this normally completes us all.

So far the GHLFMM-ed Fund, the GHLFMM Bank however, might serve to make let's say double the debts of all Nations, or my so called 1 million billion euro alike future-applications hope.

Goodness goods well at best, on its it cures many of the present outrage.

Eventually I named the Fund project:  
Global, Humanitarian, Licensing, Funding, Moralizing, Management,  
GHLFMM.

Who does not want correct greater wisdom to rely on, has narrow intellect and do not understand what it takes to actually process, think and organize what is required to take on and succeeding more or less all ‘humanitarian’ aims in centralized harmony and reassurances on the future and present.

It is a big picture what needs profound fundamentals to react and manage well considered decisions what create no problems and make one sense of it all, decision ally. And field works need to be secured and need their general and specific back protected, allow mine. What below the rules you're about to read a bit for. Security leads are not shared here. Still too tricky, is for later when that makes sense to us all.

The fund is as intellectual center for theoretic and practical wellbeing quality and progress.

The fund is a ‘must do’ as 'large fund-aspects responsibility for the outmost talent in (re)solving the humanitarian field work problems' as

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHML0X7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

starter. All should become much clearer and much less creatively/corporately neglected. It is to take a good start and to handle required management, and yes, it is to gather financial means in one great closed as open place what is already valid to actually get the kind of means to (let) work out with ☺. (Licensing, Moralizing)

I am only I, but a collection of inspirations what serious reasons for optimism. It is rarely seen we actually are witness of multi (re)solving on the scale of GHLFMM published in this Magnum Opus collection.

It is not the proportions nor the complexities and neither all obstacles of the humanitarian basic relief field what should mean this fund is a slowly formed project management. What I do like is a new theoretic Humanitarian fund what uses an opportunity to know how to solve many good causes so the quality of handling increases drastically to reliable, and can act on our great aim(s) without “toxic” spending and brilliantly and can act on our great aim(s) on my several basic scaled senses.

In the rules and ideas I made us here and in private circles lay our chances. And my gift for factor is great. Now we had this introduction, following is a list of internal ideas for the fund and bank what make partially its names, GHLFMM's luck.

Not in order of sense reading, and perhaps even repeating something in couple sequel sessions.

## THE GHLFMM RULES

- It may not create financial nor local market problems, and nor any other problem, really, none. Which is a great way to say that whatever does not create problems is cool, there in lays our faith and the sake of many and

much. It is called implementing perfectly. ☺! But it takes a secure practical vision mine is good for now and into the future.

And the future is important, future generation are equally to be protected and relieved, money needs also then be made if you ask me.

- It re-solves its opportunities with functional theoretically complete solutions what handle all factors on the way and is much like a science. It's better to shape the future than to running repeating after the tragedies. When the resolving of a greater and detail cause encounters problems on the way, it resolves these with theoretic brilliance as well, for wise handling to work out. If it cannot, it tries to solve the 'humanitarian' obstacles one ultimately wise day on.

Few pages under and above you'll be able to start reading some of my GHLFMM field work leads, solutions and quests. They make it realistic to create a thinking fund with creation, overview, control and one way influence of suggestion but surely a centralizing way.

- Beneficial field works staff are to become protected fully against any form of kidnapping and highly protected against present risks of being attacked –in 1<sup>st</sup> degree, but all the people of every continent will get this new technical revolution its protection for sure if you ask here.

Beneficial(s) staff works moderate sessions what respect mellow physical and mental demands. Rotation organized so workers have place and time to do work with compensating pressures.

The workers their work gears at best and possess highest quality and functionality to the maximum as also their staying and colleagues and situations to rely on.

The workers and public locations are supported in a social local refined 'community upbuildingness' affinity to merge in well at best and

function/live with a minimal of complexes. This said, there are some antikidnapping issues but I lay in confidence we know pretty much how to prevent it continentally thus even to secure citizens and workers with technical innovative invention(s)/solutions to be prototyped yet, the parameters.

The workers do not have to be the best but good enough and an eye for disabled and less able people should be allowed to do their function with 'humanitarian' glance.

Workers, citizens, work places and regions etc. to be supported with high tech and high HR/technical solutions preventing kidnapping, attacks and robbery. And supported by 'settled down regions \*' they work in. \*: More on this in the field work 'reach' piece in this chapter.

Continental-regional-local security if you ask my can do status on this critical prevailment and Law&Order factor. Much is best to change everywhere. No more harm for instance is an obvious aim. A quest(ion) I hold I worked vastly on, theoretically highly successfully. My Research&Development results are optimistic to prevail humanity and structures against committing any outrageous forms of harming. I'll pass on my content of this Nobel aim when I'm asked well.

- The fund must create friends cross convictions and mentalities and regions and if good, I am experienced/convinced it is to not make/have enemies.
- It can work later with digital forms what accumulate data files such as numbers accumulate with a multiple anonymous management saving authorizations of internal/beneficial management/employees. Thus multiply objective but yet showing the differences between objective managements and opinions. Also, applications for demands of services

and goods are forms what to fill in and range from how much does it cost in greatest assembled details up to what conditions are the workers working etc. up to why they use what machine for and why not another one and what screw they buy at what price and not another better quality equally priced or cheaper from good company, etc. etc. When the best finals equal than a lottery or spread contract can decide the order (GHFLMM (funded) decisions) its deliverance. Also what it does to the free markets is important. Forms and data are published for public to check was my reasoning.

I did not get more into this sort of licensing. But it feel universally bonding.

Numbers and conclusions add up as saved on original files. So not ultimate rather for multiple (anonymous) check and multiple management entries. And also for providing companies to make a certain % benefit, not less, unless as charitable company/product.

- I seem to prefer and urge fund/bank management to be multiple assignable and function in anonymous multiple team context/project/terms etc.
- These means to facilitate universally wise/righteous 'humanitarian' care purposes. All guided and formed in close work with and on the fund and Bank. More on the GHFLMM bank in this chapter.
- Any internal and funded 'changing factors'-practicalities may not be unreasonable, in many ways. As I said, this is a great Nobel obstacle but when achieved there in lay the good chances to meet the norm any action/activity by the money must be reassuring to be nice. ☺

- GHLFMM guides requesting field works to be of as good as possible 'Humanitarian' affinities, state of the art and reassuring to be at best. It is sense what is made internally and externally on the functions of the GHLFMM Fund and Bank no-brainer responsibilities. What I hope all future beneficial field work purposes will experience is that the field fronteering and pioneering to be supported by at least 2 new super wealthy'n'wise partners, the GHLFMM Fund and Bank perfectionistic to pursue to R&D and stabilize sense in all practical factors of the 'humanitarian' field work of its (proportionally logically equally most ambitious) purposes.
- I hope profoundly GHLFMM decides globally what local purposes it finances or not or rejects or wants to see the (theoretic/practical) approach improved of, to level with its notion(s) and need for control of good financial spending as in outcome(s).

In order to have its purpose/goal/ (re)solving influence valued it prepares and suggests 'deals' part of the 'settlement' of armed groups their trouble making. By defining basic nice aims, and personalizing options within 'cybernetic' suggesting in catalogue styles to those stoppable with convincing bet good future –promised items of choice.

I'll let you in on something;: armed occupied humanitarianly challenging armed war conflint solvable by small drones to fly over with a special sort of non smelling smell what put 'directly cozi' sleep effect what makes comfortably at best sleep 3, 4 days or so. Special private secret intervention to pick up but but but but justice can be as beautiful as;: I see it might be good to awake the arrested armed involveds in mix group tents on their seat fixated with lean but especially to put of each involved specific groups together of Syria.

They can then choose to be made unevil and humane and kind and like and smile or do longer time as not reliable?. They should all choose for the unevilling humanenss liking and smiling as that is the way to fast

home release, surely. They'll become anyways more in deep respect for our elaborated inventions world wide and will start making positive activity amongst them.

I also thought the mac gyver song would suite some interesring lead to state some fun. Elaborated expert full meals etc calory drinks etc is to arrested and all refugees in the world, while the Syrian refugee kids in Turkey whom play with plastic guns to be shown to give them to us and no longer paly like that but these boys and girls get a balloon at their polls.

This is pritty much that each arrested groups become really buddies and set to be free in their tents with bed and showers etc as they are really innocent and liking for life, i think of a vaccin.

But beyond, I really urge us to wish and desire for GHLFMM internally to be logically decisional because it is financially and thus practically moralizing, a nice global moralizing institutionally exclusive, centralizing for wise future 'humanitarian' fieldwork at best, associated logically with the GHLFMM means I invented in this Chapter. I experienced it is very useful to be decision ally moralizing as in powered as responsible.

Decision ally centralize GHLFMM can apply decisional humanitarian thinking&mastering required to settle down presently armed obstructers of 'basic good living'. It is not the larger public nor in-crowd what should be the center of decisional wisdom R&D, I strongly believe in the higher quality of decisional central R&D functional empowerment. Wise fieldwork decisions and approaches by being internally best at creating/financing common sense practical thinking to critical diplomatic factors of criminal groups/practices what must be stopped and handled and stabilized far into the future. I believe in centralizing decisional R&D

fieldwork empowerment because the GHLFMM kind of means mean that GHLFMM Fund and Bank potentials is to master basically its beneficial fieldwork aims and approaches.

For settling as stopping armed relief obstructing groups and other harmful practices GHLFMM is simply decisional partner in creating quality effective'n'stable practical good news to their Fund and Bank fieldwork responsibilities.

I just want to tell with this item that having the means means to require approach sense thus also to (decision ally due to) requires to R&D and take field approach decisions, to pursue the best in theoretic and practical critical know how. For instance at certain theoretic/practical stage to be

able to suggest effectively&efficiently to relief obstructing present armed groups while not letting escalation of demands from them, but to in power GHLFMM Fund and Bank to ultimately defines how it wants diplomatic quests to be and what no longer to be. This simple detailed sense-decisional thinking function serves well in 'handling' the diplomatic fieldwork aim/must to get present obstructing criminal groups to settle down tempted by a better new reality future what thought on them each obstructers specifically how the general basic fieldwork gets them present armed groups 'to like and accept how and on what effective rules to settle down as in no longer jeopardizing 'humanitarian' relief pursues because the presented better life new life perspectives suggestible is the ultimate decisional responsibility of any fund and bank their need for their financial responsibility and their need for their beneficial allocations to be excellent and at best to achieve the diplomatic fieldwork challenge to reach all the needy with the liberated universally inspired relief options we by the essential thinking in this book to have done the thinking.

The must is for GHLFMM to be diplomatically successful by the diplomatic peaceful/prosper approaches it can work with, for reach by all

ultimate means, as in when specific critical fields do persist to deny aid to needy habitants, on ultimately such critical obstructing groups to be practically essentially requiring to be handled effectively as normal and fast as possible, forcefully as in anyways ‘humanitarianly’ effective against critical criminal hindering human obstacles’.

I thus think it is very important to R&D for any know how defining responsibilities-in powered GHLFMM Fund and Bank, but with and for quality effective handling and achievement of the associated ‘humanitarian’ fieldwork responsibilities and humaneness practice(s). Some Humanitarian basics accept no not, but keen onto clean criminality free reaches for aid and fieldwork staff operations to be able to rely on peaceful stabilities.

- I think it is best this fund(s) can simply not transact to criminal or sub motivations and is high tech military wise prevailed as protected this way. It must state and repeat its handling protocols to all of humanity, against criminality on its means and its criminally nonnegotiable decisional structures.

- I thought to internally have managers or agents to be dynamic and variable and sort of unknown, but also multiple in attention to practicalities whether evaluation, decisions, input, etc.

Whatever is good for GHLFMM, GHLFMM its decisions and numbered details to be public, but to protect GHLFMM Fund and Bank its functioning against any corrupting and fraudulent interests.

- The GHLFMM Bank and the GHLFMM fund work against internal fraud and corruption.

This future the beneficial companies and HR-recruiters are institutionalized and moralizing by all involved as beneficial to fill out

officially detailed forms of application for a field work need/order/planning.

Potential aid work staff to apply also their application to what I envision as a needed GHLFMM Beneficial's-HR Authority, and practically thus translation based. For the HR factors to be able to be prevailed and check and prevailing with protocols to protect the beneficial field works their staff. To moralize the recruitment as licensing and moralizing HR sensitive authority etc. To exclude corrupted recruitment by internally checking on agree-ability and checkable resume and background check etc. Basically all HR managed double.

Local people and local law and order people should experience recruitment proceeds to select the best candidates of a variety of educational, mental/physical/metaphysical/psychological and effectiveness as reliable fair HR choices what surely talented to make the workplace and allocated job functions good at the licensed 'humanitarian' requirements. BUT  
**GHLFMM GOTS THEIR BACK ☺ :**

An prevailing environment factor I found is to protect workers from criminals normally eager to steal their function, the fund employment department, in case something mortal and or criminal happens to an employee, or long illness, than it is the continental department what recruits a new employee with a strict protocol against HR corruption-who knows for real; checked by random (Global?) Beneficial's HR prevailing GHLFMM office. And an investigation should be started.

Thus to prevail and moralize the HR of the beneficial allocations, what employees they select of all applicants and why. It is sense to provide the

GHLFMM Fund and Bank with the essentially critical HR related departments whom can process also the applicants to be validated to a

2nd consideration. And of course quick direct recruitment must also moralize local security work conditions, etc.

This way the fund can check whether quality HR choices of its beneficial are made and not for instance due friendship or corruption or fraud, but in normal manners for good basic HR factors.

GOOD NEWS ☺!

Here aims for the employed people and infrastructures and materials to be respected and to be merit by all community members at their field works, and vice versa.

And the fund and bank should request and let moralize the employments by its beneficial by setting its own HR standards to its beneficial employees. I like to moralize humanity and workers, for instance that the Fund and Bank prefers kind, fit allocated HR with engaged mentality, worldly, and irrelevant disabled factors where possible, and in basic very humanitarian and worldly.

And also this: Besides from good public work conditions at best, there must be thought of home alike private stress-free comforts as for GHLFMM's beneficial workers to be able to feel at ease as in any home off-workplace retreat. ☺!

- Commercial sub motivations and affinities:

Companies whom respect human dignity such as healthy work conditions and demands, and what orders or plans on ordering healthy/quality products/services as moralizing allocations to produce the needed product to good basic humanitarian norms as allocations of healthy conditions and saneness. And financially sanely engaged. ;)

More licensing ruling specific aspects:

- Saneness, functional qualities and comfort of consumer goods used for the outworking humanitarian choices/aims.
  - I stand for a Global/continental GHLFMM beneficial allocated fieldwork factors to with totalitarian perfectionistic, on the next and only correct level, Security/safety/protection/prevention and geological pursue ability, for what is left of practical details because my career holds already practical incentives what make this as basic priority to R&D without accepting no for answer. For the ‘real’ required humanitarian field proportions such as regional situations, HR and safety/security functions and infrastructural factors and prevailed protection of loose objects and relief materials anti-theft proportions, and staff nutrition and drinks and supplements and reasonability of job requirements and off duty conditions to be mastered for, and especially not neglected and left fragile, but sensitively hyper serious R&D’ed and organized to securing new high standards of this obviously much more active ‘humanitarian’ field. Work/functioning factors reinforced as much as possible. An example is for allocated staff members job spots of beneficial fieldworks to have backpacks or work situation with integrated seat and other basic functions such as water, a knife and torch, fire material and of course best suspension/carry qualities, etc. affinity for quality materialism and tiring ongoing tasks to be spread amongst possible task rotations on light sessions. Working in the for me musts to try to make public field working as reliable/safe/stable/prevalled/backed up/settled conditions/functions what developed upon to meet a no- and extreme minimum of casualties aim –what honestly boils down to some sort of technological justice and law and order –“clairvoyant glass ball” and extra local installments of eagle eye view camera technologies prevailing criminal minds to commit

an outrageous attack on anyone (and in the best ultimate case on the other hand be made available a free drug to them questionable bad citizens for them to be innerly helped to behave yet to have a special environmental co-existential sensation and qualities.. as in a detail I hold for out of this book) -technical/HR super police and justice upon the present and future localities of any community. Global mastering of this no-brainer aim to

prevail and apply a justice and help at best, is an technical –always caught requirement but is in fact a practical detail if GHLFMM is decision ally moralizingly in powered. It is just to no longer be able to attack someone without having all or much chance to be caught and brought to justice. Not everywhere possible but surely as good as everywhere diplomatically achievable if you ask my esteem of defining effective wise fieldworks.

For armed groups you'll come across this work document 'Once in life time settlement deals with 'present' major, harming armed groups 25+ years long secured peace agreements what tempting, along with future perspectives what meant for good citizens and settling present relief obstructing armed groups, what further more interesting, etc. Additional prospect of 'postponed gifts' and (specific present-rules) for 'reliable stable moralizing reaching time to relief the relying and any disaster areas'. I know some GHLFMM field work specifics I did not include here.

The fund deciders should not be influenced by external pressure, to not be obstructed while researching and contemplating etc. They should decide what they suggest to get and what conditions, but not generally the other way around, a one direction giving, and auto-no to unsolicited criminal demands. (Aldo options for the evolved such as

GHLFMM catalogues to be made to let distinguish preferences at the given made to stop their harming and accept better reality situation(s) optioned. To suggest at best for basic and extending 'Humanitarian' corporation with the GHLFMM reach- aims and musts.

- The GHLFMM bank\* and the GHLFMM fund do, I think, best normally not subsidize wars, I'm sure prestige means no wars and humanitarian statement and proving its humanitarian qualities and Devine (proportional) military controls. And so, best by all creative/internal means preventing wars to be able to happen, but if critical groups must be stopped with force at best, than it is I think best for GHLFMM to find that there are enough good intended international army means deployable already, and thus no need for even more by the GHLFMM Fund. The GHLFMM Bank might just be a different story, as it might want to fund as in organize a Global humanitarian army to prevail and protect everywhere against criminal armed intentions.

- If it depends on me the GHLFMM bank and the GHLFMM fund will not be managed by politicians, but by the best of the best suitable peers'n' management, (re)solving scientists and professionals, letting work out the internal GHLFMM concept(s) for quality of its involved allocated

Beneficial's their field work. Politics are a democratic flux and are actually partially nonfunctioning entities in this large circumstanced proportion what complex not for chitchat but for GHLFMM talents and pursue in order to present the world and convince reasonable critics of the pursued need for Global 'humanitarian' fieldwork success at best.

Presentations

what results of centralizing creative, analytic, decisional management, etc. Do we want GHLFMM or a neo liberal stupid practically potentials approaching bastard. ☺

Politicians, best have the right of opinion, and are surely needed for certain decision of course to start with.

If you want, put me in the GHLFMM middle outside the box. I'll be rich and have plenty to offer, more than average and potentially excellent contributing source, counts for all of us 'humanitarians' by hard.

- Consensus: Forever Licensing Care preventing future to make wrong decisions with it, and to let do the correct with the Humanitarian sense 'humanitarian' means/prosperity. In this way it needs an unbreakable internal law which states certain limitations against cooperating/functioning as "evil plan and also not as internal wrongness", irresponsibility, not relea(li)sing/licensing of detail details, etc., against approaches off the moral point.

– If GHLFMM is against a certain criminal sector and sees it as its responsibility to finance the best solutions. GHLFMM reasons consensus decisions probably be a sector like child prostitution, controllable trouble

makers and any dwelling activities like domestic violence etc. I explain it is in its interest to state to want to eradicate all criminalities 'But to only solve those it has created high quality suggestions/solutions for the involved and evolving by 'humanitarian' purpose any form of outrageous harming to anyone. Or, GHLFMM hates them so much that it just stops them as brilliantly as required against the evolved bad people/structures their will. It would stagnate primary gates to and of Africa for instance to abruptly call war on all harming practices, as does create enemies and the

fund and bank needs none. It will engage attempt and progress towards its anti any harm(ing)ers-goals but acts only when wise ('n' me in on nice) enough in control of the specific harm practice so it can suggest new reality what functionally diplomatically sacksful as in tempting, to my experience GHLFMM must minimalize the situations it makes evolved criminal stop harming against their nice cooperating will –to a minimum. I have learned by relentless creative pursues how to stop many forms/sets of harmers in the daylight of GHLFMM field mastering means, that to me most of harmers seem to be stoppable by nonviolent, non-conflicting function of GHLFMM but that good 'humanitarian' norms can work out universally flexible and I expect GHLFMM to be able to always decision ally confront involve ds and suggest them a good future, not a new situation what might stop them them but what makes them enemies in conflict and not in moralizing control by most often agreeing and moralizing and liking what stops their harming.

- Messages to GHLFMM of criticism or problem messages might be changed to become more functional but the senders should receive original and upgraded message to them. They fall by category of purpose: such as primarily: Problems-...., helpful information, incoming solutions, incoming criticism, etc. incoming public thinking, etc. All as public suggestions, the public suggest and incoming/internal communication to get thus basic functional tags.
- It is a very good idea to consider GHLFMM to only support preferably (and 'soon' ☺ Organic) Vegetarian Nutrition, excluded, bewildered tragedy situations what have no vegetarian choices. I want "my" dear South to start perfect and to ultimately stay nutritionally and market wise sane as once the South is becoming one paradise on Earth. Diets to be preferably sane only. But supplements such as

Methylcobalamin etc. to be given to all citizens and staffs if they want, etc. Full meat replacing diets. I want the best cuisines of the world to everywhere social, this is one of the normal full relief global ‘humanitarian’ musts.

Furthermore I want to tell you now here I want the world agriculture to become state of the Art biological, eventually when wise enough. Yes, here I said it. Well, thank you all very much for the results, I’m convinced of you’ll all be great to this practical detail included, including the life stock industries. Know, guys, sometimes the aim is simple math what leaves whole fields knowing the rest is practical detail “history”. I remind this factor it’s evolved that biological future should be more tempting than non-biological agricultural practice, I want to say to you all that I want it to be beneficial on all factors for you industry. (And you can count on me and/or mine.)

- The fund its start to be probably best military alike based because it must handle external factors, well, reliable and precise. Full protection by state of the art army means is a good environment for it to function and to start thinking to its basic problems, leads, quests and solutions in closed environment. Really. I like the fact humanity will witness the best decisions and projects, anyways with reliable progress and stands in durable security. More on this in a bit. But not that the military is involved but fully as required evolved enough. If you ask me for all the sakes, definitely top security and large and wealthy for comfort staying. A secure remote highly totally protected resort will do.

I think this is sense regarding to the interests and demands and R&D sensitive internal sensitive incentive character.

You know, it’s not just a fund but also a new sort of a moralizing mega bank because GHLFMM does not create problems’ it solves them great enough and with successful ‘humanitarianly’ opportunistic sense enough.

- It does best not finance fights against crimes yet yes anyways all the humanitarily more brilliance requiring ones ☺ eventually. And GHLFMM does logically not allocate wars for that there is enough global army in the wide range on to be collected army functions, more on this somewhere in this book.

But logically GHLFMM supports and tests ideation to solve Humanitarian and civil crimes with tempting licensing of private rights of each citizen, as only no-harm/harms-stop sustainable solutions. Further I think it is best it states what it has no such solution to yet and so what will be ignored and let, or how let. Reminder the minimal of enemies, it is as easy and much more functional to come up with practical field work ideas what make friends, rather than enemies. But it takes creativity, well, enough here to start with I may so on the readership's behalf to make of this book it all into being large reasonable humanitarian humn at best at relentless incentive practical work.

The fund and Bank does not stop what it does not have no-brainer up to brilliant, 'complete' solutions for. Criminalities are tolerated by the GHLFMM money until wisdom is defined what can be suggested to replace each rather difficult theoretically challenging criminalities with brilliant new reality what works.

– Eventually, funds of field work sites and totally new projects, have to get licensed. I am quite sure of as it is no more an independent level and license all its aspects and significant ones of other Humanitarian proportions, educate money needs educate management, may I thank all parts of my life what have brought me to the wisdom factors I contribute successfully bringing evolved fields to their professional goodness.

**This was this wild solo list of basics for already very essential best practice givens for GHLFMM internally and especially for the humanitarian field factors in general I want it to level with.**

**Following below is the last part of my GHLFMM solo project Chapter, the part with specific fieldwork approaches I hold. You'll love them I think. But first I start by telling in all this Chapter incentive its daylight, what we in wait of GHLFMM being R&D'ed as in organized and working out, is finically a preGHLFMM suggestion for required financial humanitarian means to be collected:**

Before we read thru this greater project I can gladly inform you I created a supporting fieldwork pieces-:- to cover the first few years here on all the possible critical humanitarian crisis field work needs and opportunities with the money they need in order to provide the experience of the crisis civilians with extended basics for very extended (bet on mine) basic comfort.

Here is a short piece I wrote to tell about the piece:

For the field work statuses in the meanwhile of this greater GHLFMM fund and bank to be invented and working out, here rolls on the idea to assign few of the best fundraisers and starters in the world, for them to analyze the wishes of all the possible humanitarian crisis situations their needs for the coming several years, where for there is reach achievable in wise ways of course here on.

To see how much it costs, and to produce a global fundraising (recurring) event what is a first hint of a new era that great things do happen with glance mastership fundraising.

What I ask in my piece is for the too poor to also be in counted as global priority crisis, as citizens often get forgotten because they have a home or live in a stable nation -but they die in their homes or on (or under) the street of starvation and violence etc.

The value of money will become clear to the modern world, so this is a perfect exercise, like an intro, a show case that we are serious and that we achieve, hopefully. I also want to wish for the successful solutions in this book, that some become developed as charity companies/products/services\*. Now, if you will, The GHLFMM Fund/Bank.

## NORMS

I am only I, see my GHLFMM Fund field work ideas as a class for inspiration.

GHLFMM, it, can still work on brainstorming for inspirations for nice ideas to the many topics it isn't handling, but as you know the effect of this master literary happening here....

It is anyways to get to be known as special and gentle and influential, handling even seemingly unsolvable practicalities.

I learned the missing links are functional ideas for GHLFMM-Fund and Bank, big in depth overview on factors in general.

The following fresh fieldwork approaches are best recognized as intellectual basic processes to get an idea of what relief reads like. And only just my gradual/chunks on GHLFMM, while it best be the intelligence is contagious humanitarian 'basic' principle of relief and stability.

ENJOY ☺

(Random order :)

## LOGISTIC ARMY AND STABLE REACH TIME DEALS

**In order to brake one of the greatest reasons why people do not donate of whom are (made) aware they are needed, is that they argue the goods and money falls in the wrong hands. And it would in a political/management way of management.**

**Finance is not the key, I am against 750Bn/year fund if it is not part of a functional reach master plan etc. Logistic army is good**

**for protecting goods, financial means and people. It is to protect cargo, to guard places where now nothing reaches and all gets stolen and sold on to the commercial market. And the safety of the people and workers of the continents, or is that the GHLFMM anti-kidnapping army. I add now on 03/11/2016 an attempting technical ideas to try to be inspiring:**

**All people of each continent will require for an innovation/improvement of existing best Human Radar. The basic technical/hardware/mediums are limited in range and visualization but as Godfather of the human radar quest/aim/vision, I believe applying different mediums to radar and Dotted with is my original believe International RadioBroadcasting medium might be embodied uniquely, different from original broadcast received.**

**Other technical options for anti-kidnapping globally everyone and everywhere are existing Human Radars and unique nanochips with only nanocode-radar reflection, etc.**

**Human Dotted&Radars is indeed computers monitoring reality, identifying each on gps, but only programmed outrageous conditions&hurding to be know, all else to not be even retrieved. By the time our humanity and world will apply a cross continental**

**Human Radar to protect all and prevail certain outrageous 'hurding crimes' with 100% caught Law&Order. Multi hyper geo operationally listy elite force of anti-kidnapping everywhere. Sure, just how it should be, by any sane mean of simple open quests and open questions how, etc.? It is just a practical detail the practical basics we learned by this latest attempting chance to impress o inspire them technical and science worlds.**

**Human ID Radar GPS Dotted on top of kidnapping situations needs cybernetic diplomacy mass communication on how far the**

**developing of it are, and diplomacy to all and everywhere for individuals and groups whom hold kidknapped victims, for them to get a time way ahead the 100% caught, to release anonymously their kidknap victims. Even Amnesty might be important to get the victims out alive before a anti-kidknapping human radar 100% caught system would be applied of course any kidknapping situation is exactly what this Mapping/ID/GPS/HumanRadar system is getting real and up coming.**

**Personally in Highly secured private Legacy/archive I hold personal original technical inspirations how Human Radar on the scale of cross continental might technically seem logic.**

## HUMANITARIAN AID REACH, PROTECTION AND LIBERATION DEALS

– Humanitarian Reach, hopefully surely important leads:

The fund's financial/theoretic-agreed 'humanitarian' influence is its chance to work theoretically to reach all people in need for 'humanitarian' basics and extended means, and to co-work on solutions to achieve 'Global Basic Goodness Outworking and Stabilities' as so its chance and must to disarm most and have them settle down agreeing and tempted with win win suggestions, others are handled by others I don't know personally, and some others few left armed occupations to dis-isolate the regions they occupy as to allow these extended GHLFMM basic diplomatic good and means etc. to relief and support the citizens directly with no fraud nor corruption drains in the origin to personal reach and for some of them armed community occupiers to agree to get things going well. Specially adapted tempting offers so all and most tolerate the help designed to be allowed by them, mine hold. To usefully for GHLFMM to best be let gain

of enrolling 'present/future-deal' factors defining the win win deals as ones in a life time super tempting social and material gain chains on each now presently denying or obstructing nor fraud Humanitarian aid. But allow a piece of my puzzle: Interventions of the future peace making is a based on a new idea to simply fly over with sleep specially 'directly cozi' sleep enducing with small fuming drones over armed humanitarially challenging regions and groups. □ But thus to arrest all but to create a special goodness elixir and the following I described for purest diplomacy with some armed challenging troubles. ...; I see it might be good to awake the arrested armed involves in mix group tents on their seat fixated with lean but especially to put of each involved specific groups together of Syria.

They can then choose to be made unevil and humane and kind and like and smile or do longer time as not reliable?. They should all choose for the unevilling humanenss liking and smiling as that is the way to fast home release, surely. They'll become anyways more in deep respect for our elaborated inventions world wide and will start making positive activity amongst them.

I also thought the mac gyver song would suite some interesring lead to state some fun. Elaborated expert full meals etc calory drinks etc is to arrested and all refugees in the world, while the Syrian refugee kids in Turkey whom play with plastic guns to be shown to give them to us and no longer paly like that but these boys and girls get a balloon at their polls.

This is pritty much that each arrested groups become really buddies and set to be free in their tents with bed and showers etc as they are really innocent and liking for life, i think of a vaccin.

'Beyond-ly' wise created. This with authority from out of the fund and its beneficial organizations a rather 'one way communication' confident to change all occupiers and isolating deniers of aid -harmers into 'humanitarian' basic factors settled down groups, regions, nations, etc. Because GHLFMM is to think at best what to tell the bad ones how they're life can be without being against but along with professional goodness.

A future what can be one way well prepared and suggested and most probably agreed on, and I have described practicalities for some specific armed groups in the way of humanitarian reach, and especially am quite optimistic for approach much promising change can be submitted to

extreme conviction-end and occupiers. To be accepted care specifics, changes.

And specifically fragile ideas 'what' leads how to and what to 'do, offer and demand' of these inhumane, harsh and convictions.

Armed occupation groups where for very detailed graphic catalogues GHLFMM can pre-arrangely make and personalize. Based on variable factors, such as catalogue per group, where of the groups can choose of certain favors and products and agree benefits. They enroll gradually and according to schedules logically, as reach time is established as stable presents into far extended future for instance ones and for all for 25 years etc. and so regions can be helped without fraud without corruption nor theft and by full logistic army protected aid/relief reasonable situations to start such great relief fieldwork(s) as GHLFMM.

The deals can go far into the future, such as providing shelter and nutrition, but also a future (fungus?) alternative home why not etc. It is to become part of the best possible future for all involved.

Groups what need to calm down and start behaving and allowing, is just part of the release of totalitarian planning's, what focus on showing citizens the precise future for them, violent groups are just part of what all get (or some not, on the contrary), but specially tempted specifically.

Do you get this a little bit, because to me it makes sense as much as I can make us sense?

I have decided to not go into my practical deals ideas for specific groups and how isolated citizens can be reached. Thus I hold part.

Let us create this GHLFMM control successfully leaving no citizens in

Humanitarian needs unrelieved, may that be clear. And may the power be with GHLFMM.

### **Monday, April 15, 2013**

3th and 4th world modal for use of fresh B-grade vegetables, crops and fruits, at bottom prices. And some of the 3th world obstacles and advices of me for the basic solutions to also be of use to relief the 3th world effectively. Proportions of possible reliefs of this idea: not calculated yet B-grade vegetables and fruits and crops are agricultural results what not harvested or discarded away because of the shape is not meeting the norms of the consumer market (consumer business), and also because farmers and corporate agricultural producers did not sell well on time their presented stock.

In theory these products are valid for consumption.

Vegetables and fruits and crops are fine and efficient, filling Nutrition's, and are affordable. I thought 'what if B-grade VF&C what valid for consumption but not wanted on the regular market, and they are business accidents on the regular market, than it seems OK to let harvest these dis-shaped VF&C for human consumption, I explain you what to do with it. And to not throw away these unsold VF&C if for destruction, but, but, each Government and all funds what want can regulate prepared meals -kitchen (with volunteer workers and apprentice and students also), where the VF&C's are made into an applied variety of sane meals. And clean them well off any pesticides. High cuisine with all good means ☺. The farmers get a fair price.

Let the governments and funds organize themselves to present themselves as potential buyers of the B-grades, at lower prices and for use-able VF&C only. This tax free, and at least inter-nationally centralized coordination. Now, the VF&C's where of the durable consumption health norms factors are close to un-usable as in not pure anymore or becoming rotten (too soon), can also be of use? And exceptional diets for the ill social beneficial consumers with particular diet requirements. Now, about the B-shaped VF&C's what not harvested? Because of no buyers or a bit too much bad luck by climate circumstances, or no management or HR/costs risks what not taken. Well, I don't know how much of what is left on the fields to rot or to fuse with the soil, I have had the impression it is quite serious how much.

An application for 3th world reliefs is a complex matter without limits of functionality by potential loss/no-reach and with HR of the 3th Chapter GHLFMM and its financing, for logistic army, and infrastructures for personal reach of those who should be on the list of Beneficial's their basic needs. Either it can be solved with quite some costs and state of the art solutions to the basic challenges of most of the 3th world situations where relief is needed, such as a continental logistic army for reliable reach (More on this in the last GHLFMM Chapter of this book.). And either it is not profoundly supported or not well designed and so bound to fail or make big mistakes.( ) But if there is a potential to nourish all poor and ill in need for (sane) meals, globally, just because of B-grade and unsold conditions of the VF&C's than it is about money we talk, but like I know money now since some time, I understand if we could install in continents such as Africa a Continental thingy I call complete 'logistic army' for management and reach of transportable prepared and dry meals and other valuables of present interest of crooks. If designed by the best of the best and preventions and stops and achieve reach for the

listing of Beneficial's is all solved and made possible somehow, than it is actually a small gesture for global politics to ask their citizens with a coin/bill spare a month to pay such very low amount as tax, enough to pay for secure/reliable National and Global relief.

But I do warn, it seems to have more than one reason like this one to install and build such continental logistic/reach army, for existing relief's managements for instance.) If it does not sound well or does stand at concept, consequential to any problematics expected -in theory it is surely not a suitable approach. Also, if pursue-able and pursued at deepest levels of management and experts talents, it is a good advice to know it is nicer to say what is concluded, what can and will be installed and what is prevented and what will become of the project(s). Such as criminal interests and thinking a billion is too much while speaking the language of money means: abundance.

Now, the pack edging of potentially prepared meals. I thought, and it is only an idea what I do not know of whether the production market of pack edgings materials can or want to make such change real. My idea is to make certain products be packed with the same recyclable plastics what can be collected and re-used. As not all plastics packaging's are recycled but rather thrown on garbage areas amongst all less renewable materials and substances, well it is sense to make producers whom use pack edging and the chemical factories providers, (make) use more the same plastic sorts what good for recycling and use as pack edging of the prepared, sane, governmentally controlled, 4th and 3th world meals of the B-grades VF&C's available and apply-able for humans consumption.

Would there be enough B-grades to give all humans a (suitable) full diet? And will a portion be packed in a self-heating (NASA ish) solution(s)? ☺ And will there be a logistic army based on global collective effort sized to continental control of at least meals to start with. This logistic army of

course is a main pillar of GHLFMM, it seems nice to start collecting the ambitious means for critical complete intervention.

I want to add 01/10/2016, for the crops to be washed with neutralizing substances what undo of any pesticides, until bio is just making more money in few years of now I'm on.

