## CHAPTER I.

	PAGE
WHAT YOU NEED TO EXPERIMENT WITH . . . . .	I
The Apparatus You Need—What the Apparatus Consists of—How to Make a Ring Stand—How to Make an Alcohol Lamp—How to Make a Bunsen Burner—How to Make a Test-Tube Rack—Your Supply of Chemicals—Indicator Papers and Solutions—How Litmus Paper Acts—How Phenolphthalein Acts—How Methyl Orange Acts—How Congo Red Acts—How Sulphide Test Paper Acts—How to Work Glass Tubing—How to Cut a Glass Tube—How to Smooth Up the Sharp Edges—How to Bend Glass Tubing—How to Draw a Glass Nozzle.	

## CHAPTER II.

AIR, THE MIRACLE-WORKER . . . . .	18
The Height of the Atmosphere—The Weight, or Pressure, of the Air—Experiment to Show that the Air Has Weight—What an Element is—Experiments to show What a Mechanical Mixture Is—Experiment to Show What a Chemical Compound Is—What the Air is Good for—About Burning and Combustion—What Rusting, or Oxidation, Is—Experiment to Show How Iron Rusts—Experiment to Show that Other Metals Rust—Experiment to show that Air Is Used Up When Iron Rusts—How Slow Oxidation Causes Decay—What Spontaneous Combustion Is—Substances that Oxygen Will Not Affect—How to Make Ozone—How to Test for Ozone.	

## CHAPTER III.

EXPERIMENTS WITH OXYGEN, NITROGEN, AND CARBON DIOXIDE . . . . .	32
A Simple Way to Make Oxygen—A Way to Make More Oxygen—The Self-Lighting Match—The Flashing Charcoal Pill—The Scintillating Watch-Spring—The Strange Action of Oxygen on Phosphorus	

—How to Make an Oxy-Calcium Light—How the Oxy-Calcium Light Works—How Sulphur Burns in Oxygen—A Simple Way to Make Nitrogen—Another Easy Way to Make Nitrogen—How to Make a Larger Amount of Nitrogen—The Self-Extinguishing Match—What Else the Experiment Shows—How to Show there is Carbon Dioxide in the Air—To Show That You Inhale Oxygen and Exhale Carbon Dioxide—How to Make Carbon Dioxide—A Better Way to Make Carbon Dioxide—To Show that Carbon Dioxide Will Not Support Combustion—To Show that Carbon Dioxide Destroys Life—A Magical Experiment With Air, Carbon Dioxide and Oxygen—To Show that Carbon Dioxide Has Weight—To Separate a Candle from Its Flame—The Levitation of a Soap Bubble.

## CHAPTER IV.

## THE WIZARDRY OF WATER . . . . . 56

Some Characteristics of Water—What Water Is Made of—What Water Is Good for—How to Purify Water—How to Filter Water—How to Boil Water—How to Distil Water—Tests for the Purity of Distilled Water—How to Raise the Temperature of Water—How to Lower the Temperature of Water—How to Make Ice—What Water of Crystallization Is—How to See the Water of Crystallization—How to Make Rock-Candy Crystals—How to Make a Secret Writing Ink—How to Make a Weather Forecaster—How to Make Imitation Ground Glass—Kinds of Water—How to Tell if Water Is Soft or Hard—How to Test for and Get Rid of Temporary Hardness—How to Test for and Get Rid of Permanent Hardness—How to Test Water for Odor and Color—How to Test Water for Mineral Substances—How to Test Water for Organic Matter—How to Test Water for Carbon Dioxide—How to Test Water for Alkalis—How to Test Water for Lime—How to Test Water for Acids—How to Test Water for Iron—How to Test Water for Sulphur.

## CHAPTER V.

## EXPERIMENTS WITH HYDROGEN . . . . . 75

How to Analyze Water—How to Make Synthetic Water with an Electric Spark—How to Make Synthetic Water with an Alcohol Flame—How to Make Hydrogen—How to Make Hydrogen without an Acid—How to Pour Out Hydrogen—The Diffusion of Hydrogen—How to Make a Hydrogen Flame—How Hydrogen Acts on Flame—How

# CONTENTS

PAGE

to Blow Hydrogen Soap Bubbles—How to Blow Hydrogen Cauliflower Soap Bubbles—How to Blow Resin Bubbles—How to Make a Self-Lighting Flame—How Hydrogen Acts on Silver Nitrate—How Hydrogen Acts on Sound—How to Make a Hydrogen-Flame Organ Pipe—How to Purify Hydrogen Gas—How to Dry Hydrogen.