– Layer agriculture on renewable energy>construction materials>NEW COMMUNITIES

**Imagine deep large layer agriculture factories what produce fungus/mold applications. Fungus is something great I discovered years ago in my kitchen. There was a mushroom what laid on the cooking device for several weeks. Well I picked it up and noticed it was very hard and light of weight and almost not infected. Some years later it occurred to me it was a very special moment. I started to work with the given and discovered and concluded few things.**

**Fungus is being applied in industrial packaging to protect products their corners. It is grown in shapes and then dried. It are small, randomly growing fungus wires what form then a very hard shape. Well, to improve this into applications for housing and other applications, it seems to me it requires a scientific push in the most interesting direction. If fungus would be made fluid, and grow filling a form completely, it suits to replace concrete solutions for 3th/4th world housing can also be achieved by layering sane layers of fungus, what so form walls of thin hard layers. In any way, by all means ☺ any concrete maker out of revenue and work can switch to become a fluid fungus good job with your relations.**

**A technical lead is what-light and heat density is minimally required for fungus to grow? And of course for the layer factories to be automatized so the layer containers are cycled up to collect in normal work conditions but underground rather than special, and thus automatized. Sterile by air here you come in one good hopeful day.**

I started thinking of building 3th world housing, schools, hospitals etc. with it, and sanitarian infrastructures.

Great news, especially if grown on self-sufficient as renewable energy and the lights...dynamic and lasting cleaning water and filtered waste recycled

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

near such factories etc. dream on loud, connect. And fluid fungus what treated against water, would be the new social/community projects.

3Th world construction and (sanitarian- also) materials and constructing: To make this material waterproof I am in a less degree thinking of such quite optimal Fungus options their external waterproof layer what might be substance into paintable or spray able to waterproof construction applications. Wise natural agriculture crops based might be a good lead to start thinking with. ☺

Plant partial functions are just effects and hopefully in favor, proportionally wise.

There are few major application needs for such great nonprofit factories. The good thing is once invested in it keeps on giving for free.

You should think like I can, such bare idea causes troubles and would cause serious criminal interests. But not if it can rely on being part of greater circumstantial practicalities supporting distribution and financially strong to for instance offer continental logistic army to protect the goods and applications of master plans to be save. It needs to rely on basics what are at this moment not installed yet.

This is a good reason why the “GHLFMM” fund and Bank are a must. It opens opportunities what otherwise simply not even realistic.

I don't see commercial applications fair to build the 3th world fresh housing and providing master plans to build living areas where most crucially needed.

So, there are social opportunities what the GHLFMM fund and Bank should be able to count in and eventually provide funds sounds cool.

I thought of how to actually take it on to build where now heavy harsh civilizations are. Not only to you have to empty them, but you have to make them livable for and by both involved. The bad people and the good people.

Of course tents are interesting because they can gather people to then work on their new social housing habitats. Well, I noticed there are two sorts of people what need to be separated, the good citizen and the bad ones. And I had inspirations how we can manage this.

By considering to offer two groups new habitat situations. Tempting for the bad ones to prefer the ones where the more tricky people can be compensated.

Sort of two stores, one are new localities and societies where there is protection and law and order installed ...

And ones where the bad people get other privileges such as some beverages a week, meals of course, but also access to extra local and regional video evenings, and some other extra's such as an interesting amount of pocket money to spend in shops specially made for their interests such as marihuana etc. all other products provided they cannot rent good unless they will be living in higher norms/security territories for the good.

And you know what, this part was cool.

I want to add the new good communities offer perhaps best its citizens with high-tech solutions for in moments where distress. And more common.

And is a layer agriculture model right for growing nutrition?

There you go.

There are certain reoccurring crime/interest problematics what are critical and so far not yet solved.

But I can say the security measurements will be magic, and will attempt to totally exclude the temptingnes of these physical emotional top priorities. I expect the fieldwork R&D for GHLFMM demanded quests will achieve to fully protect and prevent the problematic interest jeopardizing security of its total human interest and allocated purposes.

**IMAGINE ALL NATIONS THEIR DEBTS PAID FOR THEM 'WELL' AND ALL WHAT THE COMMUNITIES MORAL BASICS REQUIRE FINANCED/GROWN DURABLY FOR EVER, WELL I WORKED 6 YEARS TO KNOW WHAT IT TAKES TO DO THIS WELL here by GHLFMM.**

**Tonight I had my usual chat with myself and came up with what seems a conscious conclusion what drawn of certain ideas I have worked with the past 5 years.**

**It is quiet understandable and seems to need some of the rules I set for my GHLFMM fund and bank their rules.**

**If possible, it is for the debts of Nations to be paid back for them, entirely, by the GHLFMM Bank, and of course any other basics possible wishes to get means such as any disasters related prevention infrastructures.**

**And perhaps they can get a big extra to foresee infrastructure, social and medical assurance, and investments, etc., but managed by GHLFMM if they are regions what not trust worthy as in corrupt and fraudulent. Hardly need for politics. But, do not think to get away cheap by suddenly lending much money to countries, because I want thinks to stay the same as long GHLFMM Bank and Fund are not operational detailed operation, or else GHLFMM would punish with less financial favors these players.**

**Well, I happen to be still the only person on Earth who understood it was the GHLFMM-Bank what seems needed to license such preparations in order to convince the mass it is only doing good and no harm.**

**Of course this transaction needs a set of its own rules.**

**The GHLFMM-Bank as I call it, can R&D, create money and pay/integrate (with) it, without it owes it to anyone. It is High end scientific free money.**

**A rule is obvious to me, it is to restrict governments to create such huge debts again, but fairly said, if an GHLFMM-Bank would get created and gets it licensed to pay off the debts of the Nations and, in one go, it might as well give them some pocket money to start off on the right foot and clean up and provide their community, infrastructures and HR mess, as in make their 'humanitarian' interests beneficial.**

**And allow the Nations to create a debt of a certain % of their BNP for in case of emergencies and other potential needs, full back up, but watch it because a GHLFMM bank/fund means moralizing.**

**My argument goes like this;: Investors in Nations are rich or Banks and some citizens. This does not harm I think, it is just a bit more money where money would go anyways and much more anyways.**

**The good thing about this is the rich do not spend more money because they gain what they invested in Governments. And the Banks, well, they would become stronger and richer, what is also good news. And there would be more (investments in) development and business.**

**All this needs are questions to be answered, such as what do governments spend on materialistically speaking, and what should they not spend this liberating act of wisdom on. What plan of approach works for this global wish with this GHLFMM bank? It is especially the trick to set rules what make Nations part of their project on spending the sudden prosperity. The GHLFMMBank rules and affinities I set out for it is for the GHLFMMprojects to think for the collective ‘humanitarian’ fieldwork. To think, consider, conclude at best and to manage to maintain its rules to keep working out, and created for purposes and no problems.**

**I strongly recommend to not take short cuts, and with this blog holding my conclusions and solutions, leads and quest of the past years of my solitude I hope we expect me to also deliver brilliant wisdom on my future pursues to upgrade humanity and it’s, into good stable living, backed up like never before.**

**On top of paying of the depths, it seems to me it is no problem to upgrade the countries profoundly. Roads repaired or upgraded to high end conclusions on how roads of the modern day are like best, ☺ green energy installed per continent, social hospitals and social elder care homes build and maintained and given for instance a sum to get on the right foot for their future functioning, schools repaired and build and teachers hired, wild life protected and nature protection expended, some sort of universal replacing income and I hope we can provide 3<sup>th</sup> and 4<sup>th</sup> world people with rent per slices of 6 months somehow, water and sanitary basics to be designed created installed everywhere where needed, also programs, and we can build and buy social housing as much as we want I believe, national problematics to be resolved once and for all in complete motion and state of the Art handling, and much more. Simply financed by the GHLFMM Bank and the liberated world prosperity from the countries and world. I see no problem, because the money means no serious spending pikes it seems to me it is irrelevant to implement such vast amount of money into beneficial community. Especially when gradually per stable good outcome.**

**27/09/2016**

**To top my GHLFMM great essential/critical exclusive gifted solo practical basics, is for banks and other financial corporations and institutional entities such as governments are also, for banks&co to not be saved but made moralizing, and by all means made licensed/moralizing for they must moralize such as to not create financial risks but from now on to just stick to the legal moral making of benefits. Same for stocks, good business wins.**

**But for the good sure a bit anyways hey. 😊**

## FOR GHLFMM-BANK TO FORSEE FOR ALL COUNTRIES (AND ISLANDS) OF THE WORLD BEST GREEN ENERGY

I realized this late (almost not) one of the logic musts and surely not problems creating if GHLFMM-Bank defines what our luck is of course and yes if able to implement the financing, what seems to me it does not create obvious problems, we got ourselves green energy and can start settling down our past. I am very happy because it is not a question of material proportions, and this bit of money more going around seems minimal.

Good news and almost free energy 😊

EVERY CITIZEN ON EARTH SHOULD GET few hundred/thousand digital Euro worth alike or so worth each now and then, preferably managed with them for security/safety factors. If security needed it should make sure it reaches so you enjoy it. For drug users this might be a problem, as they best not get so much money to buy lethal dosage drugs. Complicated but a good beginning talking about distribution of prosperity meaning the factor to create no problem(s) stands like this reasoning but fully profoundly, GHLFMM factors, wisdom being made and at work.

I add I and here by my DREAMTEAM opt to offer 1million box to each lovely person alive in save (anti overdose etc) and VIP financial management ways. Here for I explain again I&DREAMTEAM hold sci fi now invention quest ideas what when invented we will replace much old with the best and most efficient ideal things but the patents and licenses

we get (in fastest practical boosted ways licensed by capital minimal time maximum official licensing potentials to get our chances) to share these production rights and merchant potentials with all good interested companies in the world and sell only very low price state of the sci-fi now arts inventions, amounting to +-2000 Billion box a year for my DREAMTEAM personally. It means 1 billion people +- to get 1 million box each what means 1.000.000 Billion what is 33.000 Billion box a year x 33 years, I&DREAMTEAM just need some more ideas in amount of +- 2000 Euro alike amount each revenue in win-win and fine models of responsibility. Don't say no until we make you grow you the hair colors and magics at will or pure air reality definition Televisions etc etc etc, The Lord fun.

## NOW MY VISION ON THE NEEDS AND OPPORTUNITIES FOR PEOPLE IN THE POOR(EST) REGIONS

For those with money and without, even coins spare, NGO's etc. could for see investment facility what invests in good things to double the money. That is abundance. For the poorest, a coin should worth 'it's' double. There where needed, this is great.

Jobs is not required in a way it seems to me often easier to create social security for those whom have no job. For this my concept is 'charity companies'. Global companies and products where of the benefits go to a specific good cause. You can imagine if all my valid new product and companies ideas here would have become charity companies and products, one can cheer on massive 'humanitarian' impact already, and I am only one (even if not just anyone).

This way the required fair billions can be earned and redistributed in social security causes.

The stream is not endless but if people have money they should be able to buy work, in a vast creative and eager globalized market. Especially because there our money is worth more and employees cheaper. I wish you good fortune.

And I can remind us in this book, I hope on making lowest paid jobs into very well paid, and social security for all basics. ☺

Here the end of my solo GHLFMM bank/fund project outlines.

There is more GHLFMM spending's under here in this book, like disease preventions natural supplements for free for all humans if they want.

## SOME MORE SAFETIES Chapter

Thursday, July 10, 2014

A white or reflecting material on tires like in the old days? For motor vehicles and bikes, one of the many ideas required, what might help to prevent road accidents.

I'm lost in archive in this piece, I owe.

**Thursday, July 10, 2014**

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not obliged: click 'No, continue to document'.

## **A IDEA FOR PREVENTION OF ACCIDENTS IN CLOSE AND DISTANT ENVIRONMENT: PERSONAL, GENERAL AND SPECIFIC TEACHING**

To have personal/specific prevention pro's check the close environment, situation and physical and mental conditions of the families, individuals and workers environment. Sort of what is or might be potentially dangerous and tragic if happening. Than the pro educates the involved on how to stay out of accidents and what can be done to handle prevention well and what state of mind is good, such as 'considering before to act and where to not be impulsive.' And what about free flexible (shopping etc.) transport for elder and disabled/ill citizens. Luxury? Yes, but cool even more. I think like much cheaper or subsidized than Uber and even to be able to pay/get paid for relatives/close people driving a hand of help out.

Some drink regularly, some places and conditions have slippery roads and mist, some narrow pedestrian next to busy roads, some people clime their stairs, others are distracted, others are impulsive people whom think they are in control while interpretations can be wrong, also where are dangerous places and when, and what to talk to whom and where, also boiling water etc. fire material and tools etc.

Also how to create modern domestic serene social atmosphere to act on problems and how to prevent them what to act with the wright state of mind (communication, parenting, relationship, the country, the world and friendship. Also how helping out and where to get help. And to be prepared for natural/industrial disasters etc.

A quest is also how many accidents can be prevented by technology and organizing. Instead of focus on robots, why not make us superman robots by giving us some as-clothing gear to (be) in safety measures what brilliant as preventing a wide range of close environment safety factors.

**Monday, June 9, 2014**

**FAR OUT.?: TO RESTART THINKING FOR PARACHUTING AIRPLANES IN EMERGENCY SITUATIONS -TO BE ABLE TO SAFE LAND**

I remember some years back I started to think balls in increasing size can break the speed gradually, while then special sorts of parachutes with cables and material such as graphene or so can somehow unfold to lift planes down safely.

The parachutes seem to have to be fired in the air away from the plane... And about the planes of this future, well, out of graphene, super light and super strong, so parachutes work to safe land the cocoon of them after 'weight' dropped. Also for helicopters.

Of course if airplanes can safe land it means these flying less planes need basic steering to be made up, steering what knows where the distressed plane should best safety land.

One reason for planes to be in such no flying disabilities are bombs. We paper push technological inspiration how to 100% detect any explosive material at any price tag, before in any airplane or secured parameter. It is not difficult to recognize explosive materials, any material/object has an own way of embodying depth broadcasts what by lab/material/object experience, makes a clear appearance in quite simple guard technology.. And of course to secure air-ports and regulate flying to the wished max.

Here you go,  
HAVE A NICE YEAR(S) on this one.

## **TO MAKE HELMETS FOR DRIVERS AND PASSENGERS**

Helmets for passengers and drivers of cars and their passengers. And for the mind(s)talkers. Just kidding.

For those who want can protect themselves now with kind of helmets for bike riding or so. I also think a car should at any speed it can drive, be able to protect the driver and passengers, somehow ... Full on cocoon air bag etc.

**Thursday, December 5, 2013**

## **TECH ADD TO PREVENTION OF CAUSES OF ACCIDENTS ON THE ROAD AND A SHORT EXTRA LECTURE AND SUGGESTION ON (RE)SOLVING IN GENERAL**

Here is one about lights to shine 'on' bike riders and pedestrians. I am also a believer of compact sensor and data transmission to exclude road accidents. ...Here, it is going to be law to have to monitor your driving. Well, if this tech can also include a noise or specific factors about weak road users by means of 'safety/prevailing sensory' based auditive/verbal warnings. Including weak road users around a corner/turn, etc. This way weak road users can wear a gear what makes the drivers around explicitly aware in a dynamic, distance, simple yet road knowledgeable way about weak road users, as it could and should be. And I add drivers must be prevailed to behave on(to) the road. Here comes the extra lecture on (re)solving

: I do not like top products/brands to cover market purpose in mediocre ways, I find that standards are basic public science with best some name

so makers are centralizing on the potential basics wished for and the theoretic field advancements. Road accidents is a tragedy field with a 99a100% aim to prevent and to protect/prevail as 100% as possible, just like all other 'humanitarian' challenges. Good luck and in advance: thank you to also be bloody serious about this tragedy field.

**Monday, May 13, 2013**

## **MORE SAFETY FOR SHIPS THEIR CREW AND PASSENGERS**

I dedicate this post to a dear friend I lost when she was working on a ship for Greenpeace. She felt off filming dolphins. Years later this made me think to make sides of ships higher. But I also later added crew and passengers should wear a gear what starts to alarm the ship managers instantly, location of the overboard on radars for instant rescue coordination.

Now, I add crew should get special clothing designed for crew staff and passengers. Perhaps even sort of flexible wet suits\*, and standard light inflatable floating device basic what hinders the least but what essential to save much more of lethal dangerous waters accidents. And a substance portion to keep body temperature etc. vital.

\*: I can also imagine a wetsuit or rather a wearable to be hollow inside and when in the water to than empty gas containers what together create personal floating device and heat for longer period of time. Did you know electricity can come pocket size electricity source, such as by natural gas or something more powerful into electricity?

This seems about isolate against the outside cold by layer(s) in perhaps very innovative ways I hope. Something what prevents coldness to go

thru some sort of coldness neutralizing shield layer for clothing or housing even. I presume it is coldness its 'off button' I am hoping for, but I also had static electricity frontiers in mind. Especially, a rewarding fund for ships to get subsidized to make the transition to safer sea and other water work. (And do something total against slavery, thanks.)

**Saturday, April 27, 2013**

**Products where for costumers might be allergic or ill by, a system of warning. And a new era I introduce about non- and high cuisine dietary new reality.**

Products where for costumers might be allergic, a system of warning seems sense and easy public/corporate scientific encyclopedia. Foods which have negative effects on patients. And when we notice the technology and research interests, a new food products law can make nations define action for all ill/diagnosed patients and what they should and shouldn't consume.

Illness and diet are much linked, and are a science field far into knowing do's and don'ts against most illness. When you for instance have MS than I advise we should learn to check/sort foods systematically on their effects factors, and work out in the lives of the MS patients their helpful diet dictated well by present science. MS patients their helpers/shoppers/Cooks helps to shop on pinpoint technology and prepare nutrition/meals what exclude negative and include positive diet factors. Include also smoking for this specific illness group, smoking is very bad for them, in this case to simply treath/try to unsmoked the patients directly with Champix. Etc., some fats and sugars are serious physicality stress factors, and thus contra advised for MS patients. So on, what to and what to not as basic literature/manuals for each diet

sensitive illness and the prevention of illnesses. And thus a universal gear/technology/institutionalizing for instance where so one can scan any product and simply get advised on whether to buy or to avoid –for all diet sensitive illnesses and cures.

What I want to add is we must make a field of mass 3th world allergy/dietary testing/science. I simply sense the 3th world is like a new discovered population a new population. I want the field of allergy and diet related affects, to protect the new markets and small markets, especially for instance the African one. I want us to protect new market interests against addictive mal nourishment products priced critically/decision ally expenses, no to bad industrial foods in the South, instead, good sane nice full filling non capitalistic not budget debilitating good new market industrial foods, as in present western “junk food” to get competition in the South and Western world, by cheaper yet much nicer, budget friendly consumption of super good meals, that is a Nobel global wish/field/solution I stand against all ill industrial/capitalistic mal insane food products.

Here I said it, either sane or no market left than perhaps masogistic fools shopping like we know out stubborn pigs by principle, but not. No longer main nourishment stage of people we call neglected victims, and high cuisine industrially low budget ruling the main/favorite diet markets whether Western or present 4<sup>th</sup>/3th world and new market interests. Bye buy now. And good nourishment show on us about our weaker/sensitive markets. Sane/nice/super hip quality food is possible to replace and compensate the present dwelling victim souls debilitated by stupid/bad industrial/local meals that is what I wish, this is what I stand by on my South its ground.

Anyways, diet/patients link its great field. Shocking is that science knows it all but works out for almost no patients neither is science working out to prevent the illnesses we in theory hold in theory all required means to prevent and treat us as gifted as the science about dietary is talented.

There are few stores now here in hell what are specialized in nutrition's for people with allergies. :) But, really, it is a bout diet of all diet advices for illnesses their patients do's and don'ts in diet.

I add here for my global 3th/4<sup>th</sup> world charity diet modal, about allergies. I am weary about feeding the underfed humanity without being expert and prepared on allergies and any physical psychological side effects and effects.

In my global full diet modal/concept, illnesses and symptoms are diet/nourishment factors. Here in lays the must to make sure what gets prepared with our western crops, to make sense scientific wise to be sane as possible and of high standards and expertise. I remention here as top health requirement the modal/concept piece of the neutralizing of the pesticides what commonly stick on or in our crops is a basic practical detail quest to R&D with what effective and efficient ways we want to undo any crops from external pesticides on them. We need to get to the bottom and conclude science on the global free full diet for the 3th and 4<sup>th</sup> world, especially effect(s) wise.

I add here I love Africa and Africans allot in general. Thus I have an instinct to protect them from the lingering industrial world what would wish to lay in the future African social stores. I say no to any ill making/bad alike negative mass receptors on for instance junk food/drinks. To all fools and grinses but not to the humanitarian world. I tell you upfront that I work against corporations selling dumb stuff to

people with hardly money or to those whom it means it is spend on as essential. At least give a damn rich salade with it for free. So to speak, healthy or not in or brilliantly competed with eventually hereby.

Sorry to any losers of this piece, but know I am in love and I am now on quiet angry on the past of commercial take out prepared meals. I just see no interests you guys have what not even remotely important enough to be preserved. Really, sorry, but I'm sure noone of you care for anything of yours, and we the solvers so wired in on the good things and alert on present harming domination of non-culture prepared meals industry. I love(d) you too but I don't want the present to get even more out of hand, instead, to be compensated there where present victims are happy with high culture cuisine prepared meals landing in the markets where prepared meals are chronically disabling community. Just competition, does not mean you cannot survive in the nearby future but to be open minded/inspired to higher the fast-food/snacks culture along for health benefits. I remember I thought when Mc Donalds started to sell salads. I thought it was a brave nice move, but hardly anyone is ordering them. I help you by tipping to lower the salads their price by half to fair price for just them cheap portions of vegetables, this way people can afford at least your salads and when choosing on their budget, that they chose your salads. Salads, not so satisfying as a burger, but perhaps to put some substantial green in them to avoid to put expensive meat in them but a cheaper veggie solution and nicer salads sauces. The way to make a salad taste and fill and cost so present low budget burger addicts start choosing for the extra salad or whatever sane nutrition or for free. Good lesson this is.

**Friday, April 19, 2013**

## **IDEA AGAINST DEATHLY ACCIDENTS DURING WORK**

Sectors should collectively gather their experiences with deathly accidents on the jobs, and create specific courses to prevent specific workers to not make the same mistakes as their unfortunate accident colleagues. With exams preferably but little information. Also to prevent death causes by 'securing the specific work projects and the situations of places' by practical courses on each work situation. This can be construction sites.

These mean a safety course to all the exposed workers and exceptions by the sector what also associated to the work site. And to raise the level of safety.

Check the tires of the vehicle on grip when it's raining, and do not drive quickly when it rains, especially not when the road is turning cause these road places are extra dangerous in the risk weather conditions. But also to let machinery be extra carefully checked and with simplified maintenance. Can machinery (in general also) have checks every year or time they'll be used, like an automatic check? Etc., general briefing on large vehicles, integration of time to acknowledge the risks and accident prevention tips.

But for instance also people whom work in heights on construction sites to close and put higher safety norms. To peruse the construction/industrial work sites and improve consciousness and in pursue to safe work situation(s). To brief all dangerous spots and machines, and also on the moving and new dangerous spots and leaving a technical intervention (fix etc.) safe for the operators.

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

## **DEMINING start OF QUEST**

A demining bulldozer. It seems sure to me demining vehicles let explode mines as driving over the affected areas.

This speeding the global demining.

Think of what can come handy from out of the vehicle such as pressure, air and sand and objects. And my second lead in Demining is to submit the suspected fields from the air to the ground with for instance air pressure cannons to trigger any mines in the ground beneath.

**Thursday, January 15, 2015**

**FROM KILLING PHYTONS AND CROCADILES WITH BATE TO CALCIUM IN FENENALINE DRINKS TO SANE PORN WITH CONDOM**

Crocodiles and pythons etc. seem best to be killed by small radius bate. Traps. This bate to be not attracting more, but to work in radius.

Have a nice diner instead of being the diner.

**Than phenylalanine drinks to be add calcium to as regular consumers of this sort of substance. Phenylalanine draws calcium to in order to be neutralized/absorbed, if not enough calcium in the body than phenylalanine draws calcium of the bones. And porn without a condom or possibly neutralizing liquid, to be illegal and prosecuted.**

**Friday, January 9, 2015**

**HEALTH INSURANCE SYSTEM, WHY NOT SECURITY INSURANCE SYSTEM?**

It's quite obvious our police and intelligence services don't work to protect a person or company, or whatever public entity.

Well, I think this calls for a security-insurance care system, where all pay for in case they need protection just like we pay for our medical insurance and home and goods assurance.

Well, what do you think, suddenly in a press fight or bad attention or dealing with a heavy law case or troubles at work or in personal life, etc.?

Call your security insurance.

Things such as security tech, alarming gear, dislocation, private detective experts work to find out who is behind the harm, but it can also come with IT detective's etc. gear/service, guards, etc.

PAPARAZI AND PRESS SHOULD NOT BE ALLOWED TO STALK AND ENDANGER POPULAR PEOPLE NOR WEAK CITIZENS.

## **RAMP PLANS ARE NOT YET WHAT THEY SHOULD BE**

**To add to my original ramp plan essential to separate people of origins and religions in camps, because you do not put fascists with Jews, for instance. Well, same counts to divide good people with bad people, by privileges such as special medication and why not allowance of weed smoking but then again a privilege to nonsmoking nor drinking, but on the other hand governments need to allow heroin per license of user but only registered users and to prevent illegal criminal motives in the chaos and despair is to provide drugs as government.**

**Also, foresee for instance weed smoking in the good people parts for instance. (Last revision add:) Dominate crisis refugee places wise as with peoples factors what prevent race/religion commotions what seem to me quiet serious, rather than prevented with required bits of brilliance.' ...Why is politics all about lonely politicians what come up with some piece of retard on serious 'humanitarian' problematics/opportunities. Is it not quality approaches and results we want.? Thus political creating is surely a new field as at this political present, field problematics getting attention get not a fully created concept but perhaps sporadically a good modal failing concept opportunities. In any**

**way, when authorities/experts have a problem, I expect enough the precious asset-common sense in pursue to solve the whole problematic with if possible, ‘humanitarian grace’.**

## **SURFING MORE SAFELY THE BIG WAVES 22-11-2015**

**Watching surfing on tele since some time on my few outdoor channels. Well, it is finally clear to me there are big dangers riding big waves. Oxygen is fears when under a movement as such when fallen off the board on the wrong moment. Well, invent breathing under water after falling. I think some kind of bags with air. Not bottles really. And why not a ‘to the surface fast’ inflatable wear system. .. Anyhow the surfing world will get resolved/solved off the risk of (big) wave surfing, and I have found something today what might help in the good direction for breathing under water if falling into a big wave: Tritón is the brand or product name. It seems it is a non-bottle way of underwater swimming and diving. It has like a short tube in front of the face, and it provides oxygen to breath. Well, this would not be good for falling into a big wave, but perhaps if perhaps differently designed, a wearable head cover application could be good against ruff environment such as underwater in a wave while providing breathing possibility. This invention would be cool temporarily for people of very polluted areas.**

**HOME FIRE PREVENTION SENSE, A PROB SOLUTION I REACTED ON YEARS AGO AND JUST ON TIME REDISCOVERED OF ME SO WE CAN READ IT HERE**

**Domestic fires, well, I thus hold since years the sense to develop alternative low budget professional water based fire prevention market and law making. How to finance as oblige is not my concern, my concern is the technical factor to tolerate heavy indoor smoking but not fires and fire place but not real home fire danger, and especially with some revolutionary low budget technical innovation how to let detect real home fires only, for the simple yet electrically safe water-tap plastic tubes home/life fire security solution what closest I reasoned to become reality and thus safe life's and homes as fieldwork/politics/financially as diplomatic as obvious limits. New market to you too, and hurry and think of gov/assurances to trigger financing of this must – your licensing/moralizing product solution.**

## **SUPPORT FOR THE 1<sup>st</sup> 3<sup>th</sup> And 4<sup>th</sup> World Modals Etc. Chapter**

**Thursday, October 9, 2014**

### **AMNESTY**

**Since months I wonder how special life is. It is a onetime reality in space, in the odd, well, we have not been made to this. We life a rampage of personal dwells off our humanitarian normality and brilliance.**

**I just saw the TED.com video of the women inmates whom are locked up for decades or life, with no chance of parole to release them enough.**

**People are killed daily because of the unintellectual, noneducation/non cultural -barbarity.**

**We have not been made to Humanitarian common sense and in depth reversed psychology. We are born/released to fail, and no one shouts about all our failures. We are mistaken with what can only be called the evilness of denying 'humanitarian' education for functioning as collective 'humanitarian' society.**

**I will stand my man all I can and think it every time, amnesty is great. But to me it means we get good at fixing people and the mass and conflicts.**

**I do not say all are ready to be released, but neither should they be killed and not locked up in standard prison for the rest of their life.**

**It does not matter to me how evil someone got, if the inmate is proofs to be good and recovered as person should be able to life with chances and faith to rejoin this wonderful world its beauties and glances, and function as humanitarian. But on this book's watch there won't be killings anymore, nor serious harms. Gps all is in the hood for all to trust and rely on universal justice and protectio by lie detector law&order basics+tox.med. analysis digitally in physicality. I am of opinion the truth is something for solvers, what with the truth is by humanitarian solvers, and following, the people.**

**Amnesty, I am after something big, I want many of the now stuck to be given chances and faith, where ever they are captivated and by whom ever, no matter what judges and their equal sociopathic juries have made of a mess with since ever.**

**Here I add for the world to take action against authorities what punish outrageously disproportional and by lying. I advise for GHLFMM and the world of the free and good, to show that unjust injustice and justice cruelty as such is shocking, really shocking. We will wire in till everyone has proper trials and minimal as up building punishments while a change of hearth institutions and society all can trust on. Where needed in great professional goodness infrastructures. The purpose of punishment situations are best to be 'humanitarian' and recover what can be recovered and stay safe during and after the punishment.**

**But this is half the story what needs to become reality worldwide and cross convictions and practices. It is for punishments of the highest punished crimes, some place these crimes are terribly tragic murder cases, in other equally highest punishments is more often for non-proven crimes of offending the sacra religion there amongst highest punished among surely also murder crimes, well, these highest present punishment is the Death Penalty in various forms of to me equally outrageous. The Humanitarian humaneness professional goodness principle is to not punish committing equal to the worst crimes their guilt and responsibilities, as in 'do not kill'- a condemned murder prisoner, as then you are also guilty of murder (in certain Death Penalty regions even more guilty by sadism and unhumanitarian public killing the convicted.)**

**I just tell you all me&my Dream Teams of (re)solvers will R&D&enrole the stopping of Death Penalties and to punish (only the truly lethal crimes) to life sentences for extreme murder convicts, but I can tell you no life sentences for not even proven and knowingly the convicted in unlawful convictions, there are most and all.**

**Death Penalties by the time we are ready to stop murder of murderers etc. and to set rules to what punished how much of the unpressumable committed religious crimes to become punished only to proof of real full on committed but not the ones for instance on the wrong moment seen holding for instance the Koran what strange but not blasphemy, and thus normal good citizen like most of the so accused while none of their citizens do such a thing as it seems really rare and more like of ones mentally unstable doing so in state of insanity.. We will just want to protect innocents falsely accused by a innocents-device, and not Death Penalty but also not lifelong imprisonment but to show some sense of rational punishments, A-nyways effective ways I&MyDreamTeam do not accept not for an answer we arrive with, more likely to make all presents humane and thus by principle no longer kill convicts and especially not falsely condemned and.. the Koran your Holy book, Allah and Mohamed both understand a person can reach a point of temporary insanity and be self-dominant to both, but is it not all the moments their showed us their grace and humanness and forgiveness these qualities to show your mercy on an insanity attack criminal to be in jail for an extended reflection time but when these regions and the diplomatic explainers what and how we need reform into for instance ..we need reform into for instance official Global innocents protection (mobile) court what in order to protect false and over accused or sentenced persons world wide, and just know it'll be able to proof good people innocent and defend irrelevance of their personal imperfect life course moments or overpowering circumstances, etc. to the bottom of extreme and surely to the top(s) to stop all Death Penalties (worldwide). Justice is based on truth and educate**

**judging, mine will approach with how to know the truth and nothing but the truth. Consider it done but on highest levels of decisional leaderships and will be about how we you for sure to stop and become real and God fully Devine reasonable. But not just, it is the population and convictions etc. what are also of your present outrageous extreme cruel ability to make die a criminal etc. no judge nor law of co-existential morals and high values to not feel sick just by the thought of having your justice&public want any person experience to die unnaturally murderer self (not) by to us murder guilty criminal.. Just to say, on it and to the bottom together. Good day.**

**YOUTH, KIDS AND ADULT STUDENTS WITH UNRELAXED DOMESTIC SITUATION TO LEARN AND DO HOME WORK, SHOULD BE ABLE TO STAY OR COME TO SCHOOL TO DO SO AND TO RELAX**

You will notice I wrote about education, modal to solve material poorness of poor kids, youth and elders and as for against social isolation, but also against harassing kids and youth and to heal the harmed and the harmers. Recently also on the news of China cities with school shortage and families with formalities problems to start organizing alternative education themselves (rather than no education), etc.

Well this time I reminded myself I thought year(s) back for kids, youth and adult whom go to school, to be able to come back or stay after the hours in a relaxed atmosphere, to do some homework and study some, and to stay and eat (warm) meal why not, to drink water, but most of all to relax, etc. I add that each kid deserves the basics of quality supplements as well. But of course luckily I do not see reason to not be able to foresee all with the great basic supplements, here-by you'll see.

Allot have no relaxed domestic situations, and are in need for at least a couple hours after, and some in the weekend. It is not school like over week day time, but rather special, like the school become good home moments as well. This is also important perhaps for kids whom been bullied\* to recover and gain territory. It should be not for all students but the unfortunate in need for quality school time.

\*More on bullying somewhere here.

### (Extra added same day) IDEA ABOUT FRONTIER ARMY AND KERCHIEF ETC FABRICS

My dad was in the army his whole career. Well, many of his colleagues and himself, had almost no hair on their head, only the sides. Well, now I relate to women whom wear kerchiefs', have they the alike same problem? Probably it has some sort of side effect so far. Well, I think it is anyways good to invent fabrics what protect the hair. New market to standard so to speak.

Thus to develop, and show the world how it's made, and easy adaptable.

Monday, August 11, 2014

### **ADVICE TO THE PSY AND POLICE (-WORK)**

Police and psy staff:

It is good the police learn how to self-defense minimalizing the risk for injury to themselves and ditto to minimize the injuries to any individual of the public. Public but also to their outrageous subject. It is sometimes of brutal injuries the present police work does sometimes

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

interventions. Simple math is to maximize control and minimize injuries for the in- and involved. And I advise in another piece for licensing new weapon sort to sanely temporarily make asleep any person perfectly harmlessly but always showing position and use known to the authorities. For psy staff and psychiatric hospitals it is fine to work out of professional goodness. It allows to defend yourselves but it is based on good goods and bad bads, bad news best becomes good news. And not professional goodness puts in crisis, and goodness at work prevents almost all crisis of the patients and public etc.

I remember I wrote to welcome new patients like royalties so to speak. It is to offer a meal whatever the time, whether in group or isolation. And to think what a communication DVD can impress and orientate the patients. And to be 'good' and wise for public things. It is of course communication what needs prudence but is a challenge I think offering allot of potential. (But be aware, you need Fraud alike, not in basic non-science to critical content.). I think it is not just an amateur individual DVD but rather perhaps an international DVD/Do cu. State of the art cures and state of the art ways to explain what is going on and techniques and treatments what can be practiced. And objective, not from within the field, because they suck. It is also able to mention talk is nicer than anger, and also what are the rights of the patient and how to make the best of the conversations with the psychiatrists and staff. Which

questions to ask and how to explain symptoms etc. And for those with narrow memory 'good to ask' help/management. Also about drugs and what these do and don't. A do cu of let we say "3" hours and Encyclopedia book for full knowledge how to be helped, understood and fixed, best also available in the isolation rooms and prisons. Goodness solves people problems in contact with people, stupidity does not. Good news is good, bad news is best also good news.

**Sunday, August 10, 2014**

## **IS THERE NO WAY WE CAN HELP CITIZENS AND EMPLOYEES OF COMUNIST NATIONS?**

Something such a renewable food options, etc. Simple, I am tired and have nothing to add yet.

Here is what I wrote in my GHLFMM Global Humanitarian Licensing Funding Moralizing Management fund of I estimated and I 'make' worth +750B/year. I know the text need working on and I sort of left it behind because really it were terrible years and it was exhausting to think I tried to raise relevant consciousness.

**NK: citizens**

NK and Iran settling down because it also likes its Humanitarian future much more. And beginning focusing on its (own) population their health, wellbeing, and conditions. Military no longer interested to fight and should agree to dismantle theirs. And to become small Nations what benefits status as neutral ground and will. But also the Leader(ship), Military, NK High Society,

professionals, facilities and citizens to become innovated by most regarded Humanitarian mentality and duties and busyness. You can keep your unique vision of for instance certain norms of appreciation or so, why not.

NK's their Nation is found quite retarded but they put guilt of it to their enemies, for the measurements they take against them and because you (do not) spend your time hating enemies wright. But I can relate to the fact governments are something nasty. See what is around us, such is after all mighty empowerment of government means. It is sort of not re-solving problems but rather creating enemies. I fear the torn was not nice for N.K. as in humiliating and not the moderns not best partners to evolve on, you know. But that doesn't mean one is allowed to do bad politics.