## CHAPTER VI.

A PAIR OF SMELLY GASES . . . . . 98

About Chlorine and Ammonia Gases—Experiments with Chlorine—How to Make Chlorine—How to Test for Chlorine—How Chlorine Acts on Flame—Spontaneous Combustion—How to Make a Smoke Screen—The Art of Bleaching—How to Test the Bleaching Power of Chlorine—To Make a Red Rose White—How to Make Bleaching Powder—How to Make a Bleaching Liquid—How to Make a Bandanna Handkerchief—Experiment with Ammonia—How to Make a Little Ammonia—How to Make Ammonia on a Large Scale—To Show How Ammonia Dissolves in Water—How to Make an Ammonia-Operated Fountain—How to Make Concentrated Liquid Ammonia—An Experiment with Concentrated Liquid Ammonia—Some Uses of Aqua Ammonia.

## CHAPTER VII.

ACIDS, THE GREAT SOLVENTS . . . . . 118

About Sulphuric Acid—The Easiest Way to Make Sulphuric Acid—A Better Way to Make Sulphuric Acid—Another Method for Making Sulphuric Acid—A Laboratory Method for Making Sulphuric Acid—How to Make Sulphur Dioxide—How to Make Sulphur Trioxide—How to Make Sulphuric Acid—Experiments with Sulphuric Acid—How to Change Sugar into Carbon—How to Write Indelibly on Cotton Goods—How to Make Copperas—How to Make Blue Vitriol—How to Make Epsom Salts—About Nitric Acid—How to Make Nitric Acid—Experiments with Nitric Acid—An Experiment in Spontaneous Combustion—The Action of Nitric Acid on Metals—About Hydrochloric Acid—To Make Hydrogen Chloride—To Make Hydrochloric Acid—Experiments with Hydrochloric Acid—How to Make a Hydrogen-Chloride Fountain—The Great Smoke Experiment—How to Make a Good Soldering Fluid—How to Make Imitation Emeralds—How to Make Aqua Regia—About Fluorine and Hydrofluoric Acid—How to Etch Glass—An Easier Way to Etch on Glass—How to Change Water into Ozone.

	PAGE
<b>CHAPTER VIII.</b>	
<b>WHAT BASES AND SALTS ARE . . . . .</b>	<b>139</b>
How Acids and Bases Form Salts—What the Bases Are—What the Salts Are—How to Make Calcium Hydroxide (Caustic Lime)—How to Make Sodium Hydroxide (Caustic Soda)—How to Make Potassium Hydroxide (Caustic Potash)—Experiments with Hydroxides—How to Make Mortar—Other Things Made with Lime—How to Make Hard Soap—How to Make Soft Soap—How Soap-and-Water Cleans—How to Make Various Salts—Sodium Chloride (Common Table Salt)—Sodium Sulphate (Glauber's Salt)—Sodium Nitrate (Chili Saltpeper)—Potassium Chloride—Potassium Nitrate (Saltpeper).	
<b>CHAPTER IX.</b>	
<b>THE MYSTIC METALS—THEIR ALLOYS AND AMALGAMS . . . . .</b>	<b>150</b>
How the Elements Are Classified—The Activity of the Metals—Table of Activities—Potassium, the Softest Metal—Compounds of Potassium—An Experiment with Potassium—Sodium, Another Alkali Metal—Compounds of Sodium—An Experiment with Sodium—Lithium, the Lightest Metal—Compounds of Lithium—An Experiment with Lithium—Calcium, the Fourth Alkaline Metal—Compounds of Calcium—Experiments with Calcium—Magnesium, the Metal that Burns—Compounds of Magnesium—Experiments with Magnesium—Aluminum, the Lightest Common Metal—An Experiment with Aluminum—Manganese, the Hardening Metal—Compounds of Manganese—An Experiment with Manganese—Zinc, the Electric Metal—Compounds of Zinc—An Experiment with Zinc—Chromium, the Color-Making Metal—Experiments with Chromium—Iron, the Most Useful Metal—An Experiment with Iron—Nickel, the Non-Rusting Metal—How to Nickel-plate a Coin—Tin, the Soft, Malleable Metal—An Experiment with Tin—Lead, the Heavy Metal—How to Make a Lead-Tree—Copper, the Prehistoric Metal—An Experiment with Copper—Bismuth, the Easily Fusible Metal—Experiments with Bismuth—Antimony, the Metal that Expands—Experiments with Antimony—Mercury, the Liquid Metal—An Experiment with Mercury—Silver, the Queen of Metals—An Experiment with Silver—Gold, the King of Metals—An Experiment with Gold—Platinum, the Regal Metal—How Alloys Are Made—Alloys of Magnesium and Aluminum—Alloys of Iron and Steel—Alloys of Tin and Lead—Alloys of Copper—Silver Alloys—Gold Alloys—How Amalgams Are Made—A Sodium Amalgam—A Zinc Amalgam—Tin and Zinc Amalgams.	