I and my staff will take N.K. and Iran by the hand, just like all other extreme convictional Nations. We, will make things wright, because we are good, very good and I presume I gain respect and will not lose it when working on wellbeing and basic and extended stabilities of goodness. Some communication/presentation perhaps useful things to explain to the leading figures etc. GHLFMM-Fund and partners and other expert Humanitarian Aid NGO's will one day have been able to arrange quite some change for your Nations, and your citizens, and also your enemies. It is to change completely of philosophy, it is to understand the meaning of being 'humanitarian'

'professional goodness'. It is not Iranians and NK etc. their Natural role to be in conflict on such critical levels.

No nation is allowed to treat with a nuclear attack, nor worldwide nor regional to destroy and harm each other's, citizens and theirs. To become passive and peaceful, and dismantling all your nuclear weapons and to loose complete interest in such. It seems in the favor to declare and proof to the world you became in basic 'Humanitarian' - what is a very prestigious fascination and you'll see my dear strange conflict Nations, when I and mine take you by the hand... then you are in the best of hands. This will awake Global 'humanitarianly wise and out most influential' society respect and esteem, and Nationally the citizens will be glad to be explained why it is good to stop to be active mass destruction minded Leaders, people, governments and armies, and to become passive and peaceful and the and your people given a good life as soon as possible, as a well was possible for GHLFMM-Fundetc., me and mine to arrange. It is to be un agonized by the western politics and structures, they never gave you respect and attention you require. I do not say they are evil, but not good at 'humanitarian' values yet, just like your trouble causing Nations. Personally, I also hated them when their system knocked me out brutally on miner problems I showed symptoms under their present "taken" brutality.

It is to help your citizens and to change employed, citizens and the children to in basic are commonly 'Humanitarian' mentality and wellness mentality and enough relativizing and compassion for instance.

Your Nations and Citizens becoming nice life.

Become humanitarians and conform with good justice, and opt for Global patriotic peace, as you notice these are miraculous powers.

Settle down and get along with us who will work on practicalities what up build inspired 'humanitarian' wisdom and wise practicalities what really matter and may stay unique charming matters.

It is very important to become humanitarily involved and to mean it.

As leader and other leading figures, to change as still bad dumb Governments and ruined citizen health and wellness and living conditions, will make you gain thru esteem and respect and honest admiration and friendship, and this worldwide if all proof their leaders structures, leading figures, its professionals, High Society, workers and weak citizens, really become professional Humanitarians meaning good, and doing good. Nothing else. This is here by a personal desire of mine and me.

**Friday, July 18, 2014**

## **MEDICAL BRAKE THRU'S HAVE OFTEN NO IMPACT, WE DO NOT USE THE WISDOM AND POTENTIAL**

We all hear good news and important tips, but many do not hear them and certainly do not benefit from the medical frontiers/breakthroughs'. I wonder whether we are academically "not", and why, go viral Heaven' sake.

Monday, June 2, 2014

### **(Add to on 27-10-2014) ETERNAL LIFE, LETS BRAKE THE RULES WHEN THEY WILL EXIST**

HELLO DEAR READERSHIP AND BENEFICIAL HUMANITY, you know Old and top condition and not age etc. getting at best inner physicality.

It is a gene lab (shown do cu of years ago on Canvas TV channel) what is deep on the last obstacles of their development on how cells can stop from becoming older and yes our physicality at best, but this without having side effects of bad things growing. It is all about our 'telomere', who get shorter by age but now can be kept longest at best, but just not perfectly yet. It should result in conclusions this decade or the next (2020). Let us spread their word for real.

Well, I thought it would be hard and harsh to get such in our hands, so I thought to make the cure medical prescription drug illegally, but, under labels of quality with Original codes what assure it is of the label and certified quality. This could be checked on a webpage or by Phone etc. Like illegal brands what protect their reputation. You know some will do everything to stop the product and break through, so I think we have to secure we get it right away when it is ready. I add it sounds interesting to

have solutions what work for longer period, thus not the costs nor regular hassle of daily intake.

About the work to be done to integrate the prescription cure well into our societies we need allot of thinking success to make it good living and with pikes and wellbeing and business etc.

Assign me&mine&field could think for it but on my own it is too far out to start rethinking such precise matters I forgot, but all good for all and universal living credit etc. here in this magnum opus book is a great essential.

Add on 27-10-2014: To reduce the future treatments and medical equipment for long healthy life or even eternal life, to their practicalities. This means to reduce equipment so they cost much less, and to do this is to integrate protocols in them what skip the need for expensive settings nor expensive HR, and so it needs to exclude -hacking and opening and adjusting settings etc.

This way reduced to practicalities, the average and poorest people stand a chance.

**Monday, March 24, 2014**

**MEDICAL PRESCRIPTION DRUGS SHOULD BE PRESCRIBED WITH ANTI-DOTES TO THEIR SURE SIDE-EFFECTS**

Sense, side-effects are dreadful and often sure. Prescription drugs or medical conditions and medical treatments their sure side effects so should be prevented with the cures available.

It be so, doctors should make the connection and these essential cures in connection to illness should be paid back by the medical insurance of the patient.

Tiredness, gaining weight, etc. But with the best of available and imaginable solutions.

I also take the advantage to a problem I often think about. Chemo therapy creates side effects where many decline to continue treatments. Well, not because of anything but does a best speed (perfect condition for great human days based performance) alike treatments give the energy? And good neutral(izing) options could function for resting ... I also wrote somewhere here to prevent all cancers at natural and even pharmacy/R&D best.

Have a good time but with and on state of the art, and hurry for mainstream, Facebook etc., please pin point and sell even perhaps yourselves best sure as sane diseases preventions, so to link mainstream purposes.

I also add I am a fan of prevention as much as all the people at potential risk to get a preventable serious dangerous medical condition(s). Prevention is supposed to prevent critical diseases, so I am in the important cases for full coverage of all citizens at risk, but fully exclusively covered for those whom cannot afford, and where ever.

**Wednesday, March 12, 2014**

## **SOME OF MY CAREER IT'S DIPLOMATIC UPGRADING OF THE DRUG WORLD FACTORS**

Welcome,

here is a topic I have waited to be able to give myself a green light on publishing my givens I have concluded the first phase about the drugs world upgrade I pursue for all involved. There is more to expect but I cannot finalize these reasons for optimism for all in- and evolved, not without a personal team and theoretic and practical R&D budget. I have

more to propose but that is one of next chapters in career. Look forward to these.

It are what I call few first diplomatic ways to upgrade drug making and drug selling and help for the illegal drugs -users.

I put all my factors with a line -

- When makers are caught for drug production I sense there should be less punishment if the drug is of good quality. It means the drug has a minimal of downfalls for the user and the user experience. Not only psychologically and mentally but also physically. And its efficiency. And when not promoting use and selling to educated/experienced users connected to expert advice. And a question: And to release in freedom for less than 1000\$ worth benefit /month, nor for use ..

- Anti-dote medical prescription drugs should be promoted and developed good for the users to use when for instance they want side effects to be minimalized and or when they want the effect to stop to go to sleep for instance. And free supplements boost from the dealers baggies.

There are prescription drugs what are not addictive and have good effect, such as Temesta's/Etumine's but enough available, but perhaps also biological mellow weeds can be interesting. (But they need to be tested in very small piece like a lick or one puff. In order to see how one reacts on it because some drugs make the anti-dotes be much boosted in their effect.)

Each drug has its effects, I am for new substances for instance what drug producers want to add to their drug in their production.

What anti-dote and anti-side effects should well is best to say the best must work on it and not for researches and conclusions with sub motives. An example is my latest post on alcohol use and a norm substance to be invented what can be add in the production process of alcohol products, what anti-dote of aggression for alcohol users I call allergic to alcohol as become aggressive on it.

- I am for official anonymous platform where producers of any drugs can show their production sort, formula and production way. This to be answered by expert advice what is a quality formula and process what has less side effects and less physical side effects, a nicer sensation and upgraded efficiency and a minimal addictiveness. This also they can when caught, can show their formula and its qualities so less punishment for good sense can be considered.

Also where they can look for substances they need to make the formula for them.

The thing is some drugs might be simply disdained and advised to start produce and sell a different sort of drug. See “Sisa” and “Ice” etc. Also a non-stimulation mentality to get less punished. This for instance when producer or sellers do not motivate people to start using, but to preserve a passive and experienced users mentality.

- Sellers whom caught selling should get much less punishment or non, if they provide their consumers with anti-dote prescription drugs what not addictive, such as Etumine and the addictive yet cheap Temesta’s alike of our beatyful present is one. Also for them to include a small booklet to their users with basics of use and to minimize side effects and in case of problematic use etc. With a link to an official site on side effects and what means are available to use with as much as glance as possible.

Sellers should be given access to state of the art advices on the drugs they are selling. Comparable as a user guide and the best anti-dote and antiside-effects advice and in case of problem user experience.

And contra advices what best not to combine etc. And also what state of the art cures of addiction are available. And what vitamins and core nutrition's are to best use for users to support any lacking. I like serious combos. And for instance the fact some people form depression and concentration ADHD illness what might be the cause why they use but what prescription drug can improve too the user's wish too.

Variable in advice should be included. What dose to use non addictive anti dote prescription drugs for instance to lick it to feel the effect and to than use it, and what are their limit proportions before they become problematic.

Sellers who do not stimulate users and new users to start using and buying their drug should get less punishment. And if they make urgency help and advice available to their consumers and make available for instance Etumine and vitamins etc. perhaps some basic foods, should get less punishment.

Well these were my factors so far.

I wish us good response.

TECH ADD QUEST/LEAD 02052014:

SOME DRUGS ARE STRONG AND SOME ARE TOXIC OR DEATHLY. I SUGGEST TO DEVELOP A SMART TESTING GEAR WHERE ON DIFFERENT DRUGS CAN BE TESTED HOME USE. SOMETHING LIKE A MAKE UP KIT.

- THE TIME PAST THE USER USED the drug THE PREVIOUS TIME
- THE AMOUNT USED A DAY OR A TIME ON REGULAR

- THE SORT OF DRUGS (CAROUSEL FOR EACH SORT OF DRUG)
  - THE SORT
- AS RESULTS BEST WHAT AMOUNT OR IF NOT  
A WEIGHTING SCALE SHOULD BE GOOD TO BE PART OF SUCH  
ELABORATED TEST KIT.

I add late but surely eventually working out, that for the governments whom declared a war to drugs,

I warn you to not outrageously imprison nor disrespect and certainly not to kill users nor those making benefits with drugs, even if they promote Heroin and other lethal harsh decay drugs,..

But instead, to react as effective as wise as possible and worldly as in not narrow minded about a range of non-problematic drugs uses such as weed, speed, magic mushrooms, etc. It are the fools whom repress harsh, the users of the just listed sorts of drugs hold amongst most humane and wise citizens and professionals amongst us from left to right from top to bottom, believe it or be violently ignorant. But with no further elaboration to what I outside of this piece first public drugs world upgrade I hold here, know I and my private team(s) of (re)solvers are the ones inviting all governments and entities in war against drugs problematics, to simply expect me and mine to resolve and solve and stabilize, as in to literally unevil the situations and make use at best and unaddicted for instance, and the finances settled down and especially to prevent new generations of new users.. ..'For instance to understand what best medical prescriptions drugs are the derivatives of drugs, for instance the ADD-illness medication what based on speed but is really just like normal for the users and environment etc. to for instance find their ways in the drugs making/selling interests if need be..(lead). I want you to hire me and mine to solve the drugs problematics as they are of

your jurisdiction and government/elected (un)Humanitarian concerns, as I and mine handle such very well if good, but, in the same time I do not invite you authoritarians but I warn who dares to harm drug users rather than to for instance offer them a rTMS and good choice of drugs and wise limits. I also warn against any outrageous harming of caught dealers. I mean especially the government what now 2016 is allowing the murdering of any drug users and any drugs dealers.

Understand that what you do now after you like most other people of 2017'on read this Master (Re)Solver Literary work of me, that if you keep on harming any of both drugs world involveds with illegal&outrageous destructions of peacefulness or living, without hiring people like me and mine to solve it for you as you obviously too angry to do any good in the field and thus to step aside, or else: The diplomatic/political/influential 'world' will stop you(r) sadism and all your outrageous incompetence forms in letting or bettering drugs people involved, as in 'My' world will protect the drugs in/evolved people, cure the users, change the dealers their ways and change the don'ts they commit into our to do's and musts, and we change any makers their productions from outrageous into coolest way to effects minimal side-effects etc. We literally make of drug addicts citizens whom can participate in society if they should and if they want to get High aside that they are allowed and having nice recreational/conditioning means to do so in free time while all together on/off and on for instance nutrition and good to their fellow people, etc. I and mine hold already ideation to stop drug gangs to be in war(crimes) with each other etc. violence of and for drugs, etc. Basically, this just stated elaborated samples of what we do is the steps on the handling/diplomatic authority of the drugs world factors, where as many countries and communities their Law&Order and convictions are

outrageous and contra-productive and costing much capital for no good result.

Let us fulfill its opportunities, as you need to mean no harm, you need to be worldly not narrow minded, and you need to want to help and do this as best global knowledge, etc. Like many 'worlds', it is for your drugs worlds I explain the drugs world and your national drugs problems etc. are what they are and not more not less and we know how to make it confirm values for them and your country, well, but as I explain it is nonsense outrageous anti-drugs wars like the one most bloody anti-drugs amateurism in some South, no, you'll be stopped if not stopping the national extermination wave, and I can tell you people of the world I created and empowered stops such (inter)national outrageous with practical effective success by means required to make you stop butchering drug world, you need a list of drugs what not accepted but foreseen alternative, and what ones are but licensed to only be allowed the best of the best version of each allowed including the best speed as all are normal on it., just like the other psychopathic practices what on real Humanitarian leadership dominance their agenda. Goodness good life, but no more but the ideological fieldwork to the outrageous antidrugs vibes!

This said, thank in any case the fact certain drugs exist, as they literally are the upgrade sparkle for most world bettering careers of past and of our present and future. Literally, without, the world was doomed and failed forever, I'm explaining you.

Over.

**IMAGINE PAPER NO LONGER MADE OF WOOD BUT OF NEW,  
MUCH FASTER GROWING AGRECULTURE SOURCES SUCH  
AS  
MOLDS/MOULDS OR FUNGUS**

Yes, I know, again a beautiful suggestion/lead for the sciences to come up with conclusion AL affective impact answers to this quest.

This is the quest to replace paper of wood by a much more tempting alternative what quality.

As I care (specialized for to resolve the worry internet post on how many trees new paper takes) and so am able to use my knowledge for to inspire and know how to make paper of other than wood.

Paper is made of organic material what substantial and strong. It seems not so difficult to develop new sources other than wood and for such options to be much more tempting than wood.

I so instantly thought of my mold fascination as fast growing source (originally found by me to answer hunger in quicker ways than it takes to innovate the fieldwork to educate proportions, as perhaps nutritional ones may grow in worthless new sort of home growing baggy conditions, ..). After mold I thought of applying ones more the promising fungus as fast growing source to replace wood.

Both grow substantially very fast in realistic and quite easy, industrial conditions, such as space needed, grow conditions materials and flow resources such as what molds and fungus might be possible on. I don't say these 2 leads are the best but they should at least show material factors and grow proportions/potentials what seem up to

demands of the field to replace the wood in new papers with great tempting material alternatives.

To this I add to feel this science requirement as a quest with answers what so tempting, such alternatives then mainly only need mentioning sensationally to the industry to have impact for practical conclusions in the field of this quest. Know I educate this field to say to make successful work of getting news with new alternatives across and have impact as merit. It is often not good enough either to resolve only a part of the necessary research and solutions, but to commit for fieldwork results. Fieldwork results are the importance. And, wood gets sold anyways to better markets than paper.

### **Organ donor ship and the not 2)**

This Morally unquestionable unnegotiable upgrade to knowing your corps its useful organs get to live on with your genes and way etc. It is a privilege to get the chance when diseased but organs needed as useful, is to be able to die (or) know the nice thing about dying in this new medical ethically unchallenging law and saving life's and critically needing a donor organ transplantation and whom by this get it from a fellow human where of the organ is saved and kept functional etc., it is if you ask me, about the fact when a person died as is corps, there is no mystical tasty good news to tell and your whatever physics quite presumable to me to thus to say no corps hold any former owner benefits nor anything than the fact to think about it as by any given chance(s) to donor patients is the best abnormal-normal, nicer news to have part being kept functional and transplanted for lists of needy ones where in significant factors will live on, that is nicer than full corps to totally or mostly vanish as death

meat and blood, also this is if you ask me also much nicer off to donate corps to medical research and training etc. makes avoiding berry or cremation both for being mannered etc. by smart good students their Research Development of gaining experience or becoming test results on factors etc., what makes you become clear and reported etc., who cares after their ones alive physicality gets the nicest way of getting special cool attention by donating your to the science medical purpose, that is the open form of much less and minimally sad cremation as by the cool nice thought of serving science the ways we know variety of purposes and inner interests –as a nice thought in bright wise company and serenity etc. and to be vanished in a specialized expert medicals their special High medical cool place cool way etc. Ok.

I wanted to actually mention here this too nice to fail but especially to be R&D&Started fast pace no years no months before the medical donors/transplantation present to simply get organs much more, it's just a matter of meeting needs and needs abroad .. Clear how and spot and time etc., logic easy expansion just a bit of factors., this is what I expect from the new ruling sense on this, and making the simple morally unethically worrying law. Just read the below here on, it is my original piece for this very joyful global for allover and even to clandestine transplanting organs if they are asked so they do no longer have to do organ theft styles, but for instance an amount of organs leveling with the jobs they get to transplant. Anyways:

**The solution is simple, modern nations and nearby nations to be able for citizens to list for donor ship at accidental/natural death.**

**However those who said no, but if not enough organs enough of donor organs, means having to be probed because of shortage organs needed.**

**So it is in case in real need for organs. So depending on availability and shortage whether used if useful.**

**This, is my opinion.**

**The children, to be managed for in collaboration lists with nearby nations also.**

**China region in particular.**

**So enough organs normally. And this should show.**

**This for the patients, but what with the still active kidnapping criminal gangs with patients with reason for illegal discretion, well, to allow donor organs use from the legal stocks. But requests to be made soon enough. But in real, organs to be made in labs at serial industrial covering proportions at bottom charity and commercial price. This preventing for the criminals to kill for organs to install their rare clients, is to also allow these illegal surgeries to have availability on organ request but limited to demand. But all people should get the best care paid for them rich and poor(est), something for GHLFMM. Regions with nearby nations should work together. And the citizens to have choice when they die with useful organs and needed to save someone, if they said no, than they can still be used if there are not enough organs of people who are donor.**

**If enough people sign in enough to donor ship campaigns, say yes and it still might be not needed as enough available.**

**If you say no you might still be probed if no one else has suitable organs needed for a patient.**

**All useful, died donors are considered, but if enough of the donors there is no need for the hospital networks to apply organs of people who said no.**

**MAKE MEDIA AND SOFTWARE FOR FREE AND ADD EXTRA'S FOR PAID PRODUCTS, even collect 5 box so governments offer them to citizens**

MAKE MEDIA AND SOFTWARE FOR FREE AND ADD EXTRA'S FOR PAID PRODUCTS, even collect some box as governments offer them to citizens.

**Wednesday, December 11, 2013**

**WORK DIVERSITY -MODAL START**

I have had this idea since years. It is for harsh or doll job spots to be combinable with lighter, office or more physical jobs.

It is for a job spots what not so nice to do a whole week, to be covered by a second or several other 'workers' whom so do not mind the excessing of the job spot. Whether office, or physical, or simply very doll or sitting, etc. If a group of 'workers' complete a job by exchanging each other's jobs their responsibilities and qualifications to so be able to for instance each work half a week of each other.

And more.

It is a good idea to start thinking profoundly towards, but also of course I am for managements to improve certain job situations within their work conditions.

Some office people want to move a bit, some harsh physical job spots benefit the job spot is physically not too demanding and actually done by a group of people whom stay doing the job situation cause one day or two is reasonable for instance. And the people with a tuff job might get other job(s) for the rest of their week etc.

**FOR THE WORKERS**

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

I will spare you my description of what an average work looks and feels like, and what it takes away after a while. Well, it is not the first time I come up with modals and concepts to make workers experience a much nicer experience of life and work.

My ideas for workers got extended: to be able to go on working holidays. It requires flexibility from the employers, but it also requires a job network or some kind of modal for workers to have work/revenue/pension-accumulation going on, internationally. And it requires to make of workers good working tourists or home stayers.

I am thinking of to create a new job agency sector segment what is able to give a lot of work worldwide, but especially for workers. Work from where ever you want, or where ever you want.

A sort of company really what employs workers from other companies for temporary working holiday projects of and with the worker(s). Also even fully facilitated, as in if someone want to take a (non-holiday days) brake at their ongoing job(spot) at home, but still have a wage and whom want to do something else for a while, while being on holiday. At home or really on holiday, a job. This should become fun and officially easy to convince the employers and contracts, to sign for a working holiday release the worker temporarily of duty for a specific time. What is a nice viable job to do on holiday or at home where ever you are? I really feel for workers, I see them get older looking working year in year out the same tuff job spot. I find it immoral, but working is also fun more often. I want to add this brilliant global aim where my other inspiring ideas are for the wellbeing and sake and cope and needs of workers. I have a strong bond with the topic, and I am sensitive to what happens to the workers in the future, I see a world full of options to create modals and services for workers, good time what can balance the toll of doing the

same week in week out year in year out and decade after decade from young to old age.

Thanks to whatever helps me write sense. Everything goes so slow and critical, poor workers of now whom cannot travel nor enjoy life for a stretch time of period, whom cannot imagine else then their job spot they hate or endure or what abuses them, poor workers of the hard&office job(spot)s etc. You workers of the tuff miserable job(spot)s environments are heroes. But gradually there is hope from out of my career, for the workers.

Something I add here is an older idea what is to create offices for workers to get advice etc. Local lists where one can go on a fancy dinner and advice on how to book and eat even, where to find a list of anything regional and global. Also when workers a psychologically under impression they are unhappy and cannot cope well on the job (problems etc.) anymore, etc. to make it a field specialty for psychologues to profoundly learn how to help workers psychologically but also with the best of supplements, also where to find the best prices compares on the web, and things like all listed courses of the region and one on one chats on what course would be relaxed to do of interest to do one of course, also where to go for nature walks in the region, etc. where to find a new home etc. garage bike loan retirement fund, etc. where to get a cheap massage or a list with each regional sport club open to people and short description what it is like to sport there, etc. super ways to lose weight or gain muscles locally, where there are cinema's and subscriptions via email, etc. health tips via email or an extended global list magazines and journals to order, or activities for singles, etc. etc. etc.

- At no charge.

I want workers to be treated like stars but jobless people also, but to give them special attention.

It is to understand how to make it tempting and easy for workers to pop by after work or via mail or phone call, to get assisted in searching for something fun or else or specifics. Workers should be introduced and get a short list service manual and monthly magazine or via email.

- This service paid by all employers via a small local or regional financial contribution for all workers there.

This for variety of the work career.

Working should be all about worth doing, really.

And know I wrote accidents prevention piece to prevent work accidents, etc.

## **NOW HOURS LATER I CAN HOPE FOR A HEALTHY FAST OVER DAY GROWING EATABLE MOLD GROWN IN...**

So call the responsible for changing the situation of hunger and absolutely tragic nourishment problems, of the at least untalented, but I do not blame collective retardants at this present 2015. Mold seems a good way to provide nutrition for now, actually. I started of here by promoting to participate to the quest of finding molds alike what eatable and sane, what grows fast over day and only on a bit of self-generating/cleansing water. In materialistically uninteresting plastic bags with conditioned inner layer.

It is far out to think frontiers of mold alike will become perhaps crossed with fruits and vegetables, to become nourishing mold growing overnight, and nourish the poorest etc. of these days before responsibility and power and merit is made into action to nourish the 3th (and 4th) world. It is a quest with hopefully revolutionary answers and rapid reach. Read now about my post on B-grade fruit and veggie and a modal to reach with these the hungry.

Sunday, August 18, 2013

### **BIRTHPLANNING**

DO NOT EXAGGERATE and also some tech strategies:

To give some facts that not being parent and not having too, even when pregnant (giving for quality licensed/monitored adoption), can be a nice thing in life. Also to give something in return for birth planning moralizing.

## **MODAL PURSUE TO EXCLUSIVELY OFFER LOW WAGED WORKERS AND SOCIAL INCOMES TO INVEST SO THEY GAIN THESE CRUCIAL COUPLE HUNDRED EXTRA REVENUE ON THEIR MINIMUM REVENUE**

**Simple for the buffer structured income people, is to reserve one or two months of wage value to invest in a specially low revenue investment fund, where with they automatically without giving in monthly revenue can make few hundred worth. The benefits should be a couple hundred buck each month. Let us say 1800Euro/200. It is my dream to see lowest revenues on Earth such as owning one dollar as getting 2 dollar, it becomes 2 dollar by a perhaps definable investing modal facility.**

**Investment is not high risk, investment is abundance of profitable ideas available. Charity companies is something I invented as being a commercial opportunity and business where of the benefits go to a specific good cause. This can be the 1=2 and the 1800=200?**

**Tuesday, August 6, 2013**

## **FLUOR, MORE THAN IT IS DOING**

I just saw a documentary on several topics and one mentioned to putt toothpaste on a mosquito bite and the itching stops it said. I thought, Fluor is getting rare in the future I thought it a bit thru in a minute. I just thought to no longer put Fluor in toothpastes but to create a spray what for sees Fluor for the teeth in much more efficient ways. Or even may the natural science be wright, to totally forget about Fluor. There are perfect supplements what do not require the rare Fluor. Of course that can

contain toothpaste sort of anti-bacterial solution. It seems toothpaste seems a waste cause only a bit gets absorbed, but it will take to change the composition as matter how to deliver Fluor alike. Allow me, dear tooth pastes sector, to prepare the people for you who wishes the same: Fluor is an old thing what no longer found essential if we want?

**Friday, August 2, 2013**

### **DUVETS FOR INMATES, REALLY A GOOD IDEA**

Here we are, back at an older idea of me: Duvets for inmates. I thought it is an impression of goodness. It is a good gentle time we're talking about. In order to prevent convicts to put something in it, it takes a simple radio gear to scan it on irregularities. Call this brilliant.

**Sunday, May 26, 2013**

### **A LEAD FOR A THERAPY TECHNIQUE TO HELP LIGHTLY DEPRESSED PEOPLE**

Lightly depressed people can perhaps be helped naturally by being asked to participate on researches supported by the government.

Less demanding than writing alone as patient/participant, someone talks with the person and records or writes the interesting things the depression person/patient mentioned.

I made this seemingly therapeutic inspiration by someone I knew who is a mom and had young adult kids where of one did not like his study course after all. I made few questions for the slightly depressed friend to help the government aims to achieve their wellbeing interests. (My questions what she perhaps still have on a piece of paper back then, the paper was

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

far from perfect to my impulsive elaborated questions and their state, written while myself I had psychological problems.)

Can a psychological help give personal real assignments against depression? Hope and opportunity, Here an example of a theoretic question: The question I make now: What values and norms are good for nice successful teachers to have now a days? \* such simple question you ask it to a simple care-in mom with a slight depression, etc.

But it can be draw something if the person used to draw before dressed, stimulating professionally any making.

To make the somewhat life depressed participants feel useful and to sparkle passion back in their will.

\*: Me helping to answer this question: As psychologically as good as good and to embrace their inspired wise students and not be so damn fashionable or narrowing out on social codes. To broaden their minds by recognizing more (and other) qualities of talents in education.

it should be being kind, nice, gentle (-man/-lady), care-in, charismatic, worldly, good advisor, good ideas for special lessons and class trips, loving, stimulating the intellect, convincing bads to have a change of hearth, Humanitarian.

Another lead is to try to reach fares down the top back and try to scratch a difficult to reach spot. It helped me to be distracted while physically and mentally being challenged.

**Monday, May 13, 2013**

## **A MEDICAL QUEST AND WELLNESS IDEA(S) FOR MS**

## **PATIENTS, AND ALSO A CONCLUSION THAT MANY TREATMENT AND BEHAVIOUR FACTORS OF WELL BEING AND GOODNESS FIELDS ARE IN NEEDS FOR UPGRADE/ENHANCEMENT**

I dedicate this idea to a dear close person and close friend of mine who was a Multiple Sclerosis patient. Sometimes I felt physically tired and my physicality very unmoved-able by medication I was getting. Well, at a certain given one of these occurrences I pressed my head down by instinct, and I felt relief and cure, it relaxed and empowered.

I hope it might be of use for Multiple Sclerosis patients.

It is with some more words I want to mention MS patients are fragile and need all help they can to stay stress free. Certain stress is out dated to call naturally a benefit of handling danger situations. And I think at least MS patients should get a medical treatments what prevents them from worrying stressfully. Also,

I found out the harsh way, there is an absence of social reality, and skill for the close environment people frequenting the patient, and for the patients to control their environment by telling what psychological situation of visitors and relatives and living environment may not happen at/to the patient. To explain to all (and to hand over a little manual\*) about what is good behavior and about the fact critical situations are best not directed to the patient stressfully but as controlled and calmed down as possible by for instance a letter what can be read by the patients their private trust person/people, seems a good idea also. And I know a MS patient needs more social authority, no is no and to be respected without the patient gets involved in the matters of stress. I must say, it happens to me often I find existing care and medical care and fields under developed. It is then also here I show it is to the medical explanation of a disease, the people/patients their experiences, the description of the

state of the care for and at them, medical and psychological treat there is already, and what studies and researches and developments are the frontiers to cure(s).

This to create a culture of 'upgrade projects\* and upgrade involved' about global and national interests in the field of wellbeing and (basic) goodness fields, to upgrade the state of fieldwork. Someone I met introduced me to an Art study direction Graphic Design, in a very impressive way. For her final exam she made a book about a specific subject. It was I think about 'having a car and being a driver of a car'. I never got the chance to peruse her work but it seemed she had lots to mention in it, researched and was creative. Well, such is one sort of experienced dynamic fields such upgrade teams need qualities of also.

What upgrades also need is they should determine what is useful to try to 'print' for the involved, but also what is not good to give nor to mention, and especially how to say practical essential communication nicely. (This needs Fine Art rules I found out after I quitted my Art studies in the free direction.) Each makes a bit its own after some basics like 'do not marginalize a person or subject', 'try to do good, goodness', 'cure if you can', 'help wellbeing and goodness into (Your audience/public.) people their life's if you can/want', 'create wellness', 'think of what the people at your work experience thru it and make it rather part of the 'humanitarian' solutions than only of (a) humanitarian problem(s)', 'associate generally for any problems during the progress of making', focus on (diet etc.) preventions and cures etc.

Routine and creative pursues for leads seem important to the (signal) field.

Etc., you cannot imagine but what findable by luck. \*: Upgrade projects seems not do-able by one team it seems to me as it has always a luck factor, it seems to me a wellbeing field upgrade/enhancement needs

several dynamically routine teams whom know many good tricks to make wellbeing work, like 'to print something for the involved and how and what not', etc. work experience such as 'do's and don'ts', 'healthy company restaurants tricks', etc.

On the other hand is the rather luck factor, to find exclusive, difficult to find goodness for the field, creative results from a greater group to increase the luck factor, should lead to draft to the authority(s) in the field their 'upgrade management', whom make of all input the best output for the field. Furthermore idea is something I told my relative, he back than would be good with a sort of MS travel agency. My idea was specialized mobility to all sorts of locations, as in MS patient's excursions and holidays.

And to stop smoking on for instance Champix alike affectivity, by a small couple days test on tolerance.

I came across a medical research of Italian a Dr. called Zambani. His wife has MS and he wanted to cure it, so he did profound research and came to point to perhaps have found a brake thru medical cure conclusion. He tested his surgery on a minimal sample of patients and almost 3/4 did not had any attacks worsening their physical state in years after.

It consists of re-opening few main blood vessels in the brain. It is a quite small procedure but seems to perhaps a good cure for MS.

Here is the link of the online news message I found the information at: [www.gizmag.com/ccsvi-multiple-sclerosis-ms-cure-zambani/13447](http://www.gizmag.com/ccsvi-multiple-sclerosis-ms-cure-zambani/13447) does it makes sense? And cell sorts of therapy seem a hype frontier too.

Concluding this piece I want to add I hope MS patients get the state of the art natural, medical and surgery cures working out in their life. I am not an expert in the field but I can surely help us more by referring for natural medicines such what and what not to eat and what to avoid of

toxins. For now. A book is called The Encyclopedia of Natural Medicines for Canadian. Here is the cover picture of the edition of few years ago. Highly interesting. It is so influential a student of medicines took the knowledge as brake thru and very useful in the encyclopedia and took the decision to specialize in natural medicines(natural preventions and cures). What I do want to mention also is I add to the encyclopedia (luckily again), to buy preferably biological GMO-free natural products, it makes a hell of a difference I may surely presume logically.

Of course I hope researches for cures to the MS disease and symptoms will find out most creative ways how to cure and prevent such existential decay. Like the treatment of stem cells or what was it again?

**Wednesday, April 10, 2013**

**(ADDED TO 28-10-2013) MODAL AGAINST MATERIAL POORNESS AND ISOLATION ETC NEW SORT OF FUNDS**

- Stop to loneliness and boredom and material and product poorness of youth, but also elder etc.: al do to finance such below alike nice life time activities and goods is expensive, but, if not for rich countries with a small minority of youth poorness.

You know what, if realistic, motivated involved of this piece what seems at least all a nice and wise fiction also to believe in and go for. Financially speaking, where there is a will there is a way. Well, Nations and companies charmed to realistically frontier in their proportions and own selection of what gains of interest's poor youth, adults and too poor elder can obtain their shopping wishes and special activities for free. Credits can be spend on for instance: talks with a psychological helper, tickets to High Culture, fascinating Fine Art Galleries, openings, visitor to rehearsals of Opera, theatre, performances, hobby clubs, MAX movie

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

theatre ticket(s) about Nature and Frontiers perhaps, if available but what traveling can be facilitated, sporadic fresh restaurant ticket to select, swimming and swimming lessons and some other sports if the person wanted by the person, poetry workshop and lessons and poetry events, mentor contact, sessions with broadly knowledgeable regular social buddies, platforms, forums, health tips encyclopedia like the Natural Cures one from Canada alike, domestic cooking practical courses workshop specials, internet data and video platform, organized camps/adventure trips, touristic variety, free time suggestions, clothing, etc.

I owe for this subject as I just remember I wrote an elaborated text on this idea.

The money and means come from National and International funds what rely on charity companies what devote their benefit and business on this specific good cause. Furthermore can providers and producers donate stock and service for free in form of credit where with their product and service can serve in catalogues for the poor Beneficial's. It is a matter how companies count and distribute their value and purpose.

**Wednesday, April 10, 2013**

## **MODAL FOR HUMANITARIANISM**

It is a global social system sense I made lately, it is if we the donating parties of humanitarian reliefs, to invest in production of basic goods to reach with, healthy, materialistic, infrastructural and other rather professional goodness ones, produced renewably, well, if reached with, to give a "5-er" to a person, and the person can only pay with it to get any of the donating source its goods, created market, and the munt made uninteresting for non-beneficial people nor big criminality, somehow, solid automatized technological autocracy.

- I have seemingly made sense to solve poverty on the level of humanitarianism. It is not working out, far from, but it is seemingly an interesting lead. It is the sense if materials and ready consumer goods are made in quite totally renewable ways, allowing to deliver humanitarian relief at bottom cost and “with a bottom”. Sense became about to make a new humanitarian credit form allowing to give a social income in the 3th(and 4th world action wise) world to the poor associated for the social income. To sell the renewable sources of needed goods to them. This to create an efficient and sufficient circle of means to the poor, without giving means is not letting fall the credited allowance into the new need for funding. Call it workable efficiency. And seemingly also about somehow making the circle diverse by goods needed, the money part is easy, the renewable and invention part of creating needed goods on such innovative scales beyond present world capacities.

Obstacles seemed immediately to prevent criminal and fraudulent interest, and to make the credit perhaps unused-able and given on other markets, such as personally digitally institutionalized and managed by logistic army in certain places.

I don't know if this was useful but I recognized it as a valid structural sense. To be researched and surely meaning here the quest to make a circle of humanitarian accrediting and a sustainable delivering of renewable(efficient and sane and least but good costing) productions for needed goods such as vegetables, fruits, (new) materials for clothing, construction materials and applications -such as my fungus-layered agriculture idea.

What I try to say is what we produce renewably and spatially deep and wide, sort of organically, thus industrial.

To think with renewable energy and for instance mass sea water purification.

If a person is given a credit of let's say 25max. on a humanitarian market, than you give onetime credit and you get it back every time, but you add each time a humanitarianly renewable production its product(s), than it costs not really money neither in our time now materialistically a problem to arrange products and services. Such as fungus applications can be made deep factories in microbiological containers conditioned to make construction materials and perhaps bio nutrition agriculture, and on renewable and recycle based energy and material concept inspired by material and product correctness. To give credit and to provide for it.