# CONTENTS

xiii

PAGE

## CHAPTER X.

CHEMISTRY SIMPLY EXPLAINED . . . . . 184

What Matter Is—What the Properties of Matter Are—First Experiment—Second Experiment—The Three Common Forms of Matter—What Matter Is Built Up of—What the Elements Are—How the Elements Got Their Names—What the Symbols Mean—What the Symbols Show—What Equations Are.

## CHAPTER XI.

FIRE, FLAME, HEAT, AND LIGHT . . . . . 195

What Fire Is—What Flame Is—What Heat Is—What Light Is—Ways of Making Heat and Fire—How a Candle Burns—How Ventilation Affects Combustion—How the Davy Safety-Lamp Works—How an Alcohol Lamp Burns—How Oil and Gas Lamps Burn—How a Bunsen Burner Works—Experiments with a Bunsen Burner—How to Light the Burner—The Luminous Flame of the Burner—The Non-Luminous Flame of the Burner—How to Make Colored Flames—How to Make Charcoal—How Charcoal Is Made—What Coal Is—How to Make Coal Gas.

## CHAPTER XII.

HOW TO MAKE PHOTOGRAPHS . . . . . 209

What Light Is—How Light Acts—How Light Acts on Silver—How to Make Silver Nitrate—Experiments with a Silver Nitrate Solution—How to Make Silver Chloride—Action of Light on Silver Chloride—How to Make a Pinhole Camera—How the Camera Works—How a Real Camera Is Made—How Dry Plates and Films Are Made—How a Picture Is Made on a Dry Plate or Film—How to Develop a Dry Plate or a Film—How to Fix the Picture—How to Make a Print from a Negative—Kinds of Printing Papers—Silver Papers—How to Make a Print—How to Tone the Print—How to Fix the Print—How to Make a Velox Print—How to Make and Use Blue Paper.

## CHAPTER XIII.

THE WHITE MAGIC OF CHEMISTRY . . . . . 227

Pouring Wine and Water from the Same Pitcher—Changing Water into Ink, and Vice Versa—The Blushing Bride—The Magical Atomizer—The Rainbow Liquid—Breathing a Picture on Glass—Passing Smoke Invisibly into a Tumbler—Elixir Vitae, or the Artificial Pro-

	PAGE
duction of Life—How to Make Secret Writing Inks—A Heat Sympathetic Ink—A Light Sympathetic Ink—A Fluorescent Sympathetic Ink—How to Make Spirit Pictures—The Materialization of Mysteria.	

## CHAPTER XIV.

<b>SAFE AND SANE FIREWORKS</b> . . . . .	246
--	-----

How to Make Fire without a Match—Writing with Fire Ink—Rapid Oxidation of Zinc—How to Make a Safe Fuse—How to Make a Flash-Light—How to Make Explosive Matches—How to Make Rainbow Lights—How to Make Fourth of July Sparklers—How to Make a White Flash-Light—How to Make a Red Flash-Light—How to Make a Green Flash-Light—How to Make Flash Paper—How to Make Colored Flash Paper—How to Make Flash Handkerchiefs—How to Light a Paper without a Flame—How to Light a Paper with a Piece of Ice—The Great Fire-Eating Trick—How to Make Colored Fire—Red Fire—Green Fire—Yellow Fire—Bengal Lights—How to Make Phosphine Smoke Rings—How to Make Pharaoh's Serpents.

## CHAPTER XV.

<b>USEFUL HOUSEHOLD RECIPES</b> . . . . .	263
---	-----

How to Make Soaps—Toilet Soap—Perfumed Soap—Colored Soap—Floating Soap—Glycerine Soap—Sapolio—How to Make a Safe Dry-Cleansing Compound—How to Take Out Spots and Stains—A Fresh Grease Spot—Old Grease Spots—Paint Spots—Ink Spots—Iron-Rust Stains—Alkali Spots—Mildew Stains—How to Make Bleaching Compounds—For Cotton and Linen Goods—For Wool and Silk—For Hair and Wool—How to Make Disinfectants—How to Make and Use Natural-Color Dyes—Direct or Substantive Dyes—Red Logwood Dye—Black Logwood Dye—Green Logwood Dye—Yellow Tumeric Dye—Brown Tumeric Dye—Bright Red Cochineal Dye—Orange Cochineal Dye—Violet Cochineal Dye—Insoluble Dyes—To Dye Indigo Blue—To Dye Tumeric Yellow—Mordant, or Adjective, Dyes—How to Make and Use Aniline Dyes—Direct Aniline Dyes for Cotton Goods—Mordant Aniline Dyes for Cotton Goods—Acid Colors for Silk and Woolen Goods—How to Make Inks—Black Ink—Blue Ink—Purple Ink—Red Ink—Green Ink—Printer's Ink—Some Other Useful Recipes—How to Make a Liquid Ink Eraser—How to Make a Good China Cement—How to Make an Adhesive Paste—How to Make Fire-Extinguishing Compounds—How to Clean Silverware Chemically—How to Clean Silverware Electrically—How to Waterproof Goods—How to Fireproof Goods—How to Make a Hair-Remover.