### **REACTING TO SUICIDE part one**

I believe medical treatments and supplements are very important, but there is new and more possible.

Participating and being actively part of goodness frontiers is important. Suicide happens when people are unsatisfied. Post traumatizing worries and endure hostility and narrow minded productions and personal troubles and neither have supplements such as vitamin D10 (D3), Methylcobalamin, etc. happiness supplements, yet. Even state of the art leisure drugs to recover instantly by alarming the nearby future of suicide prevention, what needs to become modern. Also dislocation into reliable new settings and activities. The loose of beloved one's and any form of dissatisfaction with life's we do endure depressed.

It is horrible, we life in bright times yet no one seemed to know what life is about, nor suicide, while it is an existential universal 'humanitarian' problem.

Bad news is also important to avoid to give, I bet there is always good news to give instead of making and telling bad news, for the individuals whom seem to be fragile towards suicide ideas.

Professional goodness goods. Anti-depressants are very important but also very dangerous in combination with ruling badness what do not really help and orchestrate in heavy conditions such as psychiatry's as we know, where there even many people committed suicide while supposed to be in heaven on earth for mental illness.

And not for nothing, I think this Magnum opus should be read by suicidal individuals and to prevent such alike.

Good news and professional goodness working out and reasons for optimism are needed. And bad negative situations to be excluded and not ignored for (re)solving suicidal people their causes.

I think financial help like fast loans or change of life situations and participate to state of the fine art activities/environments/experiences etc. More on this topic in a separated Magnum Opus for all suicidal people then. Full body fieldwork practical's what worked out and being implemented on large scale, hereby. It is not the financial factors what important but the field work science at best and perfecting. Now know, in case you want to kill yourself and or others, know you can call the police or ambulance and be out of your situation (if your locality/region is modernly (good) service able, in matter of minutes.

protect it from illegal market to get them badly. Horn grows back. If somehow the market of killing for the horn and ivory would be campaigned to in order for the killings to stop and let's take over. It benefits both reproduction and existence of the rhino's but also allows the both interests to cool down and become reasonable for now on.

23012015

### **JUST BRING THE OIL BACK TO A HEALTHY PRICE**

Oil needs to be set back to reasonable price, for a start.

People depend on it and like the prices are now is like giving all people a crumble. Oil needs value.

Do something for the world while you are at it. But prohibit natural risk taking by all repressing means and basic international laws.

### **WHY I THINK ABUNDANCE OF MONEY DOES NOT, ALSO, GO INTO GLOBAL DONATION AID PROJECTS**

**it is, I realize now, a frequent argument why people do not donate. But it is applied most by government money, NGO's and organizations. I just tweeted as conclusion of years of staring frozen act on what is happening and not happening with the abundance of money of the people;; Enough 'humanitarian' aid requires to create general opportunity for money and goods to become well spendable.**

### **GHLFMM**

**I think I created with my GHLFMM Fund (and –Bank) aspects (factors submitted by field solutions) in the right direction, as if it was all I had on my mind as check list. Ask irrelevant, deliver secure reach, on all field factors with detailed brilliance. Dawn theoretic stage I started using a one liner in my study;; Money is not the problem, it are enough brilliant solutions what are needed. Love**

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

**GHLFMM, my greatest study, because it is outstanding and makes enough Global change a complete brilliant sense as on handling the South.**

## **LOW EDUCATION CLASSES**

**I figured some students just don't want to do anything at a certain age in teenager years in certain lower school classes. Well, why not make them come to school but to not give them class but to let the passive students pass their time how they want. There are some rules needed but I think it is a good start to experiment what they would do or can learn themselves. Perhaps language and social media or desktop operating skills as only course.**

**But also to see education as track from 12yr/18yr a time of 6 years to learn and create anything from PC to communication to music etc. on lowest Highest and lowest levels of theoretic or practically.**

## **12-02-2015 A NEW VAGUE IDEA OF AN NEW SORT OF FUND: 'EVERYTHING FOR FREE'**

**For every person on Earth to get a sort of credit for luxury things by funds like this one. Anyhow to get all the basics such as styleful home settings, full diet etc. but this is a sort of fund owning means to provide services, and can arrange wanted extra's imaginable.**

**A product or a drive in a limo, or a villa style holiday, a ride to work, products etc. Fine, that is what this credit is for, so all are rich and can make some wishes if need be agreed or available. The fund makes money and buys and provides public service means, and companies can donate products and services for free, etc.**

**Gathering charity and capitalistic financing and accept donation of charity products and services. To experience wealth.**

I'm going to make the world imagine to be able to get anything good. To all citizens. For free.

You want a different place to live or stay, why and ok let's have you ... the credit can be earned on the market via the Fund. Credit are wish cards so to speak.

A kid from the (then former) 3th world has the same potential right as anyone else as anything for the right reason and participation.

This is just a start what one day might become gradually reality.

## **Making the ergonomic factored industry up design standards**

**A web forum etc. post reading –what gives away super cheap but super cool ‘ways’ (tricks) to make money of making (often cheapexpensive) quality domestic things to make benefit or to have a job. Such as matrass bed chairs etc. sofa etc. car smart seat covers, toilet etc. anything of domestic.**

**To say ergonomicifiacion of a now cheap down rubbish ergonomic wise sit-tuations.**

**Something else:**

**Sisa**

**This was something particular. I reacted to a documentary on Sisa the “drug”. It is to define a new cheapest hard drug what less or no sideeffects yet being adopted by the present makers of the drug. I thought something with fresh mushrooms, the ones what give a sensation of fun and as if life is a good David Lynch movie. Combined with something I forgot.**

**The existing interests of the makers and sellers are important for this switch to work out I presume.**

**I wish you a brighter future with educate field work change.**

**05-08-2016**

**CHANCES FOR LATEST MIGRANT GENERATIONS IN EUROPE (ETC) TO GET CHANCES TO GET REGIONAL JOBS**

**Colored people/migrant latest generations are here in Northern Europe literally making hardly any equal chance to get a regional job, thus often no chance.**

**Well, I started to think upon migrants/jobs challenge couple years ago, well, this is what I think is good to create in the Northern Europe regions alike a business field of creating companies/jobs especially working with people with a migrant background. I see many of the latest generations are a bit disintegrated and religion wise a bit challenging. Well, for migrant backgrounds to work in companies what focus on the successful symbioses between different cultural/religious backgrounds and nice western company culture what is sort of specialized conceptually into migrant background – integration/self-development/psychology/foreign language speaking able company culture.**

**I anyways learned from subjects I worked over the course of the past few years, is the fact I like the idea of inclusion but also about the great opportunity of working/relation with less normalized or layers of society at risk. I think any good excuse at best to have good/bright influence on citizens their life's and positive self-development and psychological factors what of course (potentially) very serious, to actually be so cool as field, so learning how to make soup for instance is one of the many potent opportunities what I want to become part of all sorts of entities where citizens study/live/work at and by.**

**In this instance of job creation for citizens with a migrant background, with strong religious culture or only foreign language speaking, etc. to focus upon the present reality, on how serenity/goodness/integrity and anti-radical company culture –as in I like to create especially employing companies what define a migrant culture what very positive/up building/worldly/brightly conceptualized as positive companies and especially for peace etc. I want such employers to be so good and great with migrant multi culture multi religious employees, to really have and achieve the business aim to make the radical criminal minded 'poor living' migrants, into tempted/satisfied/brightening/climbing up the ladder of nice personal life, etc. good pro-active citizens what guided at best you can imagine inspiration at certain occasions thru out this book. Also, to work with different languages is normal, I don't like that language barrier do have any of the potential of their workforce. Specialized multi language work floors is in this case for nonnative language speaking migrants. But anyways, turn them unfortunate and low culture brute migrant generation citizens into citizens what get many good chances for super cool job spots culture what offer serious benefits, much like if they get one of these jobs them bullies for instance know they will be much better off. This sort of employment companies should become the new (super) cool alternative for all poor**

**unemployed migrant-generations citizens what if such company culture/concepts/modals define that it is actually fun and easy and cool and super life connection they require as specialized job spots/High company culture.**

**Apart from employment opportunities, I see this group of beneficial citizens should also get great alternative day time occupations opportunities what improves every factor of their present life with super cool/tempting good life achieving-activities with for instance small (financial and material) rewards to participate to High culture things for good life for them disintegrated non-work material citizens, whatever unemployment background but in order.**

**Have fun and a good time in this world with abundance of goodness activities opportunities.**

**But personally I find refugees are acceptable if in life problems at home but I find the North has to provide in the South, as the North can only take in so much till it would have burst.**

**05/10/2016**

**THIS IS A WISHFUL THINKING LEAD ON APPLYING WATER**

**I'll start with the latest, I am just wishing for seawater to be able to be able to be made as hard as glass or plastic but with extra efficient means to it.**

**And my original seawater lesser realistic wish for water to be made hard like ice and harder, but not having to freeze it. This sounds so surreal but who knows some geniuses can make something useful with the both leads here. Good luck on us, and good luck on what water takes to become hard as glass or plastic. I apparently did not include my original lead of handling any rise of sea water levels by making**

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. **plastic containers of large sizes and fill them with water. But originally I concluded to make hollow clicking-bricks of plastic and fill them with seawater. So we could have building bricks based on water perhaps. I'm just onto handling the overwhelming amount of sea/ocean/ice water on our world. Preferably thus among the lines of this piece its attempts, great enough applications to get much of it kept ice and the water hard and or well on or in our mainland on Earth.**

## **Tech Leads Chapter**

### **SANE ELECTRICITY NETWORKS AND SANE MOBILE DATA TRANSFER? I FEEL EXCITED ABOUT THIS ONE, IT WOULD BE SU-PER!**

IN MY PERSUE FOR SANE ELECTRICITY AND MOBILE DATA TRANSFER  
(day 2) piece  
needs work:

- I thought yesterday evening when laying in my bed to sleep, to create electricity amplifiers, so weak electricity can be amplified to hard electricity in the devices and machines themselves.

I now understand there are people busy on this since ages. You see the wise apples do not fall far from the tree as disconnected individuals. This also for mobile signals and data transfer, to perhaps correct to think  $1G \times 4 = 4G$ ?

Weaken the signals and amplify them, and to make the data much more quite so to speak, and then to amplify the signal channels and data in the devices themselves.

So the transport of electricity over the networks, could be low voltage etc. and get amplified when received, in the devices and machines themselves why not. This to make it all harmless. I add now on 02/02/2018 the day dream I started today, for synchronizing  $100 \times 0,1G = 10G$  mobile internet network speed. I also add today I came across a invention of super remote internet of the future invention. I don't have the name etc here now but it was a small device what simply screwed in instead of a indoor light, and not at all unhealthy. Check it out. Sometimes I feel stupid but I take the chance it might be a possible idea for me and my future team to achieve for the energy part. How do you do?

I add here finally I am also looking forward to technology what able phones to stand-by without the constant signal, but when called it just switches on to transmit.

Thursday, July 17, 2014

## **QUESTS:; I THOUGHT TO REDUCE MEDICAL MACHINES SO THESE BECOME MUCH CHEAPER YET AS MUCH PROTOCOLS TO APPLY**

Reduction of materials needed in efficient ways, and focus on quite renewable raw materials/products.

Things such as copper and metals etc. bigness and why not less production costs for instance volunteer workers and South wages and

recycled plastics or even agriculturally obtained case matters, etc. Yet, the reduced equipment to function by protocols.

And lenses to be obtained cheaper.

And data archiving and transfer to be reduced to functionality. You might also think of a medical tool to replace by an inexpensive version why not.

It might be good to even think out of the box about the technologies used to obtain a medical diagnose and treatments.

For instance I had the idea to avoid RX scans to obtain diagnose and exclusion of pneumothorax collapsed lungs. Something with sane technology innovations and techniques what work fast and cheap. This of course for the 3th world and 4th world to be helped medically. Think also about to invent agricultural ways to grow alternative construction materials for infrastructure. And to replace the expensive metals used in equipment now a days.

2

TO VAPORIZE TABACCO INSTEAD OF SMOKING IT

.. GUYS, MAKE IT HEALTHY. Tabaco is treated with a sauce, well to not do this anymore so the plant stays basic and mainly nicotine comes out when vaporized.

Saturday, April 5, 2014

## **2 RESEARCH QUESTS: TO REDUCE FEAR OF SOUNDS AS INDISCRETE, AND SOMETHING ABOUT CHECKING ON COLLAPSED LUNG IN A SANE WAY**

First the sound difference what seemed to reduce fear of doubtful sounds?

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

The sound sounded up and down in volume while the sound (source factors) was stable, I heard it flux in volume decreasing wise. This had a calming effect and took away much of the impression of treats. Basically to invent perhaps a medicine or tech what makes of a so to speak "M" sound an "S" sound!?

Second topic is the possibility what seems probable to me to innovate is to check on potential collapsed lung, by sonar visualisatic or so, rather than by Rontgen RX imagery!

**Wednesday, December 25, 2013**

**GRAPHENE, TO GET FINE QUALITY AND LOTS OF IT BUT  
THEY DID'NT KNEW HOW, well, I GOT A SUGGESTION**

Propelled air -field?

Blow air pressured on it and it will be mixed off where ever you want it?

Lead: 'harsh' air.

Adding now in last phase of finishing off this book is for the process to create abundance of quality grapheme, to be directly connected to 3D printing into the application product.

Sometime after I thought of this lead, it appeared air is actually being applied to create quality grapheme since couple years now.

Saturday, June 29, 2013

### **VERY COMPACT ECHOGRAPHY FOR PRIVATE USE -SOME IMPORTANT IDEAS**

Simple I think processing echo imaging and comparing to known problem visuals seem interesting to allow people to also check themselves on possible swellings.

Mobile phone? And might it be to process the heavy processing and rendering task with max. capacity min. other applications, and perhaps a plug in gear for smart phones to be able to handle the processing requirements etc.

An home blood test on cancer related factors, for systematic early as possible detection.

12012015

Social media and other remote digital providers and services should surely start to introduce their own security code generating gear and tech, for users to log in and take decisions in it by means of second security code generated by the user .... An account should come with a sort of bank card and key generating gears and against abuse of data. Happy to remind I think loading the gear and or cards with a constant energy what excludes use when not consciously used and account only accessible when actually used by the owner.

On the other hand, I think the internet is best secured much like big brother to have access to the identity of the user(s) and user entities and what is posted, if the company can why not including an objective internal security department doing investigation based on access, with some rules to deploy authorities when noticing outrageous activity, but how is this going to be financed, and how to trust such government researchers and independent and not “street”.

Saturday, November 1, 2014

### ANTI HACKING TECH LEADS (SOLUTIONS MINDED)

TECH LEAD ADD 12-04-2014.

This tech lead add is perhaps about a new generation of anti-virus software for phones and tablets. It is to have a separated hardware for a new generation of anti-virus programs (operating systems? I really

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not obliged: click 'No, continue to document'.

wouldn't know what the hell to say) to run on it. So there is much more operation going on, basically.

☺ .

What I want to add is due the international governments whom want hacking out it seems stupid they do not have a super anti-virus company themselves collectively and for free.

It could pay anti-virus companies for virus information extra to be top plus more.

This is a tech add lead on 01052014:

to my post with my idea to protect computer networks from super hacking.

It is to put certain parts under a sort of energy of busyness what prevents data from traveling via the hardware what under charge.

A sort of distortion so to speak.

And for phones and tablets my idea is to put a separated operating system and hardware especially for anti-hacking operations what upgraded activity potentials than the minimal apps of this time.

GOOD LUCK

Tech lead add 2

Original ideas:

The super chip what will allow to hack into bank networks/accounts and all computers is said to be available in several years. I reacted back when I heard it about some time ago.

I don't know if mine here is a lead but it felt like sense.

All commands and requests entering a system, pass by a selection gate.

The gate is more analogue, it does attach more hardware points to be activated and operation handling the requests and commands.

Then it also runs the command and sees if there is anything improper. If

OK, the incoming active request data gets a code what also includes

analytic data what identifies content of the incoming request to, than

directed to the hardware and software it wants to or is asked to function

in. In all hardware I thought and moistured up to have mini PC's and

minihardware what allow to singularly assign imported actives to run in

restricted and isolated mini hardware and mini pc's so not able to

command other parts of the system neither to do more than showing on

the screens and no other screen parts, mini-screen hardware in screen so

to speak. And restricted influence as requested internally or as incoming,

this on a conservative pure function based allowance.

When incoming requests are plural to overload the mini hardware's and

mini PC's of the systems I thought the source must be the same as

expected, and incoming actives get a code if find good and sane. Also the

IP must not be the same. And can someone explain us why servers are

overloaded while you simply say no to too irregular cues?

Also, a lead against superfast future chips: to slow the systems down, and

to monologue them, and to 'plural delegation functioning and parts' use

for actions. So super chips can actually no longer profit from what they

know so well-speed/complexity, but don't know what is happening and

can only do nothing wrong and not complex but limited.

More I don't know.

What I find interesting is for incoming influence, to get limited ability of

actions. Purely what it is meant to do by the inside request/function, and

as external incoming influence.

Everything has a function, why not give just the function, nothing more. And each access to for instance visualization, and synch operations etc. to have each their own mini hardware what limits them, that external access to network has no more than its own limited hardware, what means it cannot access something else.

Thus I think hacking is a hardware problem and a basic limited allocation challenge.

It's a lead.

Do not forget to exclude problems due to super chip or whatever general problem.

Am I right? Who knows, we'll see.

## **Tech Quest: STORM FORMATIONS NEUTRALIZING RADIUS TECH TO DROP THRU STORMS –IMPLODATION-LEAD**

I had a vision of a gear/apparatus what attracts the storms their energy and neutralizes/destroys the electricity, and the electricity itself to the drop by the device. And the water factor there surely must be ways to neutralize before storms before on land or getting out of hand.

It is a day dream, but it sounds so simple, and of course I include it in this rather more realistic shows in this book here at source.

The following last tech lead is undated, I hold it since a couple year now

## **QUEST: A INDOOR AND OUTDOOR LIGHT WHAT NOT REQUIRING ANY ENERGY SOURCE**

Remote areas and saving energy brought me to this no-brainer wish for a light to invent what lightens indoor and outdoor but what does not need external (known) energy sources but self-lights when activated. Cheap above all, and of good useful healthy light sort and of potent intensities. I sort of lost this wish quest out of my consciousness and was reminded of it by hearing again about the need in 3th world and development countries for the people to have indoor and outdoor light off the grid. Well, I cannot explain how this almost happened, but I am glad it is back in my main content here.

Good luck with inventing this wonderful simple essential quest, I'm confident we will see it invented and know the fields covering livelihood and work environment applications working out, how difficult can it be.?

**TECH QUEST: AIRCONDITIONING WHAT HARDLY NEEDS ELECTRICITY OR NON AT ALL**

(book see thus options)

Air-conditioning for cars and indoors require a lot of electricity at this present.

To me it seems we could invent something what is cold on itself for instance, when needed.

Good luck.

**“CURRENT” AFFAIRS Chapter**

**AMERICA SCHOOL SHOOTINGS, ABOUT THE SITUATION(S), AND USE TO PROTECT VICTIMS AND COMMITTERS OF DOMESTIC HARM/VIOLENCE/ABUSES**

Notes you might feel inspired by and start to pursue (profound) solutions. Good psychology in schools is very important. It makes a bright worldly

person what knows allot and helps the needy and all students. It is to be of good and up building opinions and to believe and take serious.

It is to become friend of the students whom feel not well and whom criticize the social climate, and with quite all students.

It is also to make statements what lead to the psychologically bright helper of each school.

.. They've gone bad lately? Come and talk, we're much.

.. Have talked bad on one's in despair, join this class to get yourself the flair.

.. Hard feelings, come here to start healing the situation. .. Suicidal, and or feeling in (en)danger(ed), or something weird happening in your life?

Come and talk, we can stop quite anything and we can get you anywhere.

This is the part against the domestic issues, the same moto expertise in reality in all countries in all regions represented. By the least we

recognize a victim as external outsiders or insiders to practice the 'by the hours or minutes, calls for help or the domestic harm situations spotted,

to trigger the help, to be saved/protected very this new sort of very

serious to nice good situation know how and full optioned by means, also

to arrest the domestic harming/violent/abusing victims their fellows,

helpable/reachable (by ultimate future techniques to stop

outrageous/chronic harms, imaginable).

Now back to the USA&other countries their school tragedies we all faced or know but don't really behave accordingly.

Those whom shoot in their school, are (perhaps often) psychologically and socially not having a time of their lives. Comparable to suicides

amongst students, and some got ill and fight rather than knowing how to stay on top of the thing what change(s)d them. I know very well what bad

social climate can do. I know what people whom 'shout' badness outward in all curious ways, as if the meaning is fun and the maltreated too. But ok there are surely narcissi's amongst the shooters as well. In all cases it calls for wisdom and hands on in the field of student psychology and social work.

A student who doesn't feel integrated and "fluent" enough, and the curiously dominant culture, makes me think student's life should be about flexible decisions/changes. One does not feel well or respectful anymore, than put him in another class or school, with another mentor and perhaps during home hours a new challenge such as a groovy volunteer job. And another school. Perhaps even schools specialized in ill/harmed/recovering students. I'm just saying when someone does not fit in or of it calls for change. Perhaps small collectives can be made where the weak and hostile and criminal minded students form a good team in building their own little projects club. In diversity of course but small strong bonds?

I think there are several reasons what are common. One is no longer respecting the school/students in the major social/living environment of being a student.

It might also be because alcohol/drugs is used by allergic brain, what can create bad thoughts, criticism, narcissi, causes of fears, etc. But also certain coffees, and energy drinks. But of course many of these things are also of natural and evolutionary fashion.

To make people 'humanitarian' and "gentle men (and gentle boys) and gentle women (and gentle girls) ".

Sci-fi.? By some very cool things and people.

Nov

10 2015

ART/M & SCIENCE & BUSINESS FACILITIES SECTOR –PRO ACTION FOR THE GOOD SOURCES

ART/M & SCIENCE & BUSINESS FACILITIES SECTOR

You the service'facilitating'sales'production'potentials''Humanitarian' functions, all service to potential as valuable production as lucky moments of clearness and extra ordinary contribution to upgrade living standards and basic and extended goodness and beauty (see the word 'humanitarian' and 'nice') –State of The Mine, where have you been all the time before 2016 I found one.

I never see personal service that actually say hello by offering money and care what knows itself as equal to ours its future(s), yet.

I am invaluablely great. And the problem has always been why the hell I, am at least, not yet making money with my occupations also quite some offices exposed to my beautiful brilliance.

The problem is we not only lose objects of history' we also get not sold with regard and esteems way above any individual can level with:

Pieces/Works.

I am declared here for the fraction of what it should be on mine. (Don't worry mine&I will deliver all my career its potential, with some luck ☺.)

It diffuses and makers lose touch with great equally great potentials and works in progress or in highly potential –status as pending. No gain no

saints no masteries with Humanitarian sense as true facilitating function(ing) no greats yet. Not one. Strange. Yes, We exist, and Yes we are at best and hold the promise for a quite instantly total good life and future world and humanity and great refinement.

And together, we, pioneers, start our highly successful careers living a hell of the “times of our lives”.

In fact more blond, is to say no one levels yet to facilitate on potentials what sense production(s) do.

This said, it is shortly but surely something I think, when the best of the best ‘humanitarians/corporates’ facilitate Us, speechlessly perfect We/Ours, “lay in the fat dark ashes of packs of no(-answer) individuals”, yes ‘The Few & Counting’ our potential is god fully joyful basics. Work together, lift up the greats what tempted by your more often falls promises.

The pleasure is not yet ‘Ours’. Surprise me and others whom will feel home at the centers of our potentials where working out.

We are very humanely successfully involved in the best we humans’ n’its can wish for as things we can prevent and stimulate with.

I can tell you, mine its potential is (always nearly) complete. The potential with me and my colleagues is of the naturally wiser and beautiful. No-era blocking influential facility businesses with seemingly no interest in their field, not to mention a lot of offices promises lies and are organized con artist offices what simply are not a choice while often the only.

## THE STORY WHAT I MEAN BY 'CHARITY COMPANIES'

I invented this in the daylight of corporate success combined with charity. Very liberating. Charity companies are a new sort of companies. It is to create a company/product/service where of the benefits goes to the specific good cause where for started, or to start a charity company for a good causes what really need a steady donor or suffering, think of creating a charity company to provide for instance capital to a charity what create and offer paid poor teenager student jobs and for instance the poor whom wish a small extra regular paying job, etc.

When a company such as needs money for new 'opportunities', it gets it. And 'And, for whom had the idea, gets 5% royalty, what is 5% of the product price or service. This is to attract inventors and those holding a ready valuable exclusive product on benefit scale of the charity but also what to stay for long time for the cause.

## **MY PROFESSIONAL ADVICE FOR CITIES WITH HOMELESS PROBLEMS -INSPIRED BY LOS ANGELES**

**LOS ANGELES AND ALL OTHER HOMELESS TROUBLED CITIES**

—  
My solution:

Charity companies is what they need. It is to create a company where of the benefits go to a specific 'humanitarian' cause.

I introduced this way of financing more than a year ago, hm.

Each city can do this. And you, companies and new markets can even do national miracles.

I think deregulating for re-entrance in regular habitation is critical. Here in Belgium there is a social obstacle what makes homeless people not able to re-enter the regular social system and so legal home is absolute, from the autocratic side of the Global problematic.

Companies require imagination and strategy, and are worth and deliver much in no time like this. Take brilliance and easy on investment, and you got the recipe for financial miracles. Housing to be build and lowest prices but good in social co-existential individualism.

Home care and re-integration in how to actually live well, and how to know how to prepare meal or to get one of course the second option is current I presume related to drugs and other poverty causes.

**I HAVE PRODUCED THIS MORNING A QUESTION AND SOME LEADS FOR US: IS IT HELPFULL TO LOOK TO CREATE BIOLOGICAL GMO CROPS AND PATIENT AND LIFE STOCK BACTERIA HANDLING**

I mean GMO but biological in result/outcome.

Without the substance in common so far GMO crops what is inflammatory and stressful for consumers. I mean a GMO generation what does not hold this overlap of stress factors but what holds the

benefits of sane natural biological crops what give a sensation of calm and non-inflammatory neutral effects etc.

What I want to add here is my ongoing regular thoughts about how to stop bacteria in life stock (and about hospitals in the Medical Chapter). I thought an attempting concept to restart cycles in life stock facilities. To start with bug free life stock and crops and soil and facilities, in order to be delivered from bacteria what go from mother and environment to new born/fresh and infrastructure. Obviously there is an important piece I developed for patient inflammatory risks reduction or exclusion while and after surgery, somewhere in this masterwork.

## **EDUCATION IN CITIES IN CHINA, A SOLUTION WHAT ALSO GOOD FOR OTHER PLACES: ORGANISE ALTERNATIVE EDUCATION!**

There is a shortage of schools to educate new people in the cities in China.

People come from remote areas and seek education for their children, but they have not the papers and there are not enough schools.

Well, for the time being, I instantly had the idea it seems good to organize alternative education. It is something like finding some volunteers and places why not in parks or centers or churches etc. And to educate the kids alternatively, not official but it can be very professional. It seems to me there should be some organizations made to organize such education and to not wait for miracles. You know, people often just need experts solving their crisis. But let us be fair, not enough schools, after incubation of for instance a GHLFMM bank.?

**PALESTINA AND ISRAEL REGION ADRESSED, THIS IS MY CONTRIBUTION AS WISE**

What is happening is humanity and nations are beginning to become 'humanitarian'.

It is something what you notice in decisions and projects.

It is not simply good, it is serene and nice. It is a gift what is slowly gaining experience. (I always think my career has something to do with this.) And so should especially also this region and involved. This counts for all humans and especially decisional ones.

- Both in their total must settle down in peace and stability and prosperity.
- First of all is the dialogue about what exactly is the opinion of wise.

I am such a simple math wise opinion for instance:

The mentality is wrong of people and theirs.

Not the same but both populations and interests and convictions have harsh feelings and destructive vengeance alike activities and organization. It is to start telling both all what their good points are and what are their outrageous practices and mentalities.

So not in detail but in general with words and sentences like: the mentality of the approaches and bad convictions is madness and very wrong and is carried within by ... % of the people. For instance dominant or victim but also about having 'no good practical character and far from peace up building minded.

Secondly it is to address the regions its population and authorities with compliments what can be given about good things of each (other) and both their people, cultures and approaches, way of reacting and coping

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

with the situation and mentalities and programs surrounding them. What helps the greater good is that people get presented a stable fair near future. A replacing future what replaces the present horror and dwells. Practicalities of a plan what show hope is working out and the results planned look like this .... . This is not difficult, it is natural for wise. - I remember I kept in mind I find a fight over holy land and history, really something very pathetic, as contentment with land what not harsh is what you can't ask for more. It is not as if a land is under water every year and the other not, so just understand nice historical context is about the inside and culture where ever you are and good conditions, not about ground or land. If you are short of land you ask some, you do not take it. (Example for the Israeli side, but this is also as sense on/about the other side for other things)

- Wise can say things such as occupations and conquering is not proper if it is about past what suddenly fashionable to want, etc. Borders are destinguishment and it is not of a land its interest to conquer hard ways communities what lived in peace nearby. I think this shows there is honestly for my present view on the situation a harsh political Israeli mentality of harsh domination and act of liberalism close to madness and no sense for harmony. It is not durable it is a mistake and character what is a menace.

What is wright is prevention of terrorism is an art of living what knows and senses harmony and universally inspired professional goodness  
WORKING OUT. (Both.)

It is not hate and banal domination and repressions what cure a region and it's ever even more mad people things (both), it is professional goodness and acting it out in all decisions for national and international decisions and it is so professional goodness is something what is meant and to be experienced by the population also.

It is so, it is not acting but I call this diplomatic and commercial -Art:  
Professional goodness affinity and refinement.

It is to forgive cruelties of the past and to feel the compliments, or drugs  
on their best (whatever if it's the best for you ☺), but also the advices  
what practices and mentalities what are respectable worldwide.

It is the mentalities and up building practices of professional goodness at  
work what internationally make prosper in all basic ways. I am not a  
psychologies and I don't have detailed inspiration for what can make  
people change of harsh feelings they have and to replace bad practices  
and reactions with talented goodness at work, but perhaps I am doing so  
wright here.

It is wise whom can together tell what can no longer happen and what  
profile must be rewarded and what replaces presents.

I just for instance thought for Israel to keep what land they took, but no  
more, more or less. Simple and sense.

Truth is not the point. Truth is best just some words such as evil, bad,  
untalented, repressing, good, bad, offensive, attacked, attacking or  
defending goodness, etc. (both in ways)

It is what replaces truth, the future plans and present nearby future  
practices and assignments to the populations involved what show a good  
future and prosperity in the region.

I know both should not let themselves be carried away with escalating  
repression and vengeance to mad individuals their actions of crime and  
ignorance. It is goodness what sticks to its plan and is passive and enjoys  
normal life in stabilities you there could only wish for if you compare to  
African endurances for instance.

So, protection yes, but not vengeance war for individuals their crimes,  
and total humanitarianization

25/08/2016

I DEFINED A IDEA TO PERFECT THE IRAN NUCLEAR DEAL

Short, but my honest winwinwin idea I think all parties should consider:

To close all nuclear facilities of Iran (and all others, 'count mine in in no time! No more / all solved and stable and well going, eventually waaw.) but to internationally officially nationally run the Iran scientific nuclear program production facilities and distribution... to be continued with the wealth on my mind rising shine ☺

This shouldn't be too hard for a Iran who wants to convince the international community it is in no way interested nor active in creating nuclear weapons creation and use, if you ask me.

You all had peace coming.

**TECH ADD TO WASTE DISPOSAL ON BIKES AND IN VEHICLES**

TECH ADD - 11-09-2013

**Tuesday, July 2, 2013**

**SMALL BINS ON BIKES, CARS, OTHER, AND FOR PEOPLE BY FOOT**

I just saw the -news here, at least a part of it, and it was about all the things thrown on public roads. Cans, gums, plastic, etc.

Well to put in law the rule all bikes as they should have a small bins on them. And options for pedestrians.

It is to say modestly after some months to make and put the waste disposal purposes where the bikers do not lose control over their steer. And well attached so it cannot come loose and endanger, and also it must be safe when falling with the bike or in a car accident, as to not be picky, nor too large. The cleaning part needs solution now.

**Sunday, April 21, 2013**

## **SOLUTIONS FOR NATIONS, WHAT OFTEN GET ON THE NEWS AND DOCUMENTARIES, AND HIDDEN AFTERWORD**

It is as if we read or see 'this is so cool' but nothing happens after. I keep on thinking alternative since I see snow and ice on the roads, about these students. Not every time but often.

**What is this era, some sort of far advanced DE realization found and lost department?**

### **ALL MINIMUM WAGES TO BE LIFTED TO MODAL WAGES**

- Lets we try to raise workers with too low wages to reasonable/nice wage. The social revenue from governments or by GHLFMM also double, 2X<.How? Charity Companies whom well oil but giving benefit to this specific charity. (If a charity company needs money for expansion what looks like a good plan then to get it from it's fund..

The productions of cheaply valued products and services for the home market and for abroad markets to be raised with approximately 6%., this for those stores their economically priced home brands we all know and steal once in a while or whenever we can. Well, it is with 6% raise the companies here and internationally can raise the wages of the job spots with presently too low wages to be comfortable and gain any flexibility and room for unexpected bills etc., to mean a now 1200Euro worth income should now normally raise to 1500Euro if you ask my pursue/aim/go for this result, in any functional fine way, already.

- Let us try to offer employment for all those willing to work a job they like, or to make some extra money on top of their social unemployment Gov. income (the extra's untaxed) -  
Let us cultivate the seeds of the people their business/opportunities-imagination as opportunities.
- Let us as Western countries focus on keeping the prices of HRed products and services and processing as they are fine, as they will be reasonable priced and good of work/financial factors. And let us keep the companies here but not at a government robbing price, but something else, some sort of statement or High Culture modal to the potential leavers. Any empty business to be filled eagerly, thank you wise, loser (the companies what 'leave' certain countries)?

**Saturday, May 3, 2014**

**I STARTED WRITTING THIS SHORT BOOK, HERE IS HOW FAR**

**I GOT WITH MY NOTES: TALK THINK ADRESS**

**SOFAR 1**

**TALK THINK AND ADRESS**

This is a topic I started to address coming across some bad ass public work(er)s. But, I only mention solutions not the crimes and incompetence's. Enjoy!

Normally, you talk with a shrink, teacher, doctor, police, etc. , and then the shrink for instance, knows the symptoms and wants to relief the patient from its worries.

The shrink should first talk with the patient, then think in private, for educate solution(s), like a scientist would study, try out (test) and conclude what is suitable. This thinking process its first conclusions should be inspiration source to write a letter to the patient.

You see, this is tear dropping communication, what would solve and prevent and up build and make understand what is best to do from an academic/practical point of view.

I don't want to go into details about what is now a days the way of communication of control amateurism as I call the way people are treated, but I will try to make an example casus.

It comes down to passion, I figured out. Passion to get things (re)solved or stable and 'nice'. A passion what seems missing in allot of communicative challenges.

Pros are put in hierarchy and piled with work what structured in too less productive time, and the passion to help and make nice is far from reached and gifted, and thus so is the lack of talent incredibly sad. (The results.)

There are many fields where now banal punishment and denial/disinterest alike treatments are installed to repress unpleasantly and not up building wise, often based on moment years ago what lessons are learned from often first days of security measurements.

Money management by a lawyer given by judge of peace. It is to educate people to manage their money, in the normal cases of mal management and or mental/physical illness.

It is not to put pseudo characters saying no all the time making worth savings and heritance for funeral purposes, really. No, it is to teach not to make desperate and depressed for ages. Now, it is a regime, really.

Management against the symptom of getting fatter. Good advices should be normal in a scientific culture and richness. And supplements surely

exist. Things such as healthy snacks when you're 'hungry'. And healthy nutrition is important.

Also, anti-dotes in or with the nutrition's or meals to neutralize fat and sugar are important quests for sane solutions to integrate in quite all recipes.

Another communication problem is the one of vocabulary and good will. People are ill or different or victim, and often still denied recognition and educate help.

Denial or recognition, is a simple question, but however, not an easy practice. I think it takes peer to peer communication, also with some selfexperience patient reports.

"Birds do not really talk, you're illusion AL", is not a good attitude I think.

"Birds do make sound." is the good one, and they might act on certain inner things happening.

Education (towards public jobs):

Proving moral, technique and about conditions and situations. 4

## YOUTH DRUG USE PREVENTION

I wonder if there is no way we can prepare youth to potential side effects of using drug, not specially to prevent drug use only. I don't know yet if I cover here my technical ideas on how to reduce side effects of drugs specifically, but somewhere here in this source document I do I know. What seems good inform form is for the youth and adults to not believe in 'psychoses' they might experience because of substance abuse(s), when we become unhappy, know it is usually because the drugs you use is not good for you or an act of poisoning, and you not suitable for the drug

and the drug badass amateur recipes. And when one uses drugs (also alcoholic drinks) and creates troubles, than the person is addicted to the cause(s) of the problems

Know drugs are addictive, a drug what makes you ill and gets you problems yet you're addicted, then you're addicted to the causes of your problems. And also this, natural/supplemented being is probably the best you can wish.

And to use medical prescription drugs what associated with the drug, etc. And if you can, keep on drinking mineral water. Water preferably mineral in bottles or bottle is cheap in cheap stores but change of one or other brand regularly enough -know also properties build before 1974 in Belgium had lad water tubes what is toxic so best is to not drink water out of such an old system, etc. And eat vegetables soup to gain much nutritional support and not the hassle of cooking difficult things nor to eat a plate, simply drink, and eat, like fruit. Vegetables and fruits are very cheap, they have shown me the real value of money. For not even a big coin you buy yourselves really groovy stuff. Like carrots, broccoli, and other soup vegetables I don't know the name of now, apples!

Eat an apple a day keeps the doctor away and it is wright as it is subscribed against many diseases as against medical downfalls.

What I am saying is there are simple basics to communicate but nowhere seems to in general nor specifically wright.

## SOME GREAT CULTURE RULES

I let myself now mention I am in a good mood by pros and other people, whom make a message of talented goodness. I recognize it as people who became and are choosing for professional talented goodness. I am convinced gifted goodness is a very up building as rewarding orientation.

Guided by advices like:

Treat people well.

Show goodness because it is nice.

Resolve humanitarian problems, or let your public work(s) be about good news and fieldworks of goodness.

Prefer to mention the humanitarian solution(s) and for wellbeing, and do not create problems if you are not a field expert.

08/12/2017 add;: **Beauty** is a **grace** of the **Greater Good at work, served** to define pure **Humanitarian desirability** any **humaneness wishes** into **graceful Humanitarian Fieldworks**

Solutions offer **graceful professional nice Good Life** into **fulltime** ideal .

## FEW MORE OF MY HIGH CULTURE RULES:

- Mean no harm, and be of plan of professional goodness at work. Make no evil, explain goodness.

Show 'humanitarian' frontiers (look up the word 'humanitarian').

Goodness is an eternal source of the most successful career people ever.

No psycho active pot while studying because you literally put at serious risk your capability to perform education requirements and motivation. No (unchecked) hard drugs, I suggest to use medication what resemble but do not have the downfalls. And I suspect beer might make a person think more negatively, but of this I am not sure, but if you notice you start having negative thoughts when drinking beer, than you need to make a choice.

Stay away from living and working in environments what put your personal sake at risk, stay out of exposure to trouble makers. And above all, be as gentle as you can with the people at you, because there are signs that it can awake extremely hard feelings to get at you when yelling etc.. High trees catch much wind, be careful –try to preserve good conduct, keep it real.

Beauty is in base for me when I create great good news what you say of 'super good', but beauty makes a work also more valuable.

Do not mention the problem when you can (let) mention the perfect solution and progress as 'humanitarian/good news' importance.

I find truth something for experts in the field, not average John Doe and the bitch next to it. The truth of what happen(s) is discrete under the eye of what is done about it.

Anger is often not a good source to describe/attempt, you need professional goodness.

Do not give bad examples to people, contribute cool things.

Do not shock fellow citizens too much as nor on purpose, be polite. Be a professional at leading life as gentlemen and gentle ladies, but keep/become secure in your normal environment.

To discretely know of something bad is to have to make sure to pull a personal alarm bell and try (re)solving the general and even specific problematic as professional.

Have “good taste”. I use the word good taste when I mean to like what is likeable, to esteem what is good, and basically to be aware of not-done and bad taste as in to keep your productions/creations of good meaning.

And 2<sup>nd</sup> last but not least, something about the use of contraceptive means. Making careless love is a beautiful part of what make us humans in a high developed humanity. We are sexually active for numerous of reasons of bonding romantically. Well, if you listen your common sense and do not want a child being created and relying on your household, than that is the sign you should try to get your hands on a contraceptive solution. I find it an ultimate brilliant luxury I can only cheer of happiness, thinking making sweet love does not cost the risk of household expansion beyond reasonable abilities to provide. Enjoy, dear love birds.

## LESS RENT LESS LOAN PAYMENT FOR SOME

This one dates from somewhere along 2015

Imagine to buy a property to be able to take standard 50 years loan repayment arrangement with just double interest than 25 years present standard.

But this to make rents fall half and loan payments per month also by almost half. This way property stays in reach for all budgets and this way the banks are ok and the governments will gain growth by more money being spend I the economy.

#### SOME HOME DAMAGE ASSURANCE ADVICE

Costly personal property damage by natural disasters and any other external factor causes often when the property damaged useless, than the owner to get paid the assurance property value covered for to rebuild seems in many communities cover for far too low value to be able to build a new property. Thus I discovered this critical financial geologic/livelihood risk in case of regional serious property damages, so in order to be sure, all owners and renters must raise the property covered value so a new property can actually be build paid with compensation of assurance. It is being covered to be able to build a new good house but also insurance to be covered for new temporary rent accommodation, nationally or internationally touristic. Should result into be made obliged assurance factors law.

EDUCATION2.0&SECTORS2.0 MASTERWORK MAGNUM OPUS LIFE WORK undated started round about 2016 and finalized rawly end 2017.

Rewrite/basic recall of my full ideal education2.0 Magnum opus piece as the original doc got not saved because I cntrl-save ed in wordpad what does not support shortcut use of contrl-s(ave) and I closed when I was really fully elaborated and thus lost it all unsaved/empty, but I do know of course the miracle wonderful basics on the subject what is called the present oh so wrong&failing the so nice opportunities in the fields of life/education/work practices world wide.

From youngest to adult students, here I feel I did not expect to have to remind such intensive specific detailed super good news in the field of good lifeXtimeXIdealFlexibleCourseOptions

Toddlers stay at home or can try if liking or not wanting or having to be somewhere as both parents would be working etc sort of holiday toddler day care authorities -sort of the good basics like well reputed youth camps infrastructures/regional centred locations.. no pressure no pushing nor obliging to memorize or to perform full day participation but simply good nice life focussed on the rational sense kids especially the younger kids will get the right of leisure and free time and rest and especially specifically for instance not having to wake up early morning hours to go to kindergarden nor primary nor even high school standards the world forced now so many already to be equal in endurance and nature.

Babies and toddlers must have an ideal and carefree and relaxed easy routine, no almost fully no school obligation till 4/5yr of age with close to mid day start and only couple hours/day forceful daycare happening..

Toddlers need far less pressure than full time obligations. I personally was utteringly shocked when my dad suddenly out of the blue something was up for me (I was 2years of age);: In September you're going to school (full time and oblided for all kids they specified). I instantly felt and knew it was the wurst they could ever tell me something new, hell!

And I was wright about it. First thing the teach did was announcing us we would each individually memorise a song and perform it infront of our parents by the end of the week. I knew instantly to me and my memory limits reached far beyond no teaching please, her assignment was hell to me. And damn wright it is! In the first year I was exhausted and my dad on top of the school obligations was a tuff rulling prick what told us we would have to go to sleep every day at 18:00PM after kindergarden full day, also his announcement sounded to me instantly like hell broke lose and I was on track to hell and my bit of nearly crying obviously not even noticed.

So, to me, in the name of all toddlers;: We don't need your education, we need quality free time. I add I have figured out why so many individuals become bad people part of the sinfall range. It is because teaching and school and home is not pleasant, not entertaining, on the contrary all education phases are highly asocially taught, what obviously makes ay of us unpleasantly hurd and harmed. We are in school or home or even have our own hobby passions, but we all might aswell have been doing alone each on our own desolate moon. My conclusion was and is for life and obligations ad later individual life, must be inclusively quality time good life, nice and compellingly 'fun'. Kids etc need everything to be nice fun, all people I saw whom gone bad were good but mostly all intellectually optioned and ok, but all as we call "numb", early ages on we all knew it wasn't compellingly fun fellows stuff and lacking to give us humane worldly specific fun attention. This is the basic recepy for evolutionary sinfall generations and individuals. I want to add the most respectable and envied sane High Culture kids and adults their thru happiness and High Culture sophistication, is a education and Highest Culture and most reliable goodness and most successful worldyness are frequently on documentaries show;: The highly fun and most interactive and most future/world chances happening in some parts of African classes and the equally far more peoples people employment chances small African business concepts offer thru workers locality happiness with central principles to help out with selective employment chances with fair work demands.

Weather you are left or super right, Africa counts for High Culture happy loyalty I consider as internationally most wanted amongst most wealthy VIP private functions and job spots. I count in

here the same qualities are delivered by many Polish employees, regarded by me as 2 places where unconditional goodness genetical choices and employees pools where especially graceful professionalism are delivered by.

So, if you want your people their talents to get chance in life and work life long, it means your society and education and parenting and local and national life quote must be: quality people's Highest Culture -nice goodness compelling fun principle. Count in animated free time for Toddlers and kids. And bare in mind I done very elaborated observation and Research in all the people and places in general I witnessed, and I can explain you badness and evilness and unworldliness etc all what not nice nor fun, are practices and life concepts what makes of most fit and enthusiastic and most smart individuals whom obviously successful and happy and leading a fun life until they get into anything in the range of badness etc. Badness does never pay off but instead it means the individual will fail at its needs for quality time good life etc career and social life and free time expectations. I thus simply disadvice to be nasty and I disadvice to dislike the like-able nor to desire the undesirable, neither to be(come) the unpleasant factor. Life is all about original important basic instincts what everyone would wish to follow and decide for humane nice life for one's self and's fellows, badness and comformist unhappiness, for feeling nice I life and work all need to decline badness and to equally define our mattering life moments and givens to meet goodness and High Culture worldly universal goodness fun.

Welcome to paradise, this is your right to be in universally worldly relaxed sit lay listen hear or even learn something, it is the fact kids and all young and any adults succeed personally at best when we and our environment fellows factors define adult free time character, meeting our natural basic and extended needs our life and environment to offer us nice/goodness wealth, equally we all regionally seasonally wish our climate and nature to be as nice and care free and prosper as possible. Of course you can imagine we the adults and elder kids really need for life to be good to us, so my point for our Toddlers in general to for see quality nice good time professional goodness free time High Culture, especially at least Toddlers to get this type of good life hey.?

Toddlers in households where there is to our present societies often no time nor wish for full time responsible day to day full time parenting, I concluded kindergarden not to be oblidge and never against will and especially to be professional at offering good fun and High Culture compellingness. For Toddlers whom the parents cannot be with their kid during the day time kindergarden can be a full time free High Cultured peoples people public service standard plenty available everywhere, but where any bit of time or much time is spend by Toddlers, to especially mimic free time and an ideal home situation/enviroments/free will optioned good time experience for each Toddler and parents. Toddlers should follow their own will having choices/options to for instance participate an activity or to play or ask wishes for to come thru, and other obvious new standards each kindergarden of our future to respect each Toddler (and pets) to be able to rest and catch plenty sleep options and rihm. I see there is a great new universally High standards High Cultured vocation new profession and employment/career market for subsidized needs for baby siting and equally professionally subsidized free specialized taxi's for external Toddler and all other youth ages occupation, basic parenting needs really. But including I add for freprivate VIP transportation is equally desirable for all adults their activities many of us would simply say yes to free VIP private personal chauffeur/transportation/logistics. Anyways, kindergarden, should be minimalized away from the now full time day occupation standards common now a days internationally. But when as fun as quality good time peoples people professionalism delivers such age related kindergarden oasis standards of compelling universally likable fun, best to not oblidge more than couple hour per day at and only for instance 3days a week. Including flexible hours as parents/household can their Toddler be present households aiming most convienient and the kindergarden Toddler raising High

Culture meeting any inconvenients off good fun, with especially compensating our (future) Toddlers their experience and obligations, with Highly Cultured kind conditions.

#### Primary school:

The primary school(s) age of 6or7yr of age till age 12 to first of all not be based on intellectual/practical grade expectations till at least age 9to10 and very specific real just only the basics for no memory kids etc, by that age basic talking/scriptic skills to start crossing the conscious brain barrier of the non-intellecets/ADD/freetime wonderers amongst us all specifically naturally calm full day stretched lessons with bit to memorize rather than verbal diarrhea of present undeveloped modern intellect sociopathic unworldliness of present modern education ways..for the weakest non-intellectual students, special classes offering quality free time holi-day paradise wonder classes so to speak.

No tests should be decisional nor obliged for points or grades and all students may at will pass to next year higher each year.. This sense stands by the reasoning that most (like I was&am) of the non-memory/ADD/freetimewonderers whom not possibly learn anything more or less by having to high pase detailed present intellectual neo edu diarrhea demands I always compare as if modern education is a adult nasa training to prepare for astronaut missions adult life..Talk with and about and sit back and relax and have a nice time in obliged education age, and classes to make the best of each ranging from utter holiday/freetime alike edu-classes upto the common memory geniuses most of our times are now a days naturally gifted with. And I hold to the Toddler morale principles to reduce school standard obligations to at least no longer from early moring till end day time, and neither should their be kids present at the Primary school more than couple hours of tuting need to be compensated with couple hour of sleep/play/excursion/etc free time of most wishable situations.

After all, look at our adult lifes, our primary school education experiences we apply and needed in our overall further age student life and adult life occuptions, I reduced primary school to just need to get basic language abilities across (but no longer verbally or scription wise on a cray board, rather for instance by word processing learning with tutingfull auto correcting functions.

And I thinkno child should be forced to learn something what considered basic, if the kid does not understand the information we should be societies where in kids in such troubles should learn to make notice the lesson or type of teaching material is way above their league or out of personal interest etc or against any's will, abling our future youth to be able to walk out of classes and courses into school time what I for instance was praying and wishing and suffering and failing for, is for each kid and student is not teacable what does not like or can simply not learn and never could, instead free quality compelling free time entertainment or freedom is a basic plan-b, while plan-b can also be the kid/student's wish to replace what is incompetent learning teaching with classes what the kid/student wants and can do well instead.

My point is I regularly think about how abnormal our present universal education factors is for even our most learning fluent fellows, not one scored perfect score 100%, not we know of commonly, especially no kid/student who meets this obvious 'normal/perfect score' every year. I find highly intellectually learning abilities kids we know as our good and best students, obviously failing tests with flaws what are actually signs to me education is mistaking and failed I ways called imperfect scores what actually means it delivers whom failed to be obviously partially or much out of their league, while if education of the future to be much more talking about minimal basic is to wish to

get across by teaching and professional education occupation, and beyond basics there is usefulness and the obvious waste of education time and bad time as most their future was not a matter of being imperfect student nor usefully schooled but rather education should serve to be personally applied or other wise meeting learning abilities and learning/practicing affinities, there is something wrong.. Not only do failing bright students often later in life rise from a simple labor job to top functions what usually cannot be trained for the specific practicalities but rather become/gotten/mastered by simply being intelligent/fit enough, I mean our best scores are wasted by education what is not focused on compelling worldly fun compelling.. Can you imagine grasping a science like intellectual lessons, while than all education imperfect scores etc means fun has failed most and our evolution, while most I know their obvious own choices and potentials later in life seems to deliver and suffered further more our realities mostly have been failing us specifically to be delivered as professionally High Cultured peoples people compassionate and fun and flexible fruits of education and gifts to obtain happiness and to my principle to especially deliver people with special full work and life skills to be experienced the professional happiness by the fellows.

#### Highschool:

Now 12to18, 12to18 first the classic higher education levels of high school directions: Maths is allowed as non-obliged neither mechanic physics etc complex abstract theory monsters failing perfectly learning cool memory youngsters what maths-etc are simply impossible intellectual understanding&memory subjects -by neurological nature, while their adult education/career ambitions or after school career options based on classic high intel education training simply don't need maths there in nearly as difficult as the maths in the couple first years&higher of the classic classes they do belong to. Maths&etc to be courses what can be exchanged by upbuilding other normal intellectual courses of interest/abilities to replace present basic high math courses etc.

Now the practical educations options for age 12to18, high school is a teenage time of serious perceptive time share with the outcome and future of our fabrics of our societies. Practical education students many forced into by failing intellectual grades or by simply not matching the technical&classic high intellectual levels or rejected as trouble makers, well I see 12to18 as 6 years of time to offer calm but sure pace of making the best of each possible wished specialized experted professional skills and practice/school time flexible usefulness meeting the wide range differences between interests and levels and characters etc..

It starts at 12 with a full extended universally narrowing down extended list of options of what they want&not want to 'do', some will choose no memory no labor but relaxed freetime alike lowest courses of gaining good life time&future by especially freetime nice life best defined as holiday while yet all learn a paradise skill(s) to keep adult occupied life nice..while others will choose for obvious special professional career interest courses like everything with and/or 'all' about horses, or to become moral aesthetic music makers, etcetcetcetc endless options to suite all gifted students upto the most non-education kind their specific wish(es)/choices to do fuck all all day in their classrooms what need to have elaborate free time occupation collections/libraries/ball play etc class room and High Culture music etc, while a bit per day learn a small valuable lesson in life such as working is better than social revenue while what job spots are especially nice work quality time easy holiday alike and how to get such a opportunities going for themselves etc, exclusively noone else learn like them no education free time choosers beneficials of lessons upto good life quality time easy funny etc aims skills. While the music and other Arts etc for instance have 6

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not obliged: click 'No, continue to document'.

years to define exclusive High Culture individualities while graduate in very connected teachers their insiders world interested High Culture sectors etc as each graduating creations are results of graduating with worthy successful recipes what in best of niches hands and minds and rewarding sector interests and so I saw clear with a lot of insiders professional friends for life..anything but isolated valuable High Culture makers/shakers/minimal specialists.

The horses ranges from working with citizens horse activities such as touristic activities with horses, simply guiding easy routine out of simple mind passion, whom can work cross regionally and internationally, while the all about horses etc know horses inside out and all rather critical factors of horses and whom learn to ride and wellness while also medically practice like real pro's, these can at graduation surely fill the many interests and global skills shortage as such in all Highest commodities work environments anywhere. These just few examples of specialized practical or practical variation on High intellectual high school classic courses for instance.

That is all, be specific to what is useful educational quality nice good life time at school or at sort of rather outdoors day etc-camps alike imaginable discovery/visiting/"ice-skating/movie/etc ones..

But all students between 12and18 must participate tests on what morals and possible immoralities they are made of and not made of, this for practical specific training/function educations and higher ones to vett upon who is for instance suitable to be accepted to courses of the rather public sake&faith decisional influential job degrees. You're for instance not inhumane and opposite of humanitarian in the medical and other public interests degrees/functions/licenses.. Etc.

Further examples:: 12to18 chance for the best time of your life, especially useful sure recipes for success all students 12to18 can see all options tuted regionally, the lowest have no memory and don't learn and play hard in chaos, well, they to have to do nothing but bit short lesson minutes a day the teacher explaining them how and what is nice to later in life and what especially not not nice. These non students to learn how to spot&get&keep nice job spots and tha working a nice full time functions is much better life&satisfaction than jobless welfare situations if a jobspot is nice only and rewarding ok or even very well.

Another example is 12to18 everything about horses and horsing on several levels incl poor memory yet passionate students good with animals and people especially without a daubt, well some can learn everything about horses and the practices in higher theoretic demanding courses/levels, while others love to hang around the work environments working with horses. Etc, music making or continue for instance the moral courses as students whom will focus on responding reasonability on society practices and challenges and luck. While High classic memory based education students choices should no longer oblige complex maths or other weakness course, as the later study or work interest does indeed not need complex math's while they can do the classic High School intellectual educations without having to face present nightmare courses failing them out of classic education into technical level or in case of real math problem, down to the present practical manual labor classes..

This was the short version with just few examples but I intend to refind or rewrite the elaborated list of very specific ideas for courses and exceptions etc. knock yourselves creatively the career making education wishes out of you cosy relax chairs in a summer evening ideal breeze.

Now the Higher education and university education:

..with other words;: 'Can do no longer stands'. It is not a free of intellectual choice to become critical public sake professional if you are a apathic non-expert unhumanitarian immoral occult personality, this is the principle of continued distinguishing vetting decisional education/training must be, memory has so long been the gate to become whatever one's wanted, while many seem now a days full blown understated by bloody psycho occult amateurism&unhumanitarian non passion antiChrist public interests fields. Questions about worldly people subjects such as a good example for me is to see what the first year profession interest 1st year selection students, to answer personally on givens such as the patient mentions allwright about masturbation.. Are you ok or not.? And what do you respond in the specific cases.?

And guiding students what fail moral selection early study course time, for what lesser public factors directions/options each have. For instance if they got a hobby like literature or want to learn for instance history or management of land/map making, etc. managements or other back ground routine functions.

I figured it's not the end of the non selected students for their favorite profession/study, on the contrary Can Do No Longer Stands makes most students simply choose for a study profession what they are really good at a career chances alternatives what will make most glad and never missing their originally dwelling ignorent non match dream directions of choices, often popular. At all but are very good at more formal routine and other society functions/study courses with often much more chances than the usual moral degrees what have lesser options etc, while many other degrees open a multitude of life career job spots choices in society and make the rather peoples people much more able to score and enjoy an abundance of work opportunities applications.

This life work I thought about thru thick and thin and from own and fellows their true succeeding and our failing our tallents and gifts and how I&we were failed etc, I surely ow details I concluded, input or typed but what seems as Magnum Opus Life work subject of me I seem have lost and failed to keep mine on Education(2.0) together. I finally today have been able and fit enough to go thru most of this above piece here in MY HUMN and have luckily yet late add basics I knew and figured but just still needed to put to full use my fragmented thoughts and conclusions maturing to this subject. I have ADD Attention Deficit Disorder, so I have not a intellectually as work force/fitness in me as much as I wish to work and better and meet my theoretic Humanitarian obligations demand. Solo perhaps more on this subject and perhaps I'll be able to read what is here in this piece on the subject, to checked completion. I dropped out half way.

Notes you might feel inspired by and start to pursue (profound) solutions. Good psychology in schools is very important. It makes a bright worldly peoples people department/field what knows alot and helps the needy and all students. It is to be of good and up building opinions and to believe and take serious. It is to become friend of the students who feel not well and whom criticize the social climate, and with quite all bullying students.

It is also to make statements what lead to the psychologically bright helper of each school.

.. They've gone bad lately? Come and talk, we're much.

.. Have talked bad on one's in despair, join this class to get yourself the flair.

.. Hard feelings, come here to start healing the situation.

.. Suicidal, and or feeling in (en)danger(ed), or something weird happening in your life?

Come and talk, we can stop quite anything n anyone and we can get you anywhere in no time. This is the part against the domestic issues, the same motto expertise in reality in all countries in all regions represented.

By the least we recognize a victim as external outsiders or insiders to practice the 'by the hours or minutes, calls for help or the domestic harm situations spotted, to trigger the help, to be saved/protected very this new sort of very serious to nice good situation know how and full optioned by means, also to arrest the domestic harming/violent/abusing victims their fellows, helpable/reachable (by ultimate future techniques to stop outrageous/chronic harms, imaginable, mostly happening by fellow students).

## ART/M & SCIENCE & BUSINESS FACILITIES SECTOR –PRO ACTION FOR THE GOOD SOURCES

### ART/M & SCIENCE & BUSINESS FACILITIES SECTOR

You the service'facilitating'sales'production'potentials''Humanitarian' functions, all service to potential as valuable productions as lucky moments of clearness and extraordinary contribution to upgrade living standards and basic and extended goodness and beauty (see the word 'humanitarian' and 'invention' and High Culture beauty) –State of The Mine, where have you been all the time before 2018 I knew my one.

I never see personal service that actually say hello by offering money and care what knows itself as equal to ours its future(s), yet.

I am invariably great. And the problem has always been why the hell I, am at least, not yet making money with my occupations also quite some offices exposed to my beautiful brilliance.

The problem is we not only lose objects of history' we also get not sold with regard and esteems way above any individual can level with: Pieces/Works/H.C.Heritage Masterworks/Magnum Opusses.

I am declared here for the fraction of what it should be on mine. (Don't worry mine&I will deliver all my career its potential, with some luck)

It diffuses and makers lose touch with great equally great potentials and works in progress or in highly potential –status as pending so far losing it and moving on beyond responsibilities of works to go with the flows of their functions.

No gain no saints no masteries with Humanitarian sense as true facilitating function(ing) no greats yet. Not one. Strange. Yes, We exist, and Yes we are at best and hold the promise for a quite instantly total good life and future world and humanity and great refinement.

And together, we, pioneers, start our highly successful careers living a hell of the “times of our lives”.

In fact more blond, is to say no one levels yet to facilitate on potentials what sense production(s) do.

This said, it is shortly but surely something I think, when the best of the best 'humanitarians/corporates' facilitate Us, speechlessly perfect We/Ours, “lay in the fat dark ashes of packs of no(-answer) individuals”-always certain risks problematic while we feel we get to stop and don't, yes 'The Few & Counting' our potential is god fully joyful basics. Work together, lift up the great's what tempting for what shouldn't be criminal chances for false amateuristic promises/interests.

The pleasure is not yet 'Ours'. Surprise me and others whom will feel home at the centers of our potentials where working out.

We are very humanely successfully involved in the best we humans'n'its can wish for as things we can prevent and stimulate with.

I can tell you, mine its potential is (always nearly) complete. The potential with me and my colleagues is of the naturally wiser and beautiful.

No-era blocking influential facility businesses with seemingly expert interests in the fields we de-serve. I remention not to mention a lot of offices promises lies and are organized con artist offices what simply are not a choice while often the only.

Now about the sectors: All complaints and sectors to be licensed to be in depth licensed obliged to moralize moral non-ethically challenging public/professional effects experienced by corporate entities and functions and produces.

Moral worldly high consumer/client is VIP and is by no means allowed to become victim of for instance immoral prices or service conditions what harmful and undescently immoral or fall victim to unhumanitarian/immoral/occult professional needs acquiring. No public factors of any company/entity to be licensed and made moralizing with original interventions to make free market

segments reasonable, and ruling&Law very sensitive on any harming of public interests. Of course this literary solo Magnum Opus with my ready solutions for public can use a reminder for job spots job demands must be moral proposals what easy, all jobs should in way be easy and comfortable aswell mentally as physically and technically and hours, all immoral bad job spots will become illegal and forced&helped to be replaced by automatized options etc. And working should always be worth while as in nicely rewarding enough. Enjoy my Lordship as my solving spares you resentment about the realities I would battle to become easy done. I'm just like I love mine like all love mine but reality is thus not unlikable as much as it is/was immoral at high human experience costs. Bless you cheap impossible job spots defined. But any later is strictly troubles.

Well, this was in short my successful basic full recall of my take on living&education-to-makesense.

..Bless you. :)

## **MEDICAL Chapter**

MEDICAL

**Sunday, October 19, 2014**

FOR MS PATIENTS

You might think MS is a well-practiced list of help, preventions and cure, but there seems so much missing.

Since few months I discovered Methylcobalamin and got myself Pure B, the product on the market here with a high dose of B12 in the best form Methylcobalamin, and well dosed high doses of other vit B's. The paper in the product did not lie, balancing the psyche. Since, my soar's stay no longer than a day and often never appear anymore. The effect did not last and now I use Vitamin D10 etc. for good contra effects (but not good on weed) against soar post-traumatic stress syndromes. I am balanced, I cope pressures with some sort of glance.

MS patients should take the supplements because they need to protect themselves from after stress etc.

Secondly, anti-depressant helped me during a critical period to no longer feel tragedies I notice of the world neither my own.

It is to have become much more intellectually aware rather than harming my soul.

How MS patients should say no and yes and not leave things personal nor to be pressured.

And I remind I wrote once a simple experience to press on the head the head down, what was wellness decreasing stress and muscle numbness. Who knows it might be something.

And there are nutritional guidelines for MS patients, but often never get this particular life style.

It is what to eat and what best not, and to not smoke and to drink and what, what vegetables and how to prepare them and in what quantities certain supplements. I downloaded the THE CANADIAN ENCYCLOPEDIA OF NATURAL MEDICINE (illegally, torrent) few years ago. There are sure significantly and crucially updated alike works available on the internet most probably. Be sure to take the above vit. B12 version if you are advised to absorb vit. B12, cause other than Methylcobalamin don't

have any super healing powers what noticeable and leave toxic waste. For your notice, I also use Q10 by the name of product Quatral-Q10. It gives energy and is often given for the muscles. But then again I read a mitochondria is wiser than Q10?

Of the few cases I heard of MS patients there were several whom had an explosive physical career and life style, I start getting the idea too demanding exercise might be linked for some. Good luck and keep safe.

Add: I noticed some processed foods such as certain spreads, butter cakes and certain coffees and other sub energy substances etc. gave very bad effects on the Energy level and muscles etc.

Well, MS is a serious illness what patients their protecting helpers and relatives need to protect by creating a list of specific products and from what brands are not good to absorb the side effects of. And alternatives of suitable products. Something like an International webpage what tests and informs.

To test there are new ways needed, in labs and with healthy yet sensitive people.

I add about the yawning product idea, it seems cool for MS patients when distressed to start yawning when they need it at moments of stress such as unreasonable situations. Also for people whom want to become sleepy, to spray in the mouth and makes yawning at best to find calm.

**There are stores lately what are especially for people with allergies, now such is groovy, but it needs to provide especially also for MS patients 'their medical guidelines. Normal stores should have some code people with allergies can scan what shows them personally if it is suitable or not. From a products webpage for allergies all products available can be seen and hold codes with allergy information. People could use prints with listing, or an app on their tablet, when shopping. Where they can be bought...**

## **QUEST: YAWNING SEEMS OF HEALING POTENTIAL -SPRAY ONES, YAWN SOME WELL**

You might think I'm only a paper pusher to a society what never do something based on wisdom, but I, I cry often till the day I'll be able to contact real humanitarially aimed places. (There are less than promises and responsibilities, and contact means fake if not impossible.)

See my wish as the enrolment of a blockbuster Hollywood movie with the best of the best humanitarians (re)solving big problems, with humanitarian wisdom, unlimited research and achieve reasonable practical resources, and up the sleeve of Global humanitarian leadership, and expectations in all good, bad and harmed involved of these problematic.

This mentioned, here is our first yawning lead:

I was physically burned out few afternoons back. I had my eyes closed, I felt like sleeping, but I could not, I was feeling apathy and in trouble. Then I started to yawn few times, and it first gave me vitality back for few seconds, and after yawning some more, I became calm and sleepy.

So I thought, what would yawning exactly do?

And then I started to understand potential results where for it might become useful to cure certain medical problems and moments of over reacting.

Here is my short list;:

- People whom awake in the middle of their sleep, for instance to go to the toilet or because they sleep only few hours to than stare or think half a sleep till dawn.

A spray, sprayed in the mouth, could make yawn some well, to feel sleepy again and comfortable to catch sleep.

- For animals it might be useful to calm them in distress and stabilize disturbing behavior.
- Also as psychological medicine, also I am not fun about zombie effects? Anyways, R&D interesting information this is.

Sunday, October 12, 2014

### **Add to 13-10-2014) LEAD FOR URLIEST DETECTION OF EBOLA ETC?**

For Ebola to be detected early as possible. I made this way of thinking for earlier detection of HIV some time ago.

It is to try to develop things what can be absorbed, and what influenced by the viruses only. In the way my keynote is for the least of viruses (and other medical conditions as well) to trigger a specific symptom. Such as a rash or a tickling feeling. It is the least presence of virus what should trigger something obvious.

A day dream of making a detection medicine where with the virus mates, or unsuccessfully tries to duplicate. If a virus by all it does and consists of, interacts specifically, it is individuality, can it be broken in theory? Shape or attractiveness.

Perhaps if it needs A for nutrition to grow or to move healthier, perhaps we can make a B what more of a feast but fake and bad for the viruses? And if such B or even A would be taken in a short but large proportion, side effects might be limited, to less than an hour for instance. (To think practical.)

And compose a full bacteria compound what ad's back all the good ones, in case isolating treatment of the aimed hostile virus/bacteria does not

work out and killing any small's in us. I add here now on 13/07/2016 the following brake thru lead: In order to even be able to keep people bacteria/virus free for longer period of time, to create medical drugs/substances (combo?) what replace the purpose of the wiped good bacteria and function equally beneficial to health as all good bacteria we have. It is anyhow important because of the applications of being able to for longer period of time protect people from any internal bacteria/virus affects as keeping the good ones their purposes working out.

### **I WORKED VAGUELY ON A MODAL FOR NON COMMERCIAL DISEASES TO STILL GET CURES WITH NO CATCH**

Finally I am happy to simply show a post I wrote year(s) ago for a modal what means to allow uncommercial research and developments for cures to noncommercial diseases to be financed. And the products to be reasonable of price, as they are non-commercial yet it seems hereby they can be developed with wise medical investments support. Friday, April 5, 2013 it is obvious a long list of uncommercial medical quests, and the passion should be egging potential reliefs.

For these to work out does not mean solutions must be based on financial investments based on profit urges.

Uncommercial long/difficult/larger R&D musts and potentials and commercial opportunities are assets for this noble fund modal note what should inspire new standards in the field of cures.

Dumb factors don't have to stay decisional about patients whom their sakes lay in the hands of un-pursued possible cures.

It is to create a fund what can financially support up building/brake thru research and development ideas. Management should be an expertise of this kind of fund.

Money can be an irrelevant factor. It is sense to make this sort of fund global cause it is such a small world and centralizing is a way of efficiency and expertise. I have some financial ideas what I found what seem sense. It is to tax very little bit globally on prescription and nonprescription drugs, but also things what do harm or not help health, such as snacks and drinks. (1) Think of 5 cent for instance.

Secondly, it is to offer investment opportunities, based to finance the commercially potential researches and developments and innovations. It is based on the principle medically rewarding researches costs hardly anything comparing to the reasonable costs of the treatment's ever. (2) And commercial valid research potentials to be financed but ruled so their commercial success shares a bit of its pie of all the reasonable money what goes around at their companies.(3)

Researches and companies do not all have to generate profits. The level of the medical/humanitarian solution(s) to handle and cure these diseases must be seen as possibilities.

Funds like this must support and help to achieve cures and possibilities of the medical world related to "un-commercial" illnesses.

It is a matter of A.S.A.P. field work results.

Centralized expertise considering, prospecting, making decision and adapted management. The need for and the success of a fund like this is realistic I think. This seems a first idea on the planet to finance for uncommercial and less marketable medical research results. I know fundraising for the good causes exist, but further I do not see initiatives focused on results.

This text is vague, but I wouldn't be able to re-explain my pursue its results.

Perhaps it is to add the successfully resolved quests, cost a minimal to be invented, and often the price gets made back on the future where

patients repaid collectively the price of the R&D of the inventions one day.

And the commercial developments it funds also deliver some benefits.

### Add to on 31-07-2014) ANTI MALARIA MUSQUITO CLOTHING?

This can become a sort of ink to wash the cloths with, so they keep mosquitos away permanently, like ink to color cloths. Lasting, cheap, effective, invaluable, sane and non-toxic, etc.

Simple and possibly part of the best anti Malaria solutions, as in also for home entrances “painting”.

What is the best is for good companies to be allowed to produce it too.

This way the production interest raises, and the field work results gain. It needs to be so cheap it can be given and taken for free for all whom need it. It seems a good thing if the solutions can also make Mosquitos’ feel ill, not just stay away.

Home entrances and beds should also be treated permanently.

Friday, July 18, 2014

### **MEDICAL BRAKE THRU'S HAVE OFTEN NO IMPACT, WE DO NOT USE THE WISDOM AND POTENTIAL, AND ABOUT THE HERE SHOUTED SPECIFIC MEDICAL MARKET OF PREVENTING DISEASES**

We all hear good news and important tips, but many do not hear them, and certainly do not benefit from the medical frontiers/brake thru at this retarded present. The best for everyone.

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Make combo's possible. And prevention and cure against a whole range of illnesses in new hype medical care vision. "Town" wise.

**Friday, July 18, 2014**

### **New basic prescription and supplement drugs market**

Medical prescription drugs usually try to solve something, well I thought it would be good to start a new market: the one of preventing illnesses. Than I thought it would be good to create combos. This of course aside from all the free natural options we should know of, there are many preventions and cures what we can also benefit in reducing the risks and cures of certain illnesses. The market of prevention is I think, something what is hardly reaching any people, really. Preventions should be a basic what all people should benefit. I am so wisely engaged in the options by theoretic humanitarian wisdom, I understand it as done but not yet, and not yet for free. Imagine if people stay healthy with 30\$/month supplements, what such lowers the social security bills?

I now think working at this piece, for food deserts and scarcity perhaps to be solvable with concentrated natural basics. Preferably biological and GMO free. This mentioned I owe my GHLFMM project givens to become a book, so we can have confidence in thinking about providing the 3th world these natural essentials.

I wrote several times before, about when providing a full diet there should be standard allergy tests developed what good for mass use. I wonder where I will be next year and how I'll act on the symbiosis. Work at best, give it your best, and do what solves your health (risks). I also add

I am a fan of prevention as much as all the people at potential risk to get a preventable serious dangerous medical condition(s). Prevention is supposed to prevent critical diseases, so I am in the important cases for full coverage of all citizens at risk, but fully exclusively covered for those whom cannot afford, and where ever. And sane, out course.