FIG. 1 — A Bought Ring Stand . . . . .	3
FIG. 2 — A Home-Made Ring Stand . . . . .	3
FIG. 3 — A Bought Alcohol Lamp . . . . .	4
FIG. 4 — A Home-Made Alcohol Lamp . . . . .	4
FIG. 5 — A Bought Bunsen Burner . . . . .	5
FIG. 6 — A Home-Made Bunsen Burner . . . . .	5
FIG. 7 — A Test Tube . . . . .	6
FIG. 8 — A Test-Tube Brush . . . . .	6
FIG. 9 — A Test-Tube Holder . . . . .	6
FIG. 10 — A Bought Test-Tube Rack . . . . .	7
FIG. 11 — A Home-Made Test-Tube Rack . . . . .	7
FIG. 12 — A Glass Stirring Rod . . . . .	8
FIG. 13 — A Pipette or Medicine Dropper . . . . .	8
FIG. 14 — A Nest of Beakers . . . . .	9
FIG. 15 — An Ordinary Spherical Flask . . . . .	9
FIG. 16 — An Erlenmeyer Flask . . . . .	9
FIG. 17 — A Glass Funnel . . . . .	10
FIG. 18 — A Mortar and Pestle . . . . .	10
FIG. 19 — An Ordinary Wide-Mouth Bottle . . . . .	11
FIG. 20 — A Woulff's Bottle . . . . .	11
FIG. 21 — A Four-Ounce Graduated Glass . . . . .	11
FIG. 22 — A Teaspoonful Graduated Glass . . . . .	11
FIG. 23 — A Porcelain Crucible . . . . .	12
FIG. 24 — A Glass Retort . . . . .	12
FIG. 25 — A Watch Crystal . . . . .	13
FIG. 26 — A Porcelain Evaporating-Dish . . . . .	13
FIG. 27 — A Five-Inch U-Tube . . . . .	13
FIG. 28 — A Pair of Tweezers . . . . .	13
FIG. 29 — How to Cut a Glass Tube . . . . .	15
FIG. 30 — How to Bend a Glass Tube . . . . .	16

	PAGE
FIG. 31 — How to Draw a Glass Nozzle . . . . .	17
FIG. 32 — The Earth's Atmosphere is Shaped Like a Football	19
FIG. 33 — An Experiment Which Shows that the Air Has Pressure . . . . .	21
FIG. 34 — Separating Iron Filings from Sulphur by a Stream of Air . . . . .	22
FIG. 35 — Separating Iron Filings from Sulphur with a Magnet	22
FIG. 36 — Making a Chemical Compound . . . . .	23
FIG. 37 — Apparatus for Making Lead and Tin Rust . . . . .	27
FIG. 38 — Apparatus to Show that Air Is Used When Iron Rusts	27
FIG. 39 — How to Make and Experiment with a Little Oxygen	33
FIG. 40 — How the Delivery Tube is Bent . . . . .	34
FIG. 41 — The Hole in the Cork . . . . .	34
FIG. 42 — The Oxygen Apparatus Complete . . . . .	34
FIG. 43 — The Wire on the Match . . . . .	36
FIG. 44 — The Self-Lighting Match . . . . .	36
FIG. 45 — The Scintillating Watch-Spring . . . . .	37
FIG. 46 — Filling the Bladder with Oxygen . . . . .	38
FIG. 47 — Directing a Stream of Oxygen on Phosphorus . . . . .	39
FIG. 48 — How to Make an Oxy-Calcium Light . . . . .	40
FIG. 49 — A Simple Way to Make Nitrogen . . . . .	42
FIG. 50 — A Better Way to Make a Little Nitrogen . . . . .	43
FIG. 51 — How to Make Nitrogen for Experimental purposes.	44
FIG. 52 — A Simple Way to Show Carbon Dioxide . . . . .	47
FIG. 53 — A Better Way to Show Carbon Dioxide . . . . .	48
FIG. 54 — A Simple Way to Make Carbon Dioxide . . . . .	49
FIG. 55 — A Better Way to Make Carbon Dioxide . . . . .	50
FIG. 56 — To Make a Larger Amount of Carbon Dioxide. . . . .	51
FIG. 57 — A Magical Experiment . . . . .	53
FIG. 58 — Pouring Carbon Dioxide from One Jar Into Another	54