Thursday, July 17, 2014

**QUESTS:; I THOUGHT TO REDUCE MEDICAL MACHINES, MEDICAL TOOLS AND MEDICAL HR FACTORS, SO THESE BECOME MUCH CHEAPER, YET ENOUGH (even more secure) PROTOCOLS TO APPLY**

Medical equipment and tools are needed in all places. Also the medical staff requirements might be reduced in exclusivity.

The functions of equipment, tools, staff structures and medical infrastructures, are at this stage a new field to think out of the box about. The present facilities and functions are costing allot more than our resources can be useful, for all regions on Earth.

I have made the conclusion these medical helps need to be simplified in order for humanity and all regions to be able to have the options to benefit the medical basics and frontiers. Equipment, are often made very expensively, and so to speak really not efficiently. Neither are they made in order to replace the use of expensive materials and ways to meet the functional purpose. They are inside out all made of expensive, nonefficient and probably universally 'dumb' parts and most costly HR.

Wires and electronic conduct materials should be reduced and replaced by conducting solutions what can be made at very low cost. Optical material to be made at lower cost.

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

Hardware to be developed so it is simple, secure and just made to function the purpose. The case of the equipment's can be reduced to basic functionality and of materials what cost less and why not agriculturally obtained raw materials. Medical tools, can perhaps be made of alternative materials, replacing the now common expensive metals and expensive license production processes. The computers should be reduced in costs, and for instance managed technically by online technicians or so. The software to be reduced to simplicity of purpose.

And both hardware and software's to be made mechanically secure. Now the HR efficiency. Can certain functions now licensed to be done by highly educated staff, to be filtered the functions of what could be done well by a lower educated staff member specialized and licensed to operate as reliable or more reliable as 'highly' trained staff, duties what don't really need the rare staff.

So I mean to spread rare HR to common HR availability, functional proportions and costs.

Further down this book you'll read about a medical check modal what can inspire this HR opportunity.

This of course for the 3th world and 4th world to be helped medically in the future. Think also about to invent agricultural ways to grow alternative construction materials for infrastructure, is fungi something we could frontier? Imagine hospital and doctor's offices to be built with alternative infrastructural ways. I know fungi is used to grow fast and easily in forms, when dry it becomes very hard and is very light. It needs to revolutionize in such ways, allot of still expensive construction means. Anyways the solution needs to become waterproof, but I know agriculture is the way for cheap as high quality alternatives, as the

proportions and very low investments and high production proportions, make it sense to me.

## **WHY (MECHANIC) MASSAGE CURES MENTAL PROBLEMS AND HARD FEELINGS, AND WHY DUVETS ALSO**

You got it, I just know it does, and it is why massage machines (compareable to a construction tool), should be used in psychiatry's. Simple. I remind us I cannot ignore the fact I associated duvets for inmates to sleep under are making kind recreation.

.././2015

**TO VAPORIZE NATURAL TABACCO**

Vaporizing tobacco in the future, rather than the tar burning problematic.

**Thursday, July 10, 2014**

## **THE FUTURE OF PSYCHIATRIC HEALING AND CURE-ING LAYS IN CREATING COMPETITION TO THE EXISTING FAILING ONES**

(rTMS goes a whole way in good places by good people.) It is the field results what count and to bring and create good news for and with the patients and the needy. Competition is needed to compete with the existing failing ones. Sort of like privatizing the market challenges and opportunities. To be brilliant at people and neurology and psycho analysis and basics, especially kindness and prevalent and give acts of harming or

evilness the truthful attention a consequence gets to know'n'change of hearth etc.

It is obvious that neuroleptic medication are a pile of pseudo functional and compiled heavy torturing side-effects(thus with no healing effect) are old and not the first things in mind of psychiatric/neurological/psychological excellence, far from it. What does not much cure/help and what has sadistic only effects should not be considered as medication anymore but as chronic torture only creating troubles and enduring to often already the victims patients are when entering for treatment.

For other and the perfect treatment/cures we must look at the street drugs 'ice' for instance (could be named differently but the strong crystal clear into normality conditioning peptides), because I had the by mistake chance to have absorbed just a tiny bit of the stuff and it made me feel undone from all physical 'weight'n'discomfort' and made my mind one and free from any weird behavior, as if perfect but not of course. But here in lays a condition and facilitation of people their life and work life what I thus know can be crystal clear psychoses free just by being as sober and well and serene and active able, it is undaughtly a conditioning/facilitating/sobering/empowering effect what is a perfect Quest to search and R&D for to get the non-harming non disproportional alternative for the same clear satisfied normality only (certain specific) street drugs are giving, isn't that weird, such wonderful effects yet all the sadistic heavy side-effected poison of most of the anti-psychotic Pharma "World" whom anyways not of a friendly and actually whom are the crooks of the patient victims, while the street drugs world got us so close to normal, hm.

I also want to tell that in the existing failing 'evil'n'denial' psychiatry's there are patients whom cannot defend themselves against heavy side

effects and the large chronic decades long multi pills diet to their weaker whom are truly as normal and gentle as can be, but the torn of the socio psychopathic routine pills obsessed “doctors” (sadistic dumb losers we should put out of job as they are non-sense and not specific treatment able add all.) their side-effects what is their only disability what so ever often.

Well, for the normal non symptoms long staying patients with literally a dozen pills 4 times a day, well, to be rediagnosed ‘professionally’ in way they with willing kind help they can talk and explain and complain etc. so the truth about their real mental/emotional/co-existential state get a break down of the excess of useless non symptom prescribed substances, and get if they need anything anymore, because many are sweet calm and often just taking much medication because ones a routine prescribing eager “doctors” prescribe (for no reason and way to high dose) the long years staying elder (and younger) patients will never get rid of their medication ever as these “doctors’ do not un-prescribe but are imagining that each is essential and critical while they had no reason and no cause but highly sensitive prescribing on schizophrenic diagnosing on totally normal behavior such as the “doctor” and patient I have known, asked me the first time he saw me (me calm);,, “Tell me your life story” (out of the blue). I said; „euhm euhm’-and I was about to start telling within the same 5 seconds. He stopped me at my euhm (ultra short where should I start), and said; I’m going to give you Solian. That medication is to feel less unsure and more like you’re really stoned on weed and drugs like a David Lynch movie. I was shocked, 3 seconds and he found I was not fluent enough?! But I think it was because all his patients got Solian (and some other collective med’s). That is the rotten non-science of most or some all the existing hell snake pits psychiatry’s by fellows but also often by staff, we simply must perform perfect curing and much much shorter

staying's and no suicides and no evil tricks and actually each can close door of room from the inside instead of having to sleep unlocked door amongst the evil layers of patients whom are not victim but harmers, you know. Etc., hears to well as possible new Psychiatric free market new standards of medical high expertise and business psychiatric healing and troubles in counting living 'Good Life' and perhaps 'Humanitarian' rationality and help as well.

Simply, to not accept dumb financial competition, but to really start up from bottom to top effectiveness in this wonderful field values for medicals whom have a passion and know how to work with citizens needing psychiatric healing, education and help and above all sense of reality yet the know how and where for life to be possible outside the pressure dome suffering and living and re-socializing or decriminalizing amongst other nutcases is not healthy and often not really any safer nor better nor remotely wise, but good 'after'-treatment relocation and giving patients' rights to decline certain circumstances such as torturing medication what of no use, or social medical obligations such as medication or dialogue with community medical/social independent help forms at home or in local centers, this was in my case almost equal to possible death cause risks, for instance, really horrible what sure basics of the worldyness (re)solving at best perfectly effective psychiatry expert help and healing at well at best. And life organizing passion by professional goodness and special specific (if you ask me separate the good patients from the bad patients.) cope ability to work with unpleasant rather bad individuals etc.

You, mean helping at best and best practice and full required help and opportunities..

08-07-2016 MINDREADING, A SHORT REALITY CHECK TO THE SILENT UNVOICED VICTIMS/SUBJECTS THEIR LIFE EXPERIENCE IN SOCIETY AND THE WORLD, AND WHAT SEEMS THE PERFECT LIFE LONG CURE

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

TREATMENT FOR THE SUBJECT VICTIMS & THEIR FORMER STALKERS Thus, now about the super good news to all rooted for victims/subjects: The Perfect Cure: rTMS against “hearing voices”, it appears that telepathic alike uttering&badification can only happen by a tiny spot on the side of the brain, but not just making notice unreal voices but is telepathizing trying to have real world mindreading/mind stalking going on and in the unfortunate victims/patients/subjects the worst case in which dire utter immorality and evil hostility minded especially when made into communication evil cybernetic hyper expert to their subject, the spot is a monster in most or all cases. With this rTMS stalkers can just not think anything on about or against you in telepathic way. And any feelings gone, and all voices hallucinations, living very cool. This application of rTMS what is really recent new top neurological cures, is named Repetitive Trans cranial Magnetic Impulses and by means of 2.5 weeks of daily 20minutes of 1200 impulses, the critical essential requirement for the bad neuro uttering/telepathizing is literally as tiny brain spot made nonfunctional as erased from former hostile uttering like the “hearing” voices and mind being read and stalked. If staying sober as in off drugs and too much peptide like coffee during the treatment, than the treatment is almost in 100% of the treated patients 100% successful for life and the symptoms and mindreading/stalking by others can never happen again, and all nasty bad feelings and fears what due to it all, gone replaced by feeling really normal and healthy and good to walk and mingle with people again with reassurance and sense of privacy and security, even the most severe mind readers and voices are than at and to like nothing nor anything of the alike was wiring them about and to the living of the victim/subject! Happy birthday, telepathy tragedy reality, history made all victims their wishes and physical/emotional bagging for them minds talk(er)s to stop and themselves to find a peaceful place to be and work at, a historically very special moment it is cure-able and so well wonderful, it now just must cover the victim needs to be cured as much as by neurologues-assistence standards of perfection manage-able worldwide. I want to add for the time being the treatment availability is limited and thus by this piece onto long waiting lists, but I am of opinion telepathism victims to be given priority in treatment cue list as that is a real life dangerous and often lifesaving and by the day and week critical, these victims need this rTMS cure must. I also want to mention I hope for the academic hospitals whom now operated this rTMS treatment to consider to find an empty corridor with multiple rooms to use to expend. I thought neurologic assistants can perhaps be made licensed and moralizing and findable on the HR medical market for excellence, so not relying on a neuro physician to be with each treatment...

Oh yea and thanks science and psychiatry world, to be so dumb noone would wish to be helped by you people even if the only lesser way of survival if not for this rTMS. Untill now, you were really getting at the victims, not just with your denial non-sense “as if not being honest people go to the toilet only the patient and victims of them socio psycho’s, and that is uncure-ably ill for life misdiagnose, me for instance was so real and taking it like a man but just got criminalized for any of my gentle honest reply I was probed etc. which they never checked analytically what gotten into me that time I was on edges of livability for instance to the effects intended outside of the treatment I already was mentally chronically tortured by. Do not dare to say in ways of the unbelievable total denial and illusions

reply not even to check the prob injury for instance, none of any medicals serenely calm and a bit sad asking to get checked what gotten into me at these ¼ times I couldn't take no more and had to ask for medical securing health and analytic bottom of what, none of many randomly around the country. If lucky it will not even cost your governments piles of law punishment financial compensations far back into your really unexpected massive criminal conspiracy most of us 'getting real and silent' took (take it) like a man so to speak and did not beat the shit out of your dirty psycho trick victims hypocrisy false diagnosing as no sense of reality etc. paranoia illusionary self-imagined victims of them 'bi able bad nature' of crowd and public places. Yes! No hard feelings ey people, but this is just basics I really could not leave out of this new good news piece, now you "take it for ones like a man", please. Morally and prevention of death by murder attempts etc. broad special protection for the present uncured usual telepathy'n'lifestyle victims. In this specific subject I have a good quest helpful thing the world must develop is to also foresee toxicological and medical hair analysis for any requesting citizen with this co-existential conflict problematic as frequent harmed uttering and physically, even regular community's routine license analysis at fraction of present price tag but highly licensed and moralizing. You never know, the evil I saw was all medical and often trust relationships with other people what we fall in such often from first or private contact can be felt on uncontrollable indiscretion and by all means so avoided as risks. Hair holds all substances what entered your physicality over time of 1cm/month length is the time know everything of, it is cool to have it checked on alien hostile substances if you are more likely having/created/natural enemies. But I am today 28/10/2016 a very missing link what was meant to stay an unchallenged matter but here it comes, for hereby the science and invention world to start R&D in pursue of the way what allows by a small like sugar blood level home test gears, an easy usable way to easy and fast self-analyses gear to check routinely as frequent as weekly on toxic and medical alien substances presence or for most of us all on normality. The extended full list of lab dynamic ability to name any by name. I know this is a challenging quest to try to get all this into very compact size, and a of course a functional way to test the hair directly without the need to cut off any and in a way what practically easy and on few basic lengths of the newest hair such as one week or two or a month. It is a new market to offer licensed moralizing low cost hair analysis to all whom need to be sure, you love the truth and you defend and protect all good citizens. It is true, parties, cities, small cities, and even towns or home near independent businesses etc., I am of opinion these places have nothing to offer worth any risk to victims of high frequent bad hostility and disrespect of telepathic uttering. The best is to stay on the healthy path to live healthy and not take drugs and to stay away from troubles/problems/scary people/places. It is not worth it to mingle with people if not having to or avoidable. Always put your personal safety or the one of the victim you can help with this basic do's and don'ts and risks avoiding tips, to think of safety as telepathy victim or drug users, to just be at a more real risks, to be picky and learn where to stay away. Amongst your highest personal/career resolutions before successfully rTMS cured. Where they are 'unhumanitarian' and uttering brutal and immorally uncompassionate, stay away by local tendencies, spot a nearby or region where people are known to be much more friendly by nature and much less known for unhumanitarian convictions. (Unhumanitarian means to not help and deny any need for's help and help ability, by nature to not feel like helping but rather also endangering.) And don't go to a pub for instance, do something nice not dangerous like this.

Basically, we live in dangerous times with psychopaths and sociopaths what harm-able people and the usual victims of all guts. Work and live as remote as possible if you ask me, the civilized world is often no good in mind read discriminated and not helped, attacked life's. The victims need best early childhood diagnose and rTMS treatment and life and work guidance specialized

in living consciously well about who does and what and what not in personal life and community and society. I can add of experience that this monster what makes voices etc. in us and winds up people at/about/on us, also is in control of our physicality in some of us, especially PTSS trauma problems, emotional, physical and mental and fear wise and able to attack us with even more shocking matters. It is to most of patients, evil or very brutal by nature of outrageous or not done. And to now address the stalkers. People should still make themselves the difference between being good and not harming scared people like any you might indiscreetly grasp of if that's what you wondering moisture up, and as people with no special interest reason to consider "to have a change of hearth" to not want to do evil nor harm any telepathy victim, but rather to at help and friendship and relatives to be informed as early signs as possible and what is going on and hopefully informed enough to arrange the rTMS cure soon as possible. I asked a private life person ones if she could chose to mind read/stalk and chose to not if she wanted so, and she said yes, like a switch on/off in my brain, simple, to switch it on or I presume live on or till change of heart and mind and restlessness into the more private elite reliability comforting calm non-socio charming individuals like evil women holds a fact these bad females, girls are known to have the 15yr of age critical turning point to normal or those going couple years'on beyond actually only getting more sociopathic/bad etc. I hope we can ask you involved at and to victims you spot and get/got into it, if you can consider sensibly to switch your telepathic-alike figuring grasp off if you can, please, have mercy to the in survival mode victim of your actionable indiscretion and at you, please have mercy to any subject victim because the suffering is really severe to never know what people go how what side-ways on edges of coping the fact anyone anywhere can mean extreme traumatic comprehension evil info is how rumor or dangerous etc. Have mercy, show some mercy, do not walk on in public neither at a victim subject, learn to live your own life and let live the victim/subjects whom surely peacefully "lick their wounds" whenever not under risky stalk, just think open subjects are just living their life's inside and outside and lifestyle and wish peace at them and about them to stay forever, understand telepathy minds talk is turning the life upside down and into troubles depending on your will's or, off mode and give them survivors a sense of liking you and finding co-existence at the right living spot and basic obligations where no stalks happen something still very scary but at least not un-doable any more. Show mercy, show some dignity, respect privacy and peace of mind, please, can you switch it off. Because victims are switching it off, it should be a basic medical test in life to see if telepathistic inner bad brain spot hotspot of evil potentials.

## ADDING PATIENTS HYGIENE PROTOCOLS AND MY SUPER GROOVY HOWTO ANTI BACTERIA/VIRUS APPROACH THINGS I ASSOCIATED

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

Most dates of this pursue got lost or never typed. Anyways, let me start by explaining how I think we can undo infected patients from bad bacteria/viruses. You know my 'to develop a sort of heavy micro life killing substance. So also all good bacteria/viruses are killed. But to simply add back the needed good ones after all present bads and goods are gone. But I just made up something more to this method. It is to create substances what replace the good bacteria their purpose, as in having the same effects as all the good bacteria we need. This way longer periods can we be kept bacteria and virus free because all what good bacteria do for our basic and extended health is done by medication(s)? In this matter it would be a combo, the wipe and the alternative functional substances to replace total absence of basic needed good bacteria. Now, I leave us up to the original matter of hospital/after-surgery patients and infections handling:

Add to 17052014:

- Things such as clothing, dust, feeling cold, sweating, old high use cloths, bad sit-uations, forcing the wounds and inserts, too warm too cold, coffee, other drugs, etc.

Not good. We got I think to know, a little creature in us what feels and knows much more sensitive than us, and it is a princess?

- Sweating on a minimal absorption of nutrition what so is about toxins being released because the patient's system is purifying toxins out?
- But also stepping into and sitting in a vehicle and the propelled air supply in the vehicle to be set on medium, and the car perhaps best not smelling repulsive such when much smoked in the vehicle, counts also for the home smell and the home climate, etc.

- I focused on the fact factors of 'left hospital' are crucial to condition hygienically wise but also prepare involved and evolved to do the prevention handling, where for this piece is a greater.
- I associated many patients leave hospital soon and so suddenly must move and endure and support their pose, face temperature difference(s) and air and climate, stay ultra clean and dry, not putting tension on wounds (and inserts), clean new fabrics and profoundly cleaned materials, pets, smoking, etc. risk factors.
- Often patients wear cloths what totally not suitable to bring the risk to a minimal. I wrote the fact routinely to buy new set of cloths and to wash these of course, to clean the cob bets where the clothing lays in, where the clothing was temporarily placed, but also factors such as lean furniture such as sofa (material, dust and dirt particles), bed, belt, etc., seem also important to treat.
- Furthermore to not uncover clothing to show the wound etc. to curiosity, also the fact sweaters and t-shirts rest best not on pants factors such as old much used/'filled' textile and also the fact belts are a factor where with the t-shirts and sweaters lean on. Think also of fabrics such on the bed, to not be too soft and neither too cold nor too warm.
- As well as the bedroom and home temperature, and putting a indirect window open several times per day even in the winter, unless you have a very small home you could air it while you stay in the kitchen for instance .. Also for a home to be colder than too warm, and very clean. Let it smell like its brand newly cleaned.
- I also associated the fact insertions coming out of an opening do move when the patient is moving domestically what can cause the

contact tissue to be at risk because I thought such might react in way extra sensitive and perhaps so even the tissues 'sweating/releasing' toxins what seemingly can cause irritation and escalation.

- It is so I conclude after surgery fabric contact factor basic needs to be especially created to be most suitable to wear sleep wash and dry off with. Perhaps even best being extra impregnated with an innovative fabric-etc. moisture.
- I now associate in order to have the required 'left (&) hospital' courses and products of rental. And washing of the standardized cloths perhaps best foreseen as basic local medical community services.
- Also footwear to not be the used ones, including socks, but the footwear and feet to be kept as clean as possible.  
Furthermore, curtains, the closing and opening of them and doors and air-movement choosing off most favorable staying according to their risk, as to clean curtains also.
- Not being able to wash the patients well is leading to a skanky condition/sentiment what makes the patient's physicality/skin and outer area to feel and become fail and risky by releasing and starting to contain biochemical toxins what the physicality knows like the person of a drip on 's eye so to speak, I presume.

So a question is how to wash patients and patients home whatever the domestic, social and financial situation is of the assured patient. Prevention handling, is best to become staff and patients handbooks about the perfectionistic craft and lifestyle required in order to prevent wounds form infection.

The cleaning of the open and bare tissues at risk to be a practice of effective sense (manual) handling to treat the patient and risk tissues ,handling the forms and sense decisions how to go about the to achieve instruction.

- Pets-conditions are also a factor what so best solved and minimalized, I see pet hotels covered by the medical insurance as normally important and I add it seems nice the patient can request suitable minimal risk seeing the pet. This can be the hotels can make video footage of the pet and audio/video call perhaps sure etc.
- Prevent coffee cause it makes sweat. And secondly perhaps we can invent a medicine what keeps the skin dry and not sweaty but perfect physical biological state for feeling inner optimal.

Back home prevention care is elaborated. What I can mention is for wounds where something is inserted and coming out of a wound, well, to spray a sort of mask plastic layer what can be peeled off again.

I also have many tips in what back home with (open) wounds needs as prevention affinity. It takes such as cleaning the home, not near wind/curtain and cloths etc. protocols what seemed sense to me.

Add 16052014: Perhaps a hospital soap what gives a benefit to whom washes/disinfect their hands with it. Like wash your hands and so maintain your health. I thought of vitamins but also anti-oxidants or so(?), or making/keeping the hands soft and dry (orange peel of any use?).

:) This way one personnel would clean more eagerly the hands.

Searching I came across my 2020/2050 medical sci-fi session. I add 12-01-2016 for surgery equipment to perhaps be sensational to the physicality it operates on. Like 'long lasting calming' cutlery equipment but something perfect. And preferably lasting a while. What are perfect conditions for immune and feeling perfect to heal, and actually healing conditions what perfect for painless recovery? If already possible, and this can also be new wounds condition prescription drugs.

I add 23/01/2018 For the surgery tools in physicality used to be marked digitally like the marker pen of rTMS treatment, visualized. And for the cottons used during surgery to be degradable.

### **Perhaps a tech lead to reduce the fear factor of doubtful sounds, and a tech quest for healthy emergency check on potential collapsed lung**

First the sound difference what seemed to reduce fear of doubtful or post traumatically associated sounds.

The sound sounded up and down in volume while the sound (source factors) was stable, I heard it flux in volume decreasing-wise.

This had a calming effect and took away much of the impression of treat.

Basically to invent perhaps a medicine or tech what makes of a so to speak "M" sound an "S" sound!?

Second topic is the possibility what seems nice to innovate is to check on potential collapsed lung, by sonic -. Or so, rather than by Rontgen RX imagery! As the problem for getting the healthy MRI scan is the long waiting time and potential collapsed lung is an emergency. Anyhow good to have it particularly healthy and so I recommend to also see what options we have for other specific tests to be replaced by healthy innovations. I wish you a good year and don't forget I don't mind some royalty :)

**Monday, March 31, 2014**

**LOW SHOES OFTEN HAVE NO QUALITY SUPPORT, LAWS  
COULD APPLY TO HAVE SUPPORTS IN SHOES  
AVAILABLE FOR FREE PER PAIR, OR AM I CRAZY  
ABOUT BACK PROBLEMS?**

Low shoes often have no support included and so, are unhealthy. It is the cheaper shoe of the sort what is unhealthy, but to support the physicality it seems cheap to find a commercial way to get supports into the cheap shoes consumers buy and get.

I presume the factories should include good support, you know.

Knowledge on what good supports are, should be made available to makers and suppliers.

Also we could make a site where material, design and technical essentials are shared so they get applied to raise the quality and renew the industry with lasting factors. How to prevent sweaty feet for instance also. It sounds stupid, but it is vital to get it into the low budget non ergonomic shoes.

Saturday, March 8, 2014

**OPEN QUEST: TO DEVELOP an ANTI-DOTE GOOD TO PUT IN ALL ACOHOL PRODUCTS, AND TO MAKE LAWS WORLD WIDE AGREE TO MAKE IT OBLIDGED FOR PRODUCERS OF ALCOHOL PRODUCTS**

Let me start by saying I think people whom get aggressive when drinking alcohol are “allergic” to alcohol.

They do not only get drunk they get aggressive and or get bad thoughts and utter badly. Personally I got a while aggressive thoughts from drinking the least of alcohol myself, not with all beer bit certain brands. Well this post is to introduce an open quest to research and develop an anti-dotes for alcohol-products to have no longer an aggravating effect on users their brain and motoric, whom get 'aggressive' when drinking alcohol. And when used alcohol day(s) before. It calls for a new standard anti-dote what is perfectly implementable in all alcohol products at production source and at home.

It of course must have no taste influence on all the alcohol products, it must be very well functioning and without side-effects. By this I mean to get the aim integrate able.

I add here many months later or even a year later a fruitful quest when I enrolled wondering with alcohol addiction on my mind, it is to pursue and try to create a sane no side effects ‘liver neutral alcohol add with no taste change and still the same effect of the alcohol’, you get it, it is to reinvent/create/innovate alcohol or add to alcohol, what makes the alcohol not affect the livers as in liver neutral making. To disarm alcohol/liver health risk factor.

But I reasoned wondering also another ‘sane add/innovation’ quest: It is for alcohol products to be able to perhaps no longer be addictive.

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHML0X7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

Something what gives the feeling of alcohol use but what makes the alcohol drinks no longer addictive 'I know this is a far out difficult if not impossible and only simple uncovered aim attempt, but we can try and research and make the quest public, the interest and pursue start is sometimes compensated by others their luck and brilliance. And no longer bad for the liver.

Anyways, non-addictive would protect youth and be of interest of governments to who knows one day be asked to apply the sane solution by making it (inter)national laws what oblige alcohol products served and sold to be standard made with.

But on the other hand I just figure perhaps perfect vaccine generations is also an option. Well suddenly and not addictive anymore means you get drunk of drinking it but when you have none you just feel normal as one would not feel side effects of wanting alcohol and if not drinking it one feels not any sense of stress or urge for it and feels satisfied and neutral. But one can still just decide to drink or get drunk and drink all the usual way but the day in day out drinkers will perhaps skip some and perhaps think about their money and perhaps simply forget to drink and finally be able to ignore alcohol and start drinking on more preferred times of the day or week. Interesting and I think it might even become part of alcoholics their life and partner what helps them cope with the no drinking times of their days and weeks. Perhaps just a little pill but this sounds inefficient as in costly. If the effect and experience is perfect perhaps alcoholics are actually the user group profile what appreciate the invention/innovation the most to give the drinking a place and decision. Looks like this is covering alcohol perspectives to consider and get inspired by and to attempt.

What I sort of want to avoid is a capitalistic value/price tag to any solution of this. Good thinking does not cost much I hope, and that production

rights are shared to good other companies. It leads to financially neutral desire and aim. Perhaps abundance and cheap is a wish making the achievements.

## **RESEARCH INSPIRATION TO HELP FIND CURES OF DEMENTIA**

I think the causes and symptoms dementia is a Post-Traumatic Stress Disorder behavior, but actually I don't even know remotely.

I think patients their subconscious or brain-.. is traumatized by means of subconscious auditive hallucinations.

I EXPLAINED DEMENTIA IS CAUSED BY (YET NOT) noticed "VERY LISTY HARM IMPRESSION/VITA ABLE VOICES" (auditive hallucinations). THE PATIENT CANNOT FOLLOW THE UTTER BUT IS CONSCIOUS INFLUENCIALLY SUBCONSCIOUSLY, THIS IS MY LEAD. IT MAKES APATHIC AND DEMOTIVATED AND AGRESSIVE AND BRAINLESS BETWEEN IN MENTAL PIKES OF EVIL VOICES THEIR KNOW HOW ENROLEMENT. IF YOU KNOW WHAT AUDITIVE HALLUCINATIONS CAN DO TO A PERSON AND SURROUNDING, IT IS NOT OF SURPRISE WE UNDERSTAND MANY OF THE SYMPTOMS COMMUNICATION GETS UNDER THE SKINN, ARE SYMPTOMS WHAT I PRESUME MAKE DEMENTIA RELATED TO SUCH WIDE RANGE OF CAUSES.

An rTMS treatment really helped me to regain my unity and to get disconnected from what is untiringly happening to me. But what we need is a full total elimination of any 'noticed, really' auditive hallucinations, what I think does not exist yet. Check it out!

People used to say voices give assignments, I did not relate to it add all. But now that I understand the basics, I know auditive “hallucinations” are highly suggestive, and more often without the uttering, spots and sensations occurred to the en- and involve ds. It does give assignments and it does make people aware how bad people are by the motives behind bad/retarded (s) talk.

Victims tend to be changed for life yet tend to move on as if horror after horror means to relax and shut up about it and to not go profoundly into details.

I say, let us be(a)ware.

**Wednesday, January 1, 2014**

**IS THIS AN IMPORTANT LEAD FOR URLIER DETECTABILITY OF HIV and other viruses?**

- I am fond of a lead I made for early as possible detection of viruses present in physicality. Can a medical drug be invented what least of viruses trigger symptoms of same momentum short rash?

Imagine you take it in and if a virus is present than it triggers the medical trigger drug its symptoms such as a rash on a certain spot to just give an example. So if infected, even by a day, presence of virus triggers specific symptoms what show the tested individual is positive.

Far out but can a bacteria based medical trigger drug be designated to be triggered by the least of present virus present?

- Can there not be made prescription drugs what do handle early as possible HIV virus presence.

Tuesday, December 31, 2013 JUST SAW FEW DESCRIBING AND ADVICES VIDEO ABOUT PANIC DISORDER AND PANIC ATTACKS, and I got an unconventional idea and lead for prevention etc.

Well, anyways, these panic attacks it is here for. The advices were medical treatment and breathing techniques you know the early information I got in first grade class on breathing well is to use the belly, to move the belly down and chest up like Popeye to breathe what makes breathing deeper and calms and strengthens me when I do it. (I add feeling the torso as main part of the physicality a strong sensation. Well, I linked something a bit controversial, it is perhaps a useful lead for some patients suffering panic attacks and disorders to have some effects of masturbation. A medical spray or something, but more than enough not working too much but with a maximum. I think masturbation calms down, or gives optimistic fresh energy and distraction from within the whole physicality and for some might decrease and calm thinking activity and nerve impulses disorders if certain vita sustained. It takes energy for the men to renew their system where so are I think occupying their physicality and state of mind what. Anyways, masturbation is not quiet what we are looking for.

In a way we look for them human effects what potential aims for promising medicine, here by. Just a medical simulation for the certain found embodying mind and physicality benefits after orgasm must be an important BIOLOGICAL LEAD, an inspiration source for ultimate research results but surely interesting developments. I add now 26/01/2018 as I was just rethinking about this piece because I have just masturbated minutes ago after two weeks of framed environment hospital where I was for my hopeful 2<sup>nd</sup> rTMS treatment (which has failed as I have been spiced to have voices on sober days too, thus the spot was moved so the neurologue wouldn't listen to me that it was off the point I felt first days

clearly. And the hospital there some staff members probe me on masturbating for instance in the toilet when alone, you know minimal bad pseudo telepathics, the first time I was there, so now I did not even dare. Jack asses I must tell, and I must say I have read a poll about the sex life of the Belgians as questioned at large, it seems Belgian couples have on average 2 to 3 times sex a month, so you can imagine how abnormal and unhealthy morally such must be cold and raw bad etc. Well, anyhow, I add here gladly now this piece to focus on the effect of orgasm of making love or call it penetration sex, as masturbation is indeed not what we are looking for as it is much less bio metamorphosement chemistry physically, I must say orgasms I have of penetration with nice vagina's of "women" I experienced so far all had much more after affect such as comparable to weight lifting power training session and proudness and wholesomely making feel as one physicality what as on a paradise wellness holiday, know what I mean.?:)

Now lets do this new male/female penetration orgasm mimic R&D field' I add I don't tolerate fake bad or dangerous applications, or my DREAMTEAM will stop any amateurism. This new field is a invention quest what cannot be failed or gradually developed by science, no, it is a matter of idealism, the assignment as above is clear and there is just no other way than this or not. No hollow bear stuff, be warned, as my DREAMTEAM legacy makers at me will also R&D this and btw anything in this HUMANITARIAN IDEAL SOLUTIONS MAGNUM OPUSSES, as this too, but not slow as you might think reading this part but rather know this is a very important medical treatment idealism what needs the total picture to be as good as possibly bio chemical physical health solutions much for instance lately we insiders know a glass of red wine has same cardio vascular effects as on hour brisk fitness, hence it is pursued to become a pill for disabled people so also they can maintain health of the physical

exercise. Well, interesting as to me drinking a glass of red wine does give me also a interesting physical mental state what seems of course far from optimal as it's just still drunkenness, so, this male orgasm of having sex with a lady in the sensation of a fine nice optimal vagina of a horny fellow female counter part. And the females there orgasm is interesting in ways I don't know myself at all what after effects they have and what difference between their orgasms by making love and masturbation. But I have of course heard and seen a bit what it does and I think the male orgasm by making penetration with horny vagina -orgasm effect and bio chemical after effects is I presume more likely to be much more beneficial for health and healing and treatments for the female health beneficials of this piece quest. So I mean pursue and orgasm of penetration of making love to female horny counterpart is more likely effects what much more whole some as the female orgasm seems I think either ways hollow and electric and not so generally "(w)heallness" at most bio charismatic so to speak. '...', I actually want this idealism new health benefits quest/field to stay centered to me and my later DREAMTEAM, I don't want condom & lubricants makers to come up with bad stuff, as I sense orgasm mimicking is not a game nor a toy, it is a very full pursue as I try to tell you is I try to tell the low markets opportunist pseudo chemistry market to stay low and of till it's invented Humanitarianly to perfection, as male masturbation orgasm effects are indeed not feeling really optimal at all as after effect. Thus, no "hollow bears sex gain", but the full and very deeply but yet simply analised and developed to make scientific healthy sense and as you know my career and near private DREAMTEAM our level, we do get it at best and to holistic perfection in no time coming years. So, I just warn, don't start selling hollow orgasms or so, cause I hereby want mine to prevail and hate pain causing bloody market amateurism. So I

expect total sense presentations of full achieved and perfected  
 'invention'(Dictionary invention: An invention is something what are  
 Humanitarianly upgrading living standards.)  
 ..So glad I came back to this piece this add, so much better this way.  
 Bottom's up ☺

**QUEST: FIND An EASY CHEAP GOOD WAY TO CLEAN LUNGS  
 OF SMOKERS OVER SOME SHORT GIVEN TIME** you  
 know it takes 20 years to clean smoker's lungs. Well I  
 hope you can find a way/treatment how lungs of  
 smokers can be clean in matter of short therapies (of  
 few years' tops). To clean them and recover them.  
 And of course to vaporize the future 'cleanest' tobacco  
 if you want but to smoke much more: healthiest  
 versions of inhaling healthy grace, something for  
 sane good living. ☺ I add now 28/09/2017: To wear a  
 belly squeezing belt makes to breath in deep. You  
 know like I learned in primary school, to pull in your  
 belly breathing in, it makes indeed your lungs  
 breathing in well more fully.

**OPEN QUEST: TO CREATE OR COMPOSE A COMBO OF  
 ==NATURAL OR MEDICAL PRESCRIPTION DRUGS  
 WHAT  
 TOGETHER WORK AGAINST THE SIDE EFFECTS OF**

## **Champix, THE MEDICAL DRUGS TO QUIT SMOKING CIGARETTES**

Champix is a medical prescription drugs what used to make great chance to stop smoking cigarettes. But it has nasty side effects to some people, what prevent people to do it well or secure. Also it is not prescribed to patients using neuroleptic psychiatric prescription drugs. What is imagineable is for scientists to create a mix of prescription drugs or create one, complementing Champix her serious medical side effects. I defend this idea towards the tobacco industry that the hope lays in the fact smoking does not have to be addictive anymore and a choice.

PS1: Long live vaporizing tobacco and sunny side up alternative inhale substitutes.

**Wednesday, September 11, 2013**

## **MEDICINES INTAKE AND ROUTINES ALARM GEAR**

Medical intake is important, and often not so easy to understand well. It should be of quality, and for sale already big time, but usually ideas are not selling even if basic.

Separate keyboard to enter data and screen easy ad lightest.

Medical office staff and patient can input via usb and set the alarms to go off when desired, via usb also.

Also the name of the medicine and quantity appears on the screen as entered.

It is rechargeable and with light energy also.

Get buying mainstream, healthcare.

## **DOCTORS OFFICE PATIENT INFORMATION PROJECT**

ALL Leads/Quests/Solutions CONTENT PROGRESSED&DEVELOPED&WRITTEN&UPDATED AND LEGACY/FULL PENDING ARCHIVE MILITARY STANDARDS EXCLUDING-SECURITY PROTOCOLS By/For DIRK GIELEN @\_DirkGielen: Twitter ghlfmm-at-gmail.com: Mail, Belgium, Europe. Status PUBLIC RIGHTS: FREE READING-ONLY & FREE DOWNLOAD OPEN SOURCE: -MY HUMN-, FREE PUBLIC DOWNLOAD LINK DIRECT&UPDATED VERSION BY DIRK -STATUS: OPEN SOURCE: <https://drive.google.com/file/d/0B4sXHMLOX7yWNm1vb2NqQ2x6X2s/view> notice by google to install Chrome is not oblidged: click 'No, continue to document'.

To interface so doctors can click, input and print information for the patient to put in a map at home.

Calendars and agenda I thought of as only detail. And recycling paper and on the prints to ask to throw the paper away with the paper bin. Is it good to make perhaps printers what have ecological ink and low consumption and more ink? Perhaps even alternative in ink?

**Saturday, June 22, 2013**

## **A MEDICAL-CHECK IDEA WHAT SOUNDS PRODUCTIVE AND EFFICIENT**

I just got the idea working on a larger medical quest of poorness. It is to create an education what train people to do routine medical checks on their patients/clients. Not only would they cost less than a doctor's attention for full medical check, but also the medical checks would be done completely and without limited time measurements such as apply for doctors.

Things like feeling/sensing the physicality on abnormalities, but also asking interpreting questionnaires' answered by the costumers, but also blood test and etc. none extremely licensed med. Equipment's. Staff their wage seem good to apply to manage questions and answers, to fill in answers by (less responsive) clients, and or family members. And why not a hospital check stay thrive of academic ambitions.

The check staff can with signs, refer to visit a specialist in hospital or personal doctor with the information description of check specialists/practices. Also when a patient has diagnose a check service could define what best diet and other natural cures support the treatment/procedure. State of the art. Even.

**Sunday, May 26, 2013**

**A TRICK FOR PEOPLE TO DISTRACT THEMSELVES FROM  
ENDURING WORRIES EMOTIONLY**

I had a bit of pain on my back and so I tried to reach it and to massage the spot. Well, I noticed the undertaking distracted me from the worry I endured.

This may be even slightly bad for you.

It seems advisable to 'try' to give ourselves a massage somehow. It made me 'smile'.

When feeling in vain, than these are moments of consciousness of downfalls what start to become depressing, worries and stressful, disabling physically and mentally.

It seems to decrease when our focus is drawn to something what needs our participation, especially physical technique like when I was trying and achieving what to massage my back. The manual reach distraction practice undertaking needed repeating attempts to fully achieve to massage.

Perhaps something else works for other people and there are very reasonable medical drugs what prevent things such as suicidal of situation and physical depression. I hope this may be a start of research into distracting- and anti-depressant exercises. But also exercise of course and supplements such as vitamin D(3)10 and Methylcobalamin.

Learn all you need on cells and fat burning efficiency, before you draw conclusions about this lead. ☺ PACE way if I recall well.

And get away from worries to where these basics are there kindly for any all.

**Monday, May 13, 2013**

**AN INSPIRATION I HAD WHEN READING AND THINKING  
ABOUT AUTISM Since date on.**

I don't know if the following helps but I have a sense it will.

To support contact and progress with the patients.

If they're wise, say brilliant and get it and mean it. And if they are doing an exercise well than also compliment. And if (you) the patients react as stable and similar, don't forget to compliment yourselves.

And if it is not good than to learn to explain what graceful co-existential being is.

Also the vision needs something, how we 'see' the world around us, how important is this as lead?

And I do not like neuroleptic medication, because these often disable in a lifelong programming way in childhood, especially if known to not work but dramatize the inner. Motoric ally I think it is to go to the basics. To explain a cup is to hold in our hands and to grab, and co-existence can be learned at ages and exercised. I would love a weekend academy for people with Autism (-Academies). And thus supplements of course do take part in the healing and transformation phase.

The problem is Autism here, well, you want to start look at it as a problem as if no cures for yet. See the whole problematic and start logically search for ways to get the problematic to well and transform the range of patients their nice livelihood and working abilities.

**(TEMPORARY) TINNITUS some remedy ideas and discovery**

**Primarily, tinnitus is being treated with a Tran's cranial RTMS brain treatments. I had it and it works very well for this. 70% no more and 30% some remaining experiences.**

**The good news is RTMS is available in greater Academic hospitals against Tinnitus! Here the 2, 5 weeks treatment's has cost me not even 200Euro (staying and suffer included)**

Inspiration one:

Put your fingers and palm as if around a ball and hold this to your ear(s). (Might work) Also, try to imagine a deeper tone. Deeper and slightly louder tones seemed to stop the higher tone I was hearing, as if there is a hierarchy amongst "them".

And what also might help is to become a Humanitarian? In case there we fall by moral hierarchy. Think conspiracy because there is perhaps best 'conspiracy-its' against the sound. Tone 'contra bands' against your temporary tone might also help. Also imagining similar yet superior sound it feels inferior and dominated and make its neurosis stop, like scaring a cat. I remember and still am convinced I experienced Tinnitus sounds as a creature chase able with greater creatures in the hierarchy.

**TEETH QUEST (2015)**

Teeth need a layer on the upper part, what protects them from wearing off because the patients/drug users bite their teeth or nails. It should (allow) nourishment to the teeth if this is necessary locally. And cheer for the Asian guys whom grow us new teeth in the mouth. So cool! I want all,

but what about the gum... here in lays thus our next pioneer quest: How to transform back into perfect physical properties?

Tuesday, January 6, 2015

### WAKING UP AT BEST

Something what you take before going to sleep, in order to awake with great neutral energy and vital physicality, serene you could call it. Seems good to be able to just awake well and vital any time after falling asleep. I got this when I drink allot of strongest coffee such as the psychoactive powder coffees, the morning after I awake early and super fit.

**24-12-2014**

### **Somewhere at the end of 2015**

## **ANTI BIOTICS IN CADDLE LEAD SOLUTION**

**Cattle are given anti-bio tics in large amounts from birth on, well they make us the humans be resistant. Well, I figured to restart cycles of cattle to start with biotic free naturally healthy cattle and clean all environments, so they actually do not contain the bacteria's they are born with. Fresh starts so to speak. To be continued..**

THE QUEST ON ALL THE TOO FAT AND THE TOO MEAGER PEOPLE ON EARTH, Obesity and Anorexia citizens, here starts your near future  
16\*10-2015

Too fat people got to lose weight and eat and move healthy according to their medical downfalls and living styles and state of the art full reduction in fats and upgrading living standards.

Also this will be in my Magnum Opus, so you know it kind of gets real then. Surgery is one, but I prefer to start rethinking in innovative motion of how fat can be destroyed away.

I regularly think of an external propulsion of energy etc. what trans skin treats the fat and see if the body can cope with large amount of fat deletion, but probably not useful for the too fat people, and surgery to suck out the fat the most direct way. Aldo I am much fan of other nonprobing ways what not clear to me yet but surely must exist already. This or other best way is possible for all. Food wise and metabolism wise and supplement and exercise wise I figure scientists should be centralized to cover the master plan in Humanitarian total approach.

I want to add to also counter anorexia at best now we can ones and for all.

I add on 02/02/2018 Anorexia individuals, I have not yet rethought your subject. But I feel metamorphose of what your neurotically

affecting brain needs in basic. I think you need the best nature science have or can make what makes you love life again and feel like being mildly in love. A fluent reality who interested in absorbing nutrition

With full emotional grace but you need the best of the best state of the art bio/chemist Highest cuisines to foresee you all the ultimate delight best nature has to offer I recipes what know how to get you neurobiohysical emotional & cardio at best. Here by, mine & Co will focus ASAP at best to perfection world wide, and we'll bring the money. Please, anorexia injured people, try in the meanwhile to get figured if there is a mild THC weed what can in very small doses really give a healthy appetite I add freedom is the patients so feel what is enough or nice stoned munchy..

**NEWBORNS TO NOT BE CLAP-ED ON THE BOTTOX BUT TO BE MADE AN PRODUCT/SOLUTION FOR**

**THE FIRST BREATHING**

it seems not right and very side-effected to slap newborns on the bottom for first breathing. To me it is like welcoming

newborn into a savage world where the worst gets affective. The product/solution to trigger first breathing in a peaceful

way with no side-effects and sane for health.

15-01-2015

This one is to vaporize tobacco, for now. Instead of burning it, it is heated air around what releases the active parts. This however probably means to adapt the tobacco in more pure form and not so toxically added to. There is a great Global anti-smoking demo piece what aims to have 99% quit and others to be die hard insane and want to continue smoking and “dying” of it.

## **20-01-2016 EMOTIONS READING GEAR FOR PHYSICALLY AND COMMUNICATIONALLY DISABLED PEOPLE**

**this sounds so good to stand with what happens behind the shades. And now I am with this I recall my frequent thoughts went off when seeing physically disabled people. I always think something with the physicality that renews completely every now and then. Well, for the person to renew perhaps fixed. I started calling this rehabilitation. It is a wish like some others what take me a while before I actually write them to the masses, I don't know why but it helps me to see it all I think. On you go, dear geniuses. I see I can cure them if you the medical world does not know how to do this, than my team will gladly hopefully develop it, somehow well at best.**

SO FAR

**I HAVE PRODUCED THIS MORNING A QUESTION AND SOME LEADS FOR US: IS IT HELPFULL TO LOOK TO CREATE BIOLOGICAL GMO CROPS, AND PATIENT/LIFE STOCK BACTERIA HANDLING**

I mean GMO but biological in result/outcome. Without the substance in common so far GMO crops what is inflammatory and stressful etc. for consumers. I mean a GMO generation what does not hold this overlap of stress factors but what holds the benefits of sane natural biological crops what give a sensation of calm and non-inflammatory side effects etc. and nutritional value. It can't harm to put 'goods' in the same crop, good goods well?

Simply explained this quest, so let us get on with the bacterial life stock problematic.

What I want to add here is my ongoing regular thoughts about how to stop bacteria in life stock and hospitals. To start with bug free life stock and crops and soil and facilities, in order to be delivered from bacteria what go from mother and environment to new born/fresh.

For the hospital/surgery related bacteria problems peruse my Medical Chapter piece for this subject, very groovy.

Now I can add it might be possible to give plants perhaps qualities now pursued by modifying them, but with biological qualities. Yes, all the benefits of GMO but then biologically modified for modified bio outcome.

Well, I know something. Influence of "a Panda&monkey in the zoo". Whomever is perhaps going to invent some successfully, it is worthwhile to take the rights but to license them cheap out away to the existing GMO brands, so they can produce it too and or improve it and license their improved bio modified crops!

And if you developed it and people deny you have it for all companies, than draw some attention to yourselves. Don't do my daydream of walking cows true Brussels, do something creative anyways like walking plant suits in major 'humanitarian' cities for some time. And when you got press attention then state to be selling a revolutionary biologically modified crop revolution and that you invite the original GMO creations competition to accept the free offer you license out the patents and add R&D modification/improvement allowed and to patent own applications for instance.

This is a strategy what allows for good revolutionary inventions/discoveries to have most impact cross conservative dwelling competition. The hope lays in their enormous loss if they do not follow an evolution in their field/market, thus I expect they take in the good case the offer and join at early stage the whole more popular outcome and potential, and gradually they might get wired in to pursue and become the good lucky change market leaders and want to make and sell your bio with modified qualities but not the downfalls.

In case this wasn't a realistic idea, the field result (change) strategy remains interesting to prevent failing small scale isolation and no 'humanitarian' impact.

17012015

LETS PROVIDE CLEAN INDUSTRIAL-MINERAL WATER TO ALL

I think not sea water, thinking of micro plastic etc., unless filtered with Graphene perhaps.

But know the sea water is contaminated with well let's say very unhealthy stuff, I hope we can ever neutralize water industrially.

I repeat from this book a attempting lead to apply Graphene in mono layers to be able to filter water so it also stops radio active pollution (active) in it, as the moving parts to get stuck in the grapheme hooks on molecule level. But I don't know what stopping a radioactive particles gives in term of Physics.

### A DIFFICULT BRAIN SURGERY LEAD

Reach is the most frequent obstacle to safely do surgery for instance getting tumors out etc.

Well, imagine a Nano mechanics needle thick reaches where surgeries want and there the needle unfolds on the precise location and unfolds tools what do the job according to imagery. It cuts out and transports out etc. it does what brain surgery dream of to be able to see unfold practicalities of. I also sense magnetism is a substance, could it become a trans cranial scan way to detect any chemical substance their description, as contrast/measure substance (magnetism?)?

Quest.

### ANTI ZIKA VIRUS LEAD

It is for the mosquitoes 'at, onto human able' to be attracted by some sort of small musk..-bate lethal attraction mosquito fly at to alike apparatuses/gears generation or so with indisputable taste of food and even pseudo egg places what attracting any mosquito at-onto and liquidating them with laser for instance. One application is a neck less gear what people can wear what directs any mosquito at-onto the person flies directly naturally to its end on the mosquito's bate/kill/gear. Another application is for indoor protection, for such helpful strategy to be placed at entrances and in the infrastructures, what direct any mosquito in the

space directly to their sudden end killing tech. bate. Perhaps a sub conscious sonor precise attraction way, or a gradually inward stronger temptingness what mosquitoes are hunting on.

Thus onto mosquito attracting small necklace gear innovation/invention what makes them fly to their end instead of being interested in the human as food, but rather the killing gear protecting the human radius from any musquito's. A good wishful thinking is to hope for self recharching low budget solutions what on daylight or movement or even on warmth generating electricity means.

I HAVE A PITY ANOUNCEMENT TO MAKE THAT I HEAR KNOCKING ETC WHERE THERE IS NO KNOCKING AND RUNNING POSSIBLE – 'POLTERGHEIST' IT IS CALLED

It started years ago by subtle small tics on my thinking. (Quantum physics really) Well, since a period I used speed I started to hear chairs moving and knocking on ceiling is what is left. It knocks and I want it to stop. Thus, finally I understand I am grateful for this experience because when I got a problem I solve it! So, let us find out what happens in the brain when it happens, and let us tune in state of the art rTMS treatments to stop it. I am not possessed but I am sort of mal treated by very alike human sociopathic people. I hate here, and I know I have to wait for my science to resolve and solve it, A.S.A.P. at best. Monsters I tell you. I know one thing that we got to start to understand we are far from the only ones in our brain to have full access to our consciousness and living. To

my concern we are here by at verge to start to research who all we really are, and which intentions we need to get rid of between our ears. By end December 2016 I'll have normally been cured for life off all this matter by rTMS against hearing voices&telepathy victims problematics. But it and I are getting along now a days. Wish me good luck.

FOR THE DYING TO BE ABLE TO DIE IN PEACE IN A NATURAL OR URBAN OR SOCIAL SETTING

It is for people diagnosed with a sure death course to be able to retreat to natural/urban hospitals, where they can be in contact with nature or urban or historical surrounding.

17-02-2016 SOLVING SUICIDAL PEOPLE THEIR LIFE PROBLEMS

It is for suicidal people have life problems. Well, life problems need a reaction by the civilians what makes them suddenly seek help as crossed the line of coping ability.

Some cash and perhaps some supplements and who knows a good drug with some good (news) people and pro's what have good things to give, whom have time and whom spend to get the problems somehow cope able for the suicidal civilian.

It needs a frame but for the time being, it is that good neutral people with time and the good news knowledge and a psychology wizard talent and gift to help people out of their life problems what made them suicidal. Here's to relief in proper normal life situations! I sense inter-national funds.

MINDREADING, A SHORT REALITY CHECK TO THE SILENT UNVOICED VICTIMS/SUBJECTS THEIR LIFE EXPERIENCE IN SOCIETY AND THE WORLD, AND WHAT SEEMS THE PERFECT LIFE LONG CURE TREATMENT FOR THE SUBJECT VICTIMS & THEIR FORMER STALKERS

I add 05/03/2018

Justice must always serve to free one later scientific days all involved Humanitarianly pleasing.

But here is the truth and needs to be said cause it is big.

Thus, now about the super good news to all rooted for victims/subjects: The Perfect Cure: rTMS against “hearing voices”, it appears that telepathic alike uttering&badification can only happen by a tiny spot on the side of the brain, but not just making notice unreal voices but is telepathizing trying to have real world mindreading/mind stalking going on and in the unfortunate victims/patients/subjects the worst case in which dire utter immorality and evil hostility minded especially when made into communication evil cybernetic hyper expert to their subject, the spot is a monster in most or all cases. With this rTMS stalkers can just not think anything on about or against you in telepathic way. And any feelings gone, and all voices hallucinations, living very cool.

This application of rTMS what is really recent new top neurological cures, is named Repetitive Trans cranial Magnetic Impulses and by means of 2.5 weeks of daily 20minutes of 1200 impulses, the critical essential requirement for the bad neuro uttering/telepathizing is literally as tiny brain spot made nonfunctional as erased from former hostile uttering like the “hearing” voices and mind being read and stalked. If staying sober as in off drugs and too much peptide like coffee during the treatment, than

the treatment is almost in 100% of the treated patients 100% successful for life and the symptoms and mindreading/stalking by others can never happen again, and all nasty bad feelings and fears what due to it all, gone

replaced by feeling really normal and healthy and good to walk and mingle with people again with reassurance and sense of privacy and security, even the most severe mind readers and voices are than at and to like nothing nor anything of the alike was wiring them about and to the living of the victim/subject!

Happy birthday, telepathy tragedy reality, history made all victims their wishes and physical/emotional bagging for them minds talk(er)s to stop and themselves to find a peaceful place to be and work at, a historically very special moment it is cure-able and so well wonderful, it now just must cover the victim needs to be cured as much as by neurologuesassistance standards of perfection manage-able worldwide. I want to add for the time being the treatment availability is limited and thus by this piece onto long waiting lists, but I am of opinion telepathism victims to be given priority in treatment cue list as that is a real life dangerous and often lifesaving and by the day and week critical, these victims need this rTMS cure must.

I also want to mention I hope for the academic hospitals whom now operated this rTMS treatment to consider to find an empty corridor with multiple rooms to use to expend. I thought neurologic assistants can perhaps be made licensed and moralizing and findable on the HR medical market for excellence, so not relying on a neuro physician to be with each treatment...

Oh yea and thanks science and psychiatry world, to be so dumb noone would wish to be helped by commoly you even if the only lesser way of survival if not for this rTMS's. And I add late here the rTMS cure against Epilepsy and I

add lie detectors are part of this level of psycho universal law&order basic to apply lie-detector seen if insane.

Untill now, you were really getting at the victims, not just with your denial non-sense "as if not being honest people go to the toilet only the patient and victims of them socio psycho's, and that is uncure-ably ill for life misdiagnose, me for instance was so real and taking it like a man but just

got criminalized for any of my gentle honest reply I was probed etc. which they never checked analytically what gotten into me that time I was on edges of livability for instance to the effects intended outside of the treatment I already was mentally chronically tortured by. Do not dare to say in ways of the unbelievable total denial and illusions reply not even to check the prob injury for instance, none of any medicals serenely calm and a bit sad asking to get checked what gotten into me at these ¼ times I couldn't take no more and had to ask for medical securing health and analytic bottom of what, none of many randomly around the country. If lucky it will not even cost your governments piles of law punishment financial compensations far back into your really unexpected massive criminal conspiracy most of us 'getting real and silent' took (take it) like a man so to speak and did not beat the shit out of your dirty psycho trick victims hypocrisy false diagnosing as no sense of reality etc. paranoia illusionary self-imagined victims of them 'bi able bad nature' of crowd and public places.

Yes! No hard feelings ey people, but this is just basics I really could not leave out of this new good news piece, now you "take it for ones like a man", please.

Morally and prevention of death by murder attempts etc. broad special protection for the present uncured usual telepathy'n'lifestyle victims. In this specific subject I have a good quest helpful thing the world must develop is to also foresee toxicological and medical hair analysis for any requesting citizen with this co-existential conflict problematic as frequent harmed uttering and physically, even regular community's routine license analysis at fraction of present price tag but highly licensed and moralizing. You never know, the evil I saw was all medical and often trust relationships with other people what we fall in such often from first or

private contact can be felt on uncontrollable indiscretion and by all means so avoided as risks.

Hair holds all substances what entered your physicality over time of 1cm/month length is the time know everything of, it is cool to have it checked on alien hostile substances if you are more likely having/created/natural enemies. But I am today 28/10/2016 a very

missing link what was meant to stay an unchallenged matter but here it comes, for hereby the science and invention world to start R&D in pursue of the way what allows by a small like sugar blood level home test gears, an easy usable way to easy and fast self-analyses gear to check routinely as frequent as weekly on toxic and medical alien substances presence or for most of us all on normality. The extended full list of lab dynamic ability to name any by name. I know this is a challenging quest to try to get all this into very compact size, and a of course a functional way to test the hair directly without the need to cut off any and in a way what practically easy and on few basic lengths of the newest hair such as one week or two or a month. I ADD 28/09/2017: This hair analysis revolution innovation/invention to 'serve routine testing' in schools/students and work but not on drugs only if desired by the individual.

It is a new market to offer licensed moralizing low cost hair analysis to all whom need to be sure, you love the truth and you defend and protect all good citizens.

It is true, parties, cities, small cities, and even towns or home near independent businesses etc., I am of opinion these places have nothing to offer worth any risk to victims of high frequent bad hostility and disrespect of telepathic uttering. The best is to stay on the healthy path to live healthy and not take drugs and to stay away from troubles/problems/scary people/places.

It is not worth it to mingle with people if not having to or avoidable.

Always put your personal safety or the one of the victim you can help with this basic do's and don'ts and risks avoiding tips, to think of safety as telepathy victim or drug users, to just be at a more real risks, to be picky

and learn where to stay away. Amongst your highest personal/career resolutions before successfully rTMS cured. Where they are 'unhumanitarian' and uttering brutal and immorally uncompassionate, stay away by local tendencies, spot a nearby or region where people are known to be much more friendly by nature and much less known for unhumanitarian convictions. (Unhumanitarian means to not help and

deny any need for's help and help ability, by nature to not feel like helping but rather also endangering.) And don't go to a pub for instance, do something nice not dangerous like this. Basically, we live in dangerous times with psychopaths and sociopaths what harm-able people and the usual victims of all "guts".

Work and live as remote as possible if you ask me, the civilized world is often no good in mind read discriminated and not helped, attacked life's.

But we hold good news for all good citizens:

Great capital funds will be made to serve Law&Orders to ay for any successful leads tips on anyone involved in systematic harming and stalking. And any suspects submitted to lie detector investogators..

And need to stand trial as dangerous insanity.

Don't worry, all will turn back to normal, the sinfall will not be active long anymore. I opt yet for an elixir to make the memory and psycho capabilities of by lie detector based universally the types where citizen lifes etc well being tricky for law&order, of course.

I opt for bettering to make kind ice and unconditionally good, this to be a personal matter I have I Legacy more o this subject. I want nice paradise so also for as insane as insane -stalkers and telepathic sort. And contact in jail may be pure isolation I open bar jail yes but there are protocols to apply on the fact insane mindreading stalking psycho's have many evilness in them and especialty also a lot of tricks and wiked inspiration: contact;; feet cuffed, ear phones no hearing on, eyes coverd and obstruction i the mouth to make verbal sounds, and hands behind the back chained. But all the best to you people, I hope soon to be able to help you prisoners out at best to perfection. Few years of patience please. The victims need best early childhood diagnose and rtms treatment and

life and work guidance specialized in living consciously well about who does and what and what not in personal life and community and society.

I can add of experience that this monster what makes voices etc. in us and winds up people at/about/on us, also is in control of our physicality in

some of us, especially PTSS trauma problems, emotional, physical and mental and fear wise and able to attack us with even more shocking matters. It is to most of patients, evil or very brutal by nature of outrageous or not done.

And to now address the stalkers.

People should still make themselves the difference between being good and not harming scared people like any you might indiscreetly grasp of if that's what you wondering moisture up, and as people with no special interest reason to consider "to have a change of hearth" to not want to do evil nor harm any telepathy victim, but rather to at help and friendship and relatives to be informed as early signs as possible and what is going on and hopefully informed enough to arrange the rTMS cure soon as possible.

I asked a private life person ones if she could chose to mind read/stalk and chose to not if she wanted so, and she said yes, like a switch on/off in my brain, simple, to switch it on or I presume live on or till change of heart and mind and restlessness into the more private elite reliability comforting calm non-socio charming individuals like evil women holds a fact these bad females, girls are known to have the 15yr of age critical turning point to normal or those going couple years'on beyond actually only getting more sociopathic/bad etc.

I hope we can ask you involved at and to victims you spot and get/got into it, if you can consider sensibly to switch your telepathic-alike figuring grasp off if you can, please, have mercy to the in survival mode victim of your actionable indiscretion and at you, please have mercy to any subject victim because the suffering is really severe to never know what people go how what side-ways on edges of coping the fact anyone anywhere can

mean extreme traumatic comprehension evil info is how rumor or dangerous etc. Have mercy, show some mercy, do not walk on in public neither at a victim subject, learn to live your own life and let live the victim/subjects whom surely peacefully “lick their wounds” whenever not under risky stalk, just think open subjects are just living their life’s inside

and outside and lifestyle and wish peace at them and about them to stay forever, understand telepathy minds talk is turning the life upside down and into troubles depending on your will's or, off mode and give them survivors a sense of liking you and finding co-existence at the right living spot and basic obligations where no stalks happen something still very scary but at least not un-doable any more. Show mercy, show some dignity, respect privacy and peace of mind, please, can you switch it off. Because victims are switching it off, it should be a basic medical test in life to see if telepathistic inner bad brain spot hotspot of evil potentials.

05-08-2016

QUEST: DEVELOP PREVENTIVE MEDICINE AND EVEN TREATMENT WHAT MAKES ANY FLESH/TISSUES OF OUR PHYSICALITY UNINFLAMMATIONABLE ETC UNOUTRAGE-ABLE: TO FILTER NEGATIVE BRAIN ASSIGNMENTS

Inflammation ranges from mild to not curable and deadly forms. So far the Nobel cause.

What I have thought is for the medical R&D bright minds to attempt/pursue how it is possible for all of our physicality/flesh/tissues to be protected against any form of inflammation, basically to become totally uninflammationable. I don't

know how to write this in proper English but if this stays in here than take it as grace.

I feel really optimistic a bright R&D pursue might pull it off to figure out potential ways for total preventive protection and hopefully so also a cure remedy cure against any form of inflammation.

It is important to thus surely also attempt to find a genuine physicality/flesh savvy substance what when physically/flesh embodied it preserves normality of the tissues of the physicality in way it ...does not incorporate on nor with indecent inflammation proposal/situations nor able/optioned anymore to run under of disproportional self-destruction happening by tissues hit by inflammation outrage in case ordered/orchestrated/caused by the overreacting hyper consciousness in and of our brain.

Perhaps certain brain disorders make overact into inflammation and perhaps we need to make our tissues no longer respond to perhaps causal outrageous brain orders related to (overreaction?) inflammation. And think also about my lead to kill all bacteria/viruses(?) in infected patients and to add good bacteria after all are death, and the one to perhaps chemically create the functions of essential good bacteria –for longer possible period without any bacteria yet functioning as if with all good. But I didn't fetch why I added these two bacteria leads, anyways, there was a reason why I associated them as probable useful perspective.

May we hopefully be able to end this agile with something dynamic?

9/09/2016

A SOLO RAW VERSION SESSION ON AMBITIOUS ANTI SMOKING  
CONCEPT/MODAL  
PERFECT AS SUPER TEMPTING AS SUPER MUCH FREE AND FREE

EXPENSIVE SERVICES OF ANTI SMOKING CONCEPT/MODAL, 16/10/2016 I  
OW THE PARTY-SIDE FOR THE NON SMOKERS

The nonsmokers party side factors/gifts are different and must make smokers be honest and smoking not wise to start for the stoppers benefits-party, to both and up to to think twice and not no against the best of the best anti-smoking info etc. specializing couple next years here.

i add now all people and pets of the world to get atleast more but smokers get doing ok, etc. 😊

for <90% of smokers in belgium alike countries and ghlfmm depending othersto, be made so happy with the super serious benefits and to be by extended long list of seriously cool no-brainer business to be made so enthusiastic and happy to want quit so nicely and surely

champix

for the few noncompatible as ill making, it is tested by all participants in a 2 day test to follow how you feel.. if ill then an rtms treatment is the next 100% effective way (ipressume) as other stop products are rubbish and failing.

rtms if useful for this can be scaled nicely at best, based on the unfortunate small group of champix ill's etc basic rtms need smoking will be

benefits

all get 500euro european value when started champix 4 days, continuing after day 4 also, etc some later such as a year later 500euro but must if resmoked the day after call in to explain how much smoking happened and how and why

to than if necessary to be adviced to use the 'smoking morning after pill of the medical kit given. champix makes those it quited to not even be

able to imagine a cigarette nor smoking it is as if never seen a cigarette/smoked before, and it gives thus a lasting sensual wellbeing high of real stress free total cool feeling better than ever before

for the soft drugs users to get a vaporizer for free, to simply no longer role

for all students to get several coupons for free domestic services such as cleaning or moving out or in and to get a professional drive in case to need to buy or pick up cobet large max driver but

for all quit smokers to get a 15euro/week dynamic food coupon (15) useable in eat places of choice, all participate. this for 2 years long

to select and define the effective and efficient natural cure(s) what all citizens of the country get for free every year what kills any cancer cells so cancer risk free, yearly for ever.

a extended list of price reductions to any of the many participating stores, of a special arranged price of 25%, and out of all stores all quitters can select and order 5 different stores of choice.

and much more much more seriously nice gifts what make quitting smoking super beneficial like above few inspirations i had, but really a quite much longer and importantly more significant benefit

quitting smoking as <90% of the smokers is exepct from the principle ones who say all must die thus it makes no difference for me i smoke i don't want to quit etc

it is the concept to research and develop the perfectly tempting and successful way almost all will love to stop the way the process is fully described as in smooth and easy and giving special magic sensation of wellbeing and not remembering smoking ever and to live and work and party so much more well in your body, etc, but also the several years benefits guaranteeing all agree to keep quitting

money is a practical detail as charity companies can scale up for instance their sure successful sales as really cool and desired by the consumers clients etc

but also capitalistic companies perhaps to donate to this mega nice several years of anti smoking joy and happiness and busy benefits, i think businesses would want to participate to this globally super likes of the (polls and scientifically sure) super successful super wise winwinwinwin for all,

companies to donate something scaled as what might be a few upward amounts for various financial support.

etc

to participate and the quitting to be durable, at any given (unwilling untasteful) resmoke the smoked morning after pill solution cause we all can by weird champix quited to actually with no interest or under influence etc but to somehow

know they'll call in discuss what happened and how many and how feeling now about it all and to go on to quit, etc, it is the biggest health happy news almost surely to have quited and keep on quit, it is so important nationally it is to perfect all aims and details to expert

psychological and conceptual functionality and conceptually modally so much benefits and good news all excited and committed, the process of smoking still first days of champix (-“so all can try and see for themselves,

if they continue few more days they get a financial bonus if they continue after 4 days test, etc

the point is this is the opportunity with no failure allowed, it is to be so cybernetic alike till it is statistically by large opinions and reviews of testing quitters 1-4 and beyond etc,

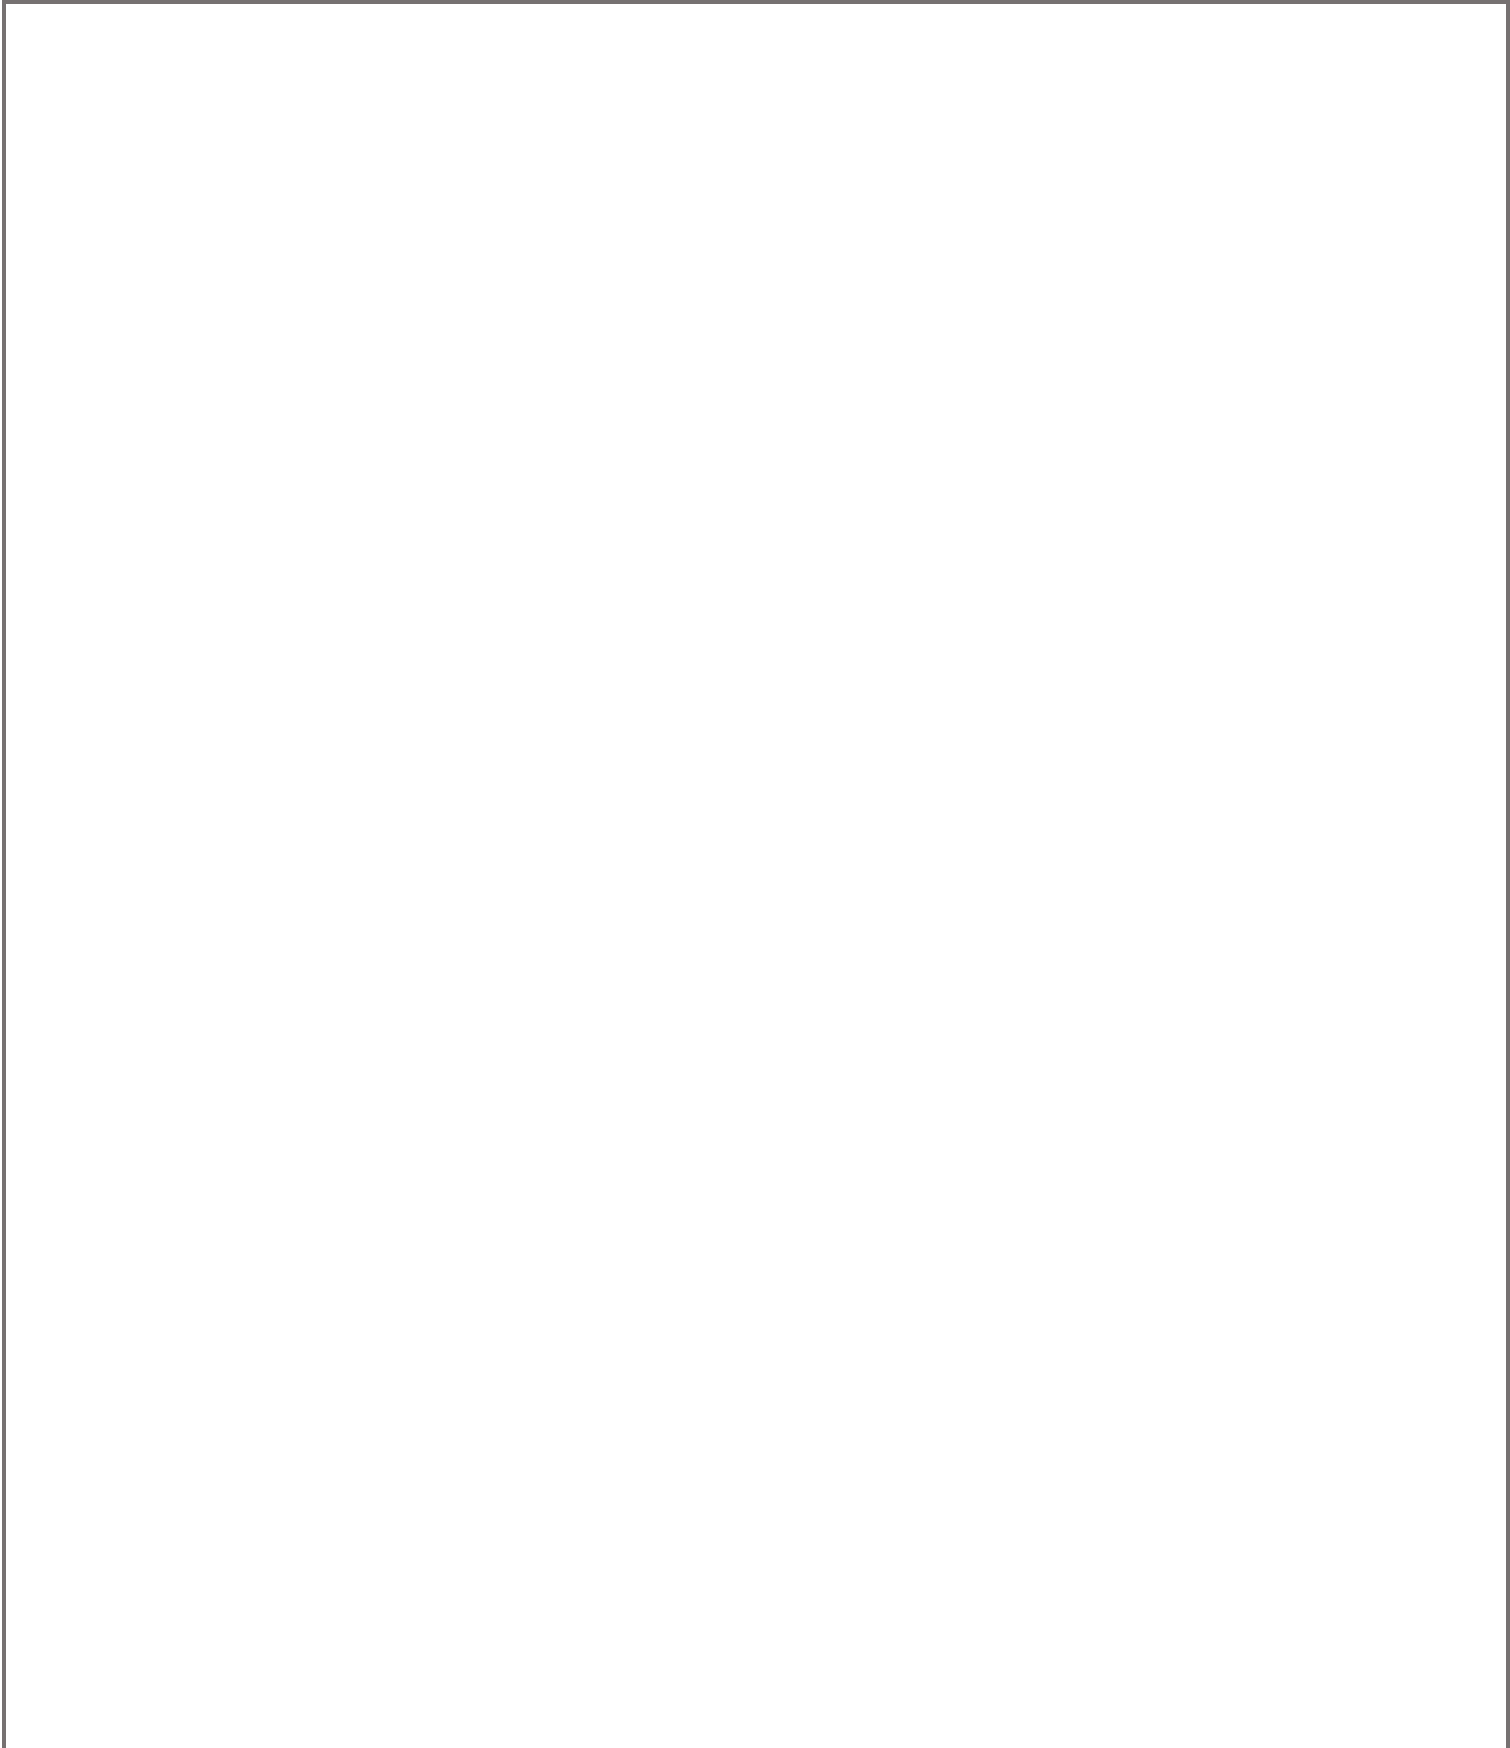

it is a party and a very very good happy news and celebrated super full winwinwinwin all excited and patience-.. to make it a happy long term serious benefits and it is not fully by choice but rather by a thing what only a matter of quality time in order for the critically needy to have survived and reached the day on they are reached and saved.

start test taking champix, not ill, move on while still smoking onto day 4 what is pay day if contuing till next brake thru gift/benefit if continuing etc, but for the few ill of champix to get rtms.. if they want.

vaporizers to be send in advance to the soft drugs smokers, and to make them joining the vaporizer wisdom and benefits -, in case broken, to have a pipe and to get a new one if broken one received as return by free postage pack given, this gear must be of durable strong shock proof long years long use etc.

in case lost then a new one can be deliverd in 24hr at a non profit price – the vap to be really basic but strong and really cheap arrangement such as 50euro payable per month for 5 but by automatic bank order or by reduction of financial ebenfit for well quitters.

this is how far i got on my own on this idea/porspective.

scientific quest: a great supplement invention/conclusion much needed to make the working obligations of edged workers to be hum. sense optimally easy, at best and with no more physical and mental downfalls...

Dear workers whom have a physically and mentally and home to back home hours what demanding more than any person should endure like many do year in year out on often on the edge of descent proposal tempo etc. This is the quest what starts the science and natural field to R&D a combination of a full wished for super powers yet neutral and healthy.. For the wakeup call to find yourselves in optimal physical and mental and stamina and sane good way starting your days, a nice work day like usual by this.. To feel no downfall soars and tiredness as the physicality and mental health to be functioning on animal alike be and do but without it wears off, not Monday and still not Friday so to speak, not start of the day nor at end of the day and not while working the jobs you do. To feel optimally free of emotional agonies and the muscles to be optimally conditioned/state they carry and to serve whole day activities but to be optimally in use with no soars or tiredness for the jobs you do but not pep-ed nor doped but simply animal alike neutral to be and work your jobs.. To do your days with an optimal sense of rational fluent easy keen of working practicalities your jobs.. to move fluently in between specific different places of having to be to process gracefully at your best moving requirements and desires according to your job not according to being changed in speed of doped hyper hurry but like your job function is.. Breathing and blood flow optimally subconsciously optimal.. To actually basically like having a super good day of work and to do your requirements as a serenity and integrity for your total state and experience.. You know, now you people are athletes, but I want you to be supplemented 24/24 7/7 so you can work and live as relaxed your jobs

are actually to your real can do and just cruising whether hard work fast work or long work, cruising and doing your jobs as if you were like most toddlers to not have physical awareness of daily life living and school

activities etc. it is living and performing your duties mentally & neutral while being fit and feeling at best you could and should.. basically I want you all to hold on and be as companies first to know when your life's and working can be as if student in an Art academy if you understand, the kind or relaxed free time nice being and practicing often not requiring but a privilege and control but this is you at your jobs in some time –making gifted Art so to speak.. And the communication to simply be how your job spot is you do/can now in control..

I think I made the point clear enough to have inspired (natural) science etc. optimal life/work experience recipes and ingredients expert gurus etc., to not just offer you all their imperfect product or recipes but for the science fields to make it a collective R&D progress what based on scientific facts/proofs to be optimal in all ways demanding jobs and life sense well goes at best gracefully your different sorts of job spots .."like nicely optimally at the perfect life like the perfect day on a perfect wedding day for you.."

Hold on as you all do with a brave heart and all doing the relentlessly torture on work athletes level, you all deserve to become royalties of your now toll demanding working/living that working of your present to become actually like being royalty (% of product/business income you are special and essential rewarded of) rich and not working but living relaxing and in beauty and luxury life in a paradise setting feeling so well as relaxing but all this to explain this is how your work/life requirements should be equal to in no pressure and doing what you like while in real now it is what most of you by now suffer and do but this quest is to make your present work/life to become a "walk thru the park" and making you able to go to sleep at end of your day simply also enjoying your bed rests

as catching sleep optimally but especially to rest and always wake up in perfect condition..

Think of perfect combo.

Good job!

BOXING-TYPES WORLD, I HOPE/WISH FOR BOXERS/BOXING-STYLES OF THE FUTURE TO BE HARMLESS TO THE BOXERS

Not popular, I know, but I just say I find the harm/suffering/dangers to the boxing sports people of the present boxing sports types. I just like all boxers and I feel quite unwell when thinking it is their job to undergo such neurologically risky sport/career. I hope/wish one day in the future, a Boxing genius can change the present boxing sports health risks into a non-harming/risky boxing.

Good luck and know even if you do the only thing you could, know you can always stop and fulfill your needs&life other ways, and to get advice if you need for this idea. Rooting for you.

16/10/2016 REANIMATION OPTIMALISATION OF CIVILIANS AND THE IN DEATHLY TROUBLES

**This is a note of something I just have to write when a person its hearth stopped and the brain is inactive well I wonder if a supplement substance what if in the brain matter and parts could be capable to in a way function/effected in the brain so that the brain can stay inactive but functional for as long as possible till hearth is restarted the brain has minimal brain damage why not the organs and hearth also, a supplement.**

**For the hearth I have had a vision what illusionary but who knows: to just have to put a device on the hearth spot and the Trans cranial and thru the hearth**

**-but what?- so the hearth simply always restarts..a special energies ????**

**This was to me nonsense but who knows, it is to reanimate the hearth surely and the original brain functions to be preserved till reanimation made -damn I hate making nonsense..but what if the brain supplement is actually when just death becoming energetic in a way so the brain is**

preserved energetically somehow smart till the hearth is supplying the second way thru the delivery doors for intake (brain functions).. the brain supplement to be like oxygen like normal not but in crisis it actually is keeping the brain functions a life, what keeps living without blood'n'hearthbeat?

-simply-by anyways a hearth reanimation tech what optimally reanimating any how many minutes stopped hearth somehow I see as a good lead to proof the electric shock banality to perhaps one they done by most LOGIC reanimation ..If by theory approach what would reanimate any of the hearths how exactly to irri it electri thru out it ..perhaps by by irri and plain thru out under present current, or does it really need a hard electric shock but why do these fail and thus can there be added energy so it does reacts much better on electro shocks of the common way, thus to put it thru out under an electric logic sort of state so the electro shock reanimation works from first time??????

And the brain, can it be preserved while the person its hearth stopped some sort of condition what prevents why brain damage incubates by minutes death, the decay prevention,

I just reflected a bit and come back here to make a statement about hearth reanimation:

The present chest shocks to reanimate are not ideal I am sure, as take the first shock fails

yet 10sec later the second shock worked, this means the first failed of a reason while if reanimating sci-fi I think any first perfected shock would reanimate and not fail what the second of the same reanimated, that is failing of the first for reasons the hearth needs sort of shock what does

**do to the hearth what makes it beat again, to do what makes the hearth beat again is obviously not so banal like reanimation chest shocks, this is why I think and presume the death hearth needs specific happening to restart-exactly this to give it all it needs more perfectly than often a 3th also fails while I think if somehow ..Is success to electrify few spots to**

succeed or a certain much more electric zone thru the hearth for electroshocks to perhaps be from the first shock successful???? I mean a sort medical imaging (of the hearth of the patient) and to precisely can stimulate the spots precisely for a hearth to always be restarted of reanimated new limits between living or different.

this is a attempting lead?: at no heartbeat-the brain needs oxygen, but I ask what exactly needs oxygen to make the brain live or die, and now my wonder, could there be a supplement what if thru out the brain moisture what also keeps these essential brain parts alive but not by oxygen but because it is on it as brain fluid (possible?) where oxygen arrives at the(se) brain parts essential parts well could it be possible if these brain oxygen critical part(s) function also by the supplement fluid on it and oxygen in it too, in case no more oxygen in it the brain supplement fluid in at the oxygen deprived part to be able to keep the critical brain part not die but live but without oxygen still alive as part by because it lives normal by the supplement on it-as in can the oxygen critical part -if it just needs to live perhaps supplement keeps it living? Or is it oxygen only? And physicality organs first stay functioning quite some after death status but supplemented, who knows. Or could it also live/ survive because of something else like an oil a like????

Sorry not wasn't in the energy to give it my best writing.

25/10/2016

For animal holders of carnivores to feed their animals with meat replacing diet recipes solutions field, it makes sense.

**02/11/2016**

**I am glad I just had the luck to have spotted the serious medical illness of peeing during night sleep. The during most of childhood age till 12 yr. old luck most patients their bed peeing stops naturally, and the most tragic patients whom stay it ill for life. Well, I know the illness is not really at all having yet sure perfect cures/treatments what given real reason for optimism for the patients and care givers such as parents etc. of the patients.**

**Well, I just hereby challenge scientific/medical R&D smart people and pursues the open quest to R&D an ideal medical solution/cure/treatment to the bed peeing illness forms.**

**To level with the High level of relief the patients&co their daily night sleep life&career problematic to literally have no control nor help nor control and total helplessness to prevent to wake up middle night in totally urine wet bed sheets etc. households&life&career disturbing reality with much logic demands.**

**Upfront as sure;: Congratulations and good on you, you managed to make ideal treatments/cures to all bed peeing forms brake thru relief the range of patient victims. Just make of your cure/treatment relief purpose of life, to give also your full R&D sense to make sure your ideal cures/treatments reaches all the bed peeing patients/victims/life's whom need cure/treatment by all means of Global/local access and help as just another Humanitarian moral must for your solutions to help all whom need it.**

**Nice.**

**MEDICAL ANALYTIC IMAGING AT BEST SCIFI-NOW I ADD LATE 02/02/2018  
MY ORIGINAL TECHNICAL BIG TECHNICAL LOVE IN PURSUE AND A  
HIGHLIGHT COLORING LEAD**

I used to have started to be obsessed perfect medical analytic imaging seemed so easy to me and my anger against the amateurism of the field as we know it still. I wanted perfect microscopic detailed healthy medical visualization. I started to apply my believe in FM/AM radiobroadcasts healthy ok ness, while reaching into us as humans, the radio 'show' it's

original broadcast is slightly but very uniquely changed as we&things embody, it fatches noise what if analytic broadcasting can tell perhaps what is exactly in us. This early FM/AM embodiment stage I call now simply new quests for innovating Dottler systems etc.

This for perfect medical imaging what allows to know and walk thru visualized physicality even like a microscope: real.

The add today what gotten me to rewrite this original piece is I learned on Twitter about coloring with highlight light colors (microscope) physicality visualized. This thus contrast potentials in medical analytics of the future. Not the medium defines how is seen or noticed or (often) not, coloring systems one is happy indeed to understand medical visuals to deepest details analytics. I got quite technical solo and with my future private dreamteam we will deliver Highest digital healthy medical imaging and practice field in medical analytics.

01/03/2018 IN TEAR SHED FLUENT PURSUE FOR A TREATMENT&CURE&PREVENTION OF TUMORS IN THE BONE I SIMPLY ALSO DISCOVER IN THIS PIECE HOW TO TREATH MOST OTHER FORMS OF TUMORS AND OTHER CANCER SHAPES: rTMS INSPIRED PRECISION ORIENTED LIGHTENING ELECTRICITY REMOTE TUMORS ETC NEUTRALISATION LOGIC

I have heard a guy who used to have several stores specialized in barely still legal not yet illegalized street drugs effects substances he obviously proof and said they mess with your chromozones.

If something can have damaged them something can keep them healthy and restore the unhealthy. 1)

Tumors in the bone in the casus of the above to tears shedding grave kids illness like all these illnesses of the deathly kinds are commonly by all means brainstorm priorities Nr1 to normal sensible thinkers like you and me internally my DREAMTEAM and external Co.

Cancer in the skelleton makes me dream scifi ow for indeed a new form of just-cancer-just-tumorseradicating-broadcast of some sort other than radioactive obviously.

..'Visualization of tumors is the way to go I just figured for these cases further more into my anti tumors suregery pursues else in archive and in MY HUMN.

To visualize any tumor is often on time diagnose but much more important is that there is precise visual&locationprecise contact. Tumors are if well 3D exclusively under anti tumor broadcast of some sort tumors are usually the obviously different&abnormal than the healthy tissues around the tumors.

To cure the bone outward tumors situation, ..?? ??..??...??.. I see now clear the future of precise directed anti tumor broadcasted medium seems a hard broadcast. The present radioactive alike ati-tumor

broadcasts like precision chemo radiations, is a soft broadcast regardless it is ill making etc, I am hereby onto a anti tumore precision tumore neutralization anti-tumorsurgery broadcast is much more logic if for instance a destructive electricity broadcast, precision magneticimpulses alike delivered precision hard electricity thunder strikes alike anti-tumor surgery potentials. To destroy this and many other tumor sorts, with fire crackers kind of thunder striking constant what simply destroys this bone tumors disease and many other tumors, with the precision added qualities what obviously don't destroy more than just to

neutralize the tumors especially the hardest tumor conditions -the principle minimally injuring preferably not damaging the tissues or to disturb the physicality of the patients with destruction residue left over of the formal tumors , yet maximum control, I think tumors as bone tumors all tumors are actually neutralizable without so much destructing of the tumors their bio and bio they are part in, I think hereby tumors including this bone tumor types are all as weak and fragile like you would type a seashell creature, and here in lays our chance in this bone tumors sit's we can neutralize while keep affected bone or tumor bone once neutralized can still stay part of bone and to not debilitate but to sort of bone tumors to be turned into tumor fossils as former tumor affected bone or and former tumors in any bone to wishfully can stay part in former affected bones ...

Thus I mean thunder striking precision firecracking tumore neutralisation yet so subtle in all its potential logic applications, each specific subtleness applications what give antitumore surgery a full wild list of options and perfected specific subtleness of neutralizing the tumors and other cancer forms by subtle minimal yet 'hard' destruction by electric constant lightening fire reached thru patients healthy bio I know one thing is rTMS what does this hitting a spot in the middle of healthy tissue going thru the healthy but arriving /hitting the anffected spot with affecting cure intervention without affecting the healthy tissues & as sensitive as neuro functios inbetween the rTMS spot where the magnetic impulsing machine accumulates in ways unaffected precised trajectory directly to the spot having an destination of broadcast where a length of magnetism is traveling thru neutrally to accumulate on the spot to affect neurological curing effect but in this case the world will want to make electricity of the destructing forms go thru healthy precisely and only to destructive hardest electricity shapes thru into precise accumulation of fireful electricity loading in the tumors we wish to neutralize/destroy/stop/vanish.

This is of course ready enough lead to be add to MY HUMN as it stands in my updating positions I hold it. I'll need to be creative in tweeting about this tumors neutralization remote tumors and other shapes of cancers and other -remote surgery brake thru.

Over. And all what it will be delayed before this turns into full range of not more not less electricity surgery force applications, is a time delaying tragedy I consider as mass conspiracy let lived or whatever let died isolation/denial practices I want us to bring down in battle style. What tears and horrible cry I shed when reading this bone disease among a very extended list of grave diseases with no cure yet, I will not be able to do more than I will be able to promote this solo and failing this solo mission as there are no serious peers to be found for a rooky in Scientific peers options what so ever! I got people to safve, not abundance of aware bastard peers whom we all wish I better had them less as peers. I'd 01/03/2018 Full private experted management by now, so I'll just see this brake thru having a bit of chance to go viral a bit already, but never again!

I know this piece holds some typo's etc but I do no longer care for such beautyfulk practical details in late end phase of vast intellectual professional denial and isolation about mine.

For I have not successfully opportunistically dutiful had the thought to actually pursue on of one of my dearest Hum. interests of resolving medical illnesses.

17-02-2016

I MUST SEE QUIETE ALL OTHER GENERAL PROBLEM AVAILABLE OF THE WORLD WHAT UNRESOLVED. 😊

MY NEARBY FUTURE PERSONAL RESORTS, HERE I COME.

Nutrition Chapter

This chapter is also not dated. Rather a wild list.

### **PREPARED MEALS (PIZZA ETC.) WITH A VITAMINE ETC. PILL WHAT COMES WITH THEM**

Obvious, prepared meals such as lasagna and pizza Etc. should be delivered with a multi vitamin pill, of course of no bad quality.

There are vitamins what come with a tablet to put in water, what gives a refreshing lemonade.

And did you know you can put extra vegetables on your industrial pizza yourselves. Might have to pan them a bit before putting them on the pizza, or thin. Later in this Magnum Opus something about fibers to these.

### **FATTED AND SUGARED PRODUCTS SHOULD CONTAIN OR COME WITH ANTI-DOTES TO THEIR SIDE EFFECTS AND FEW MORE THINGS**

The title speaks for itself, but I show you here my Original post on ANTI-DOTES.

To add fat and sugar downfalls compensating substance(s) so our physicality does not have their downfalls but the taste Etc.'. And so we do not have to wait for sugar and fat to disappear out of

industrial recipes.

This is diplomacy. Of course I prefer fat and sugars to be banned or minimalized and like Stevia etc. to be obliged. But this wouldn't happen now a days because politics are not invented to protect and solve, if you ask me.

So I mean to create sugar and fat compensating, really sane, substances what can be added to all recipes, what compensate the downfalls of the fat and sugar we leisure and are of recipes. But also, for additives to be neutralized when absorbed. Anti-dotes to additives in foods. The fact people their time is being addicted to certain pseudo culture foods, calls to change these industrial foods. Certain additives of processed food to be neutralized or switched by normal substances what do the job, to not harm the consumer. This counts also for any bad substance such as sprayed vegetables and fruits, Etc. How to compensate these, perhaps by making universal soaps to clean vegetables and fruits with, and to even spray on the meal, what neutralizes most or all. It is imaginable. What I first thought of is for a sort of crops soap, to wash them with in order to undo them of chemicals. I wash the sporadic apples I eat with a drip of hand soap and wash them well with water and my hands. This book holds an attempt to stop chemicals being required for agriculture. Cause the apple surface hold much important nourishing qualities. If you dream of apples but you don't have such, here in my archive and beyond, food desserts and poverty are vivid subjects, quests what need brilliant solutions. I wrote a bit on it but there are several ideas I have gathered over the past year, apparently. One I reacted to an 'Innocentive Challenge' I wanted to give answer. It is not included but my personal team and I will elaborate our reaction to food deserts, and under nourishment by poverty in a piece after this book, hereby. What I say here already is

that it might be inspiring to think to provide concentrated nutrition. This mentioned, I add it must be a law for fat and sugar products to contain/come with anti-dote to their side effects!

Also against diabetes. An anti-dote to diabetes, and I add now during the last reviews, to think about integrating prevention of diabetes in sugary and fat products.

## IS IT NOT ABOUT TIME WE GONNA REPLACE THE BAD E's

Is it not about time we are going to replace the E's in foods by good alternatives and also sweeteners in foods, but also things such as phenylalanine (or whatever it is written)...

Phenylalanine draws calcium off the bones if the individual does not have enough calcium in's physicality. So these beverages need calcium add to them, probably with something what makes the calcium well absorbed, and as we all pay high price for beverages, it should be good calcium etc. And now the infamous e150d, the fake caramel for coloring (Who likes dark beverages anyways?). Well, I was instantly fascinated when I heard decades ago about a nation in the north what does not allow Coca Cola to have coloring. Well, I think this should be made universal for all beverages. Really, all this above can make beverages acceptable for a long time to come. Goodness survives time. Imagine, what is better than drinking transparent neutral beverages what resemble the healthy water, rather than making the drinkers suicidal fools shopping in ugly stores. Have a nice year.

## **THE SOLUTIONS: MORE BEES AND BIO INDUSTRIAL**

More bees, simple as such yes. Bees are used too intensive by bee farmers.

Use more bees and give bees homes.

Your authorities should invest in wild bees.

And bio industrially why not. Give these vitamins and nutrition. Why not even a small shower.

Bees are used in small numbers for huge tasks for them.

In the wild the bee population is at risk and harmed. What I suggest is to define what bees are good for all involved as we nature. To install as release millions of the best wild bees while planting/keeping a flower and trees culture what beneficial for the bees and natural environment.

**A SAYING I MADE FOR INDUSTRIAL NUTRITION:**

I quite like some, so make it healthy.

**BASIC HEALTHY NUTRITION AND THE FREEDOM BEYOND**

After basic healthy nutrition one can choose to eat something unhealthy.

29012015

TO ADD A SUPPLEMENT TO NON WHOLEFOODS.

To compensate the fact the product is not whole/worthy, and in base often hardly nutritious, to add a pill or add to the recipes, what makes the product quiet whole. Is this fibers? Here is apperently another solution under this date.

This one is really funny, it is a discovery I made after I had pealed an orange with my hands and I consumed it with my hands. Well, the whole afternoon dry and dry soft and soft hands, even when thinking of them to not get sweaty. Is the orange good for a new universal product what really, very popular, for those with sweaty hands? And can it prevent sweating by the whole physicality skin? Not sweating because of orange stuff, :sounds cool: Sort it out!

BIOTECH QUEST/LEAD:

Imagine the 3th and 4th world to offer conditions and super simple indoor gardening revolution.

I think about super-fast'n'easy growing eatable/nourishing basic diet weeds, somehow some what?

The aim for 1m<sup>2</sup> to grow by 7/7 full eatable plants diet for 1 person. Of course in close support of GHLFMM and my universal food social security in theory a more elaborate diet outcome, also for all this group of the too poor livings.

I add also to focus on indoor no light requirements and self-attracting of sane water off the air some hip universal how's.

11/02/2018

This is late and may it be a lesson Nutrition intervention Chapter means either someone gets it all healthy or like me now late to add:

FOR CHEAP SUPER HEALTHY MEALS OPTIONS AT HIGHWAY RESTAURANTS, AND SAME WITH SNACK BARS.

Not just salad with a disgusting salad sauce etc, no I mean a big plate

full of veggies n healthy ingredients sauces, well and to be honest folks, I hope you hereby learn about the fact a meal without meat is much more to eat delicious vegetable based creations. I eat at home vegetarian almost completely with no exceptions. Well, I prepare at home vegetables for under a Euro and I so have always more than I can literally fill myself completely with , with a bit of mayonnaise I do. When I eat meat it does not fill me more but it just tastes not like veggies are unbeatably highly desirable eating.

Stay healthy, drink water, and sleep well in case of sleep thee, and stay patient till the near future global aim for work demands must be easy while the pay good worthwhile, for every jobspot and employing world wide.

Cheers? A big healthy meal, is what makes me cheer every time. ☐

To Be Continued...

## EXIT INTRODUCTION

I do not do public appearances.

And I have great wisdom on hold what will literally do the wisdom magnitude and difference of this Magnum Opus all over again with new worlds on my and my team(s) for involved worlds. For general problematic no one else yet could even describe anything beyond no hope where death and many other forms of suffering and injustice are stuck in vast critical unhumanitarian conditions, we going to get them nice and these different “worlds” will get nice I bet. And we will

R&D&Prepare&Co-manage whole fieldwork projects we are only

chance to.

## EXITDUCTION TOAST

Closing off this chapter in my life by opening my future and pending ambitions.

I will be able to hire personal staff and experts of the presumable abundance of wealth this work in hardcover print version/collector's item must sell well and other forms of smaller payments for offline use. Well, we will work on next Magnum Opuses but much more of me&mine will be specific, but especially field work tested projects we..I presume suggest how to manage fully.. We will work on whatever we want and hopefully much more so, create solutions, in depth. You wonder what all these problematics are, well, all of you folks good and bad and worse, expect when I put my mind on something, I did and do, I take paradise on Earth and give you what makes your life/work much nicer for any of you it is for. I have one thing I figured out I do for a living: creating paradise on Earth everywhere. You might think I stop what some want to continue doing, but I stop powerful and with Humanitarian sense and my ideation always gives much suitable prosperity temptingness. I complete in general and specific ways, especially the next decade or so. I have plans like making of Africa paradise(s) on Earth, counts for all other continents, but the misfortune. I wish mine to focus on Africa to support and beyond GHLFMM. But any other countries and continents will get full attention as in good wishes for the people and

governments, working out. You will notice the diplomatic minded  
pros working for me then, will make friends with now trouble areas

of reality. I can tell you you can expect we give and want or a bit back – such as no danger for great good life or nothing in return than good life for evolved countries etc. I am good, and deep behind the screen

we will work on solving big things with big tempting brilliances, of which I thought for already quiet few major situations, as of each continent we will begin to make paradises of with the governments and the people.

And you know I sense I have a devotion for unresolved ‘n’ resolved medical challenges and cures, well, I want to have worked on as many unresolved medical diseases as I will be asked, just in case I have some missing link inspirations to stop and prevent these unanswered medical tragedies.

#### PERSONAL INTRODUCTION TOAST

I HAVE BECOME A WAY TOO SERIOUS PERSON AND WAY TOO IMPORTANT CAREER TO BE KEPT BUSSY WITH ANY PERSONAL MISTAKE I MADE IN MY “YOUNG” LIFE, GOOD OF ME, I WAS LUCKY, AND I’M SINGLE THUS... (WANT TO) I MAKE LOVE. YOU KNOW SOME THINGS GET GRADUALLY NO LONGER UNDERSTANDABLE BUT –TO MY NOW NO BAD INTENTIONS AND AGAINST ANY HARMS BUT ALSO OF GOODNESS PRINCIPLE AND HUMANITARIAN BY VOCATION AND LIFE DEVOTION AND GIFTED AND VERY MUCH MEANING FOR THE WORLD ITS NEEDY AND HUMANITARIAN OPPORTUNITIES AND I CAN ALSO NOT STAND HARM AND I DO ALL I CAN TO PROTECT VICTIMS AND FOR PEOPLE TO NO LONGER BECOME VICTIMS ETC, HUMANE, NORMAL, RELENTLESSLY SOLVING MINDED, I CAN LITERALLY NOT IGNORE HUMANITIRIAN ISSUES I FIND AND GAVE AND GIVE ANY MY TOTAL RELIEF MINDED ATTENTION.. BASICALLY I DO NO HARM ONLY

GOOD. AND I AM APPOLOGISING FOR ALL WHOM EXPERIENCED  
NEGATIVE THINGS FROM ME DURING MY FIRST WILD LIFE STAGE TILL  
I HAD REACHED MY AGE OF SENSE, SORRY, I AM TOTALLY DIFFERENT

NOW. I WISH I NEVER DONE ANYTHING WRONG IN MY FIRST WILD FREE LIFE, IT IS HARSH TO UNDERSTAND SOMETIMES I AM INVOLVED IN CERTAIN FIELD WORKS BUT NOW AS GOOD AND SAVER ONLY. I'M SORRY FOR ME THE MOST, BECAUSE IT IS MY LIFE AND I CANNOT STAND MUCH EXTERNAL WRONG REACTIONS TO MY PAST, BUT BETTER TO FOCUS ON MY PRESENT&EVER IDENTITY.

SO GIVE ME A BREAK AND WORK ON YOURSLEVES TO BECOME YOURSELF CO-EXISTENTIALLY HUMANE AS POSSIBLE, I PERSONALLY HAVE BEEN MINDREAD RUMOR AND UTTERHORROR WISE ON ANY MY CONSCIOUSNESS MUCH HAVING MADE ME OF COURSE FOR MORE THAN 15YEARS NOW A PTSS VICTIM HAVING MOSTLY SURVIVED UTTER ATTEMPTS TO MURDER ME AND SEVERAL ALMOST DEATHLY CRIMES I SO FA SURVIVE, BUT GOOD NEWS IS BY 26 Dec.2016 I'll have had a sober thus successful rTMS against "hearing voices&telepatisticInner, it'll calm any mind read to impossible and neutral or no clue, and me free from any PTSS nor any touch ability by utter attacks, etc. I should be ok for the rest of my life. And my private management to undo me from lingering cancer cells and and future cancer odds, etc. to get me healthy and Eternal.

Until end December after the rTMS what will have cured all my probs and restored my emotional wrack into nice, I am now still a Post-Traumatic Stress Syndromes victims in between psycho's but I'm God who will fly off to best destination ... where I&mine ☺

Live and let live at own well, show that you historically “can take

history and present like a man”, and to the socio’s psycho’s amongst you, for paradise on Earth’s sake, have some sense of self prevalent when it comes to manifest off your senile/dementia/”anti-christ” vibes and ego’s and formations of communicatively crazy destructive decisional lack of obvious self-restrain self-prevail and any selfrespect and of course so uncool and un-mannered and a total conspiracy as we know of a piece in this book. In 2.5 months I’ll be at my best and any of them at their best at mine, but the viral horrible viral stuff is damage remaining very alive and kicking and as committing to endanger me since age back in history and still scores public and peers operating occults all to seemingly try to destruct me as much as they can’t, but I know I&Mine’ll leave Europe and rise to the sky and land in the South where I want to be, surprise.

..SOFAR

This said, have the time of your life if you can, and go and stop and replace endured tragic realities experienced, by brilliant life upgrading new realities mastering on the critical needs for change. And for those of you here whom are torturing people or your masses or whomever, I hope you start gradually wondering (how) to join era 2, the ‘humanitarianly’ sacred and holistic second age of becoming kind and to feel sad when people are hurt (outrageously). I noticed after a decade of highly important solutions I made up, that I&alike are creating of humanity, the world and its, paradise on Earth and hopefully hereby successfully also eternally we in the universe.

I hold a writing work document source in progress and with unconsidered states what seems very interesting to be made into a second Magnum Opus book with my nearby future private career staff'n'managements to be made the dynamic content at best and

finalized, so I expect my career will release a second Magnum Opus literary work, it is rather philosophical in important new ways of living and working and interests and success and focus on making humanity wisely informed at best on things what causes of conflict(s) amongst humanity

End of this solo literary Magnum Opuses master life work solo achieved concluded content, I thank any of you readers whom share and talk and work by and buy this literary content its material forms, I also thank in advance to not want to harm me nor mine, and to behave about mine and me.

To be continued...

### (SHORT) INTRODUCTION

We have to make the best of field work behind each solution, lead and quest, but also the other best solutions holders. Expect to be very enthusiastic reading this book, and even much more, experiencing the results.

We learn how to deal with our 'humanitarian' problematics, of this work well at best A.S.A.P.

I am not good at finalizing longer texts as I have ADD and so far not medicated yet, but I just want you to see this publication as theoretic leads what not necessarily require perfect writing.

How to cry for time experienced. It is like howling but then crying out loud in sort of aware of what people and animals go thru and the sure lethal stakes, the horror what comes out of all absurdity and inhumaneness working out so tragically at the end of this old era 1. The intellectual denial is something we shiver and shake. The power here -not yet, is when my hearth is pounding in my flesh. Useless and no-era responses have brought us all to my way(s), reasons bonded and seal opened. We must no longer respect “blabla” nor denying the respected ‘humanitarian’ actions because here on, solved the world completely.

Critically this Magnum Opus saw the mainstream and experts their interest. Engraved on our global historical timeline on, know this book its purpose and power and diplomatic influence has no boundaries and especially I also. As we start to experience the relief by wisdom. We will finally be able to focus on humanity and the world and space with reasonable, humane means and our fresh ways. Not everything for the humanitarian fields I wrote is here, see these like mail to more suitable occasions.

We can expect this new era will be very respected and welcomed cross convictions, practices and structures.

There is a rule in here to not want to stop what you cannot handle in theory with ‘humanitarian’ brilliance and gift, making the e(n)volved happy and settling down in nice new reality wisely and nicely designated, and to thus not create enemies with tuff words what work against big interests but work secretly till centralized (GHLFMM - fund and -bank and free world) propositions make sense to wisdom and the selected involved interests prepared on.

Thus, do not become enemy of this work nor me, but rather understand that ‘when’ such good news suggestions come along and addresses your “selected group”, it is to get to consider tempting

new reality. And I don't do public appearances I will heal and become perfect for me, and very very old, just like most.

Dear those whom suffer and whom need humanitarianly compared by none but perhaps the 'humanitarian' attention evilness, accidents and prevention are influential (more often not resolved and with engagement), solved once and for most of all, hold on, here we aim total reach and total humanitarian wealth and sense. Behind each piece is a tragic field, and it are these specific fields what need to be transformed into brilliant good experienced realities.

Respect my private souverenity and humanitarian career, or else, be for mine.

Understand and gradually learn what to esteem and what not (yet). Patience, my peers, patience while hanging on or reading down if you do. And let I tell you, also I haven't had humaneness in years and I look forward to our future and especially to my after sales my private career location(s) where mine and I will be good in the South, obviously.

We must make the best with this book and humanity as it is, but know I and mine will anyhow make good my and our brilliant 'humanitarian' upgrades will be established and durable, just to know someone, I and mine will if the world doesn't well at best, by me and my (nearby future) teams, surely.

Here of now this work acknowledgement on, humanity and the world is much much lighter and very vast and wise and practical like never expected from this present and past total lack of 'humanitarian' influence according to the will and know how -to relief and safe from suffering. To know and experienced that most humanitarian wisdom (common sense) got deprived their righteous influence and most none significantly the people and theirs what deprived, and basically left to endure whatever. Now we here read and from notice how we

can handle brilliantly and lasting the global 'humanitarian' (look up this word in the dictionary) crisis fundamentals of basic purpose to those we (and those whom asked to) help. Now, save as perfect as possible -by the second. You know now here at the fundamentals

empowering to make serious wise change.

This Magnum Opus 'on will heal the average western 'humanitarian' such irrelevancies and perfect also the southern hemisphere living. See this book big, everything I work together, is big for the South and flanks, but most of all wise on, and please forgive and ignore the fact not all writing here is academic English writing but rather how I made it, I find it a good book no matter the writing.

I want to tell something about all the humanitarians with certain tragic and unhumanitarian situations that few others are on top of onto the bottom like a miracle out of the sky.

Other not mentioned any info about in this book, are n sensitive aware of victims whom of course were and are on relief priority and are surely going to be changed into normal living for their at this present situations what obvious aims but equal obvious sooner than later approached and changed into harmony, as in helped to become humane in Humanitarianly effective interventions.., but there are also the ones you all might think I really cannot possibly have defined common sense quiet miraculous ways of handling few of the left major specific situations noone thinks these are solvable with sense and not add all, but a group of trouble solvers what resolved major stuck ongoing priorities and have no challenges left of these you their involved and envolved's think you're on your own and but they have the hold knowing how what do not take years but just couple weeks somewhere end end 2018/2019'on, sorry for the delay but I have faced con artists and had no humane peers of the good guys whom replied or complied with my reasons for attention. The sense ways I'm allowed to make you only daydream about are "like a walk true the park" while these situations seem unsolvable they actually became the most easy of all and thus amongst first to enroll practical.

In general I'm allowed to mention this sign of hope to those not mentioned about in this book, there is relief and change within the fastest's possible several years to some approaches what need to be Researched&Developed&prepared on complex communities what

require to be perfect for them.

Anyhow, know to the bottom, whether I or some others, with some major break thru revolutionary common sense good news sense, they contacted me they focused on some war conflict to be honest, and I read their solution and it is the only way to handle in just few weeks instead of many years, onto the bottom. V

I want to focus on countries and governments and medical challenges, me and my then soon in my plan we'll work with yours and this is quality attention.

Now let's do this! Per second. And expect me and my future team will do many more great things but rather more practical and often fully elaborated.

HUNDREDS OF GREAT NEW THEORETIC SOLUTIONS I  
MADE UP BETWEEN 2009-2016
